**Amendment 010****Questions and Answers**

**Q1:** In amendment 3 the number of paper trays in category 1 & 5 was changed from 3 trays to 2 trays. However the paper capacity remained at 1600 sheets whereas it should have been reduced by 1 tray (500 sheets) to 1100 sheets with 2 trays not including the manual feed. Please confirm the number of trays and paper capacity as mandatory for Categories 1 & 5.

**A1:** The change in amendment 3 reduced the number of output trays to 2 from 3, not the input trays. As such the paper capacity has not changed. The correct values for both the input and output trays are as follows:

	<b>Category 1</b>	<b>Category 5</b>
Minimum number of input paper trays (Not including Manual Feed)	3	4
Minimum input paper capacity in sheets	1,600	1,600
Minimum # of Output Trays	2	2
Output stacker capacity in pages	500	500

**Q2:**Also, please let us know how many print servers Statistics is using as we need this for our bid.

**A2:** Statistics Canada currently has 4 print servers. Two are on our internal network, which is the primary working environment for Statistics Canada. This network is fully isolated from the outside world. The other two print servers are on our outward facing network.

**Q3:** Amendment 7 removed :

1. After further review, **DELETE** the following criteria from pages 90, 99, 102, and 105 of Annex C - Evaluation Criteria for Categories 4, 7, 8, and 9 :

Security Features						
The ability to physically lock access the physical hard disk device to prevent authorized removal (i.e. cable lock for Hard disk enclosures)	R	P	Compliant: 3 point			
Hard disk encryption	R	P	Compliant: 3 point			

However, it did not remove the coinciding information from Categories 4, 7, 8, 9. Please remove the

following lines from Annex C: as there are no hard drive required for Categories 4, 7, 8, 9.

The ability to automatically overwrite or remove immediately (i.e., erase or electronically shred data) temporary data stored on the device hard drive or in solid state or flash memory	M			
The ability to remove and replace the hard drive at the device's end of service life at Statistics Canada	M			

**A3:** Statistics Canada still requires that the mandatory requirement "The ability to automatically overwrite or remove immediately (i.e., erase or electronically shred data) temporary data stored on the device hard drive or in solid state or flash memory" for categories 4, 7, 8 and 9. While the units in these categories do not require a hard drive, they have mandatory memory requirements, to which this statement applies.

## Revisions

1. After further review, please remove the following criteria from pages 30, 51, 58, and 65 for Categories 4, 7, 8, and 9, as Hard Drives are not mandatory for these categories:

The ability to remove and replace the hard drive at the device's end of service life at Statistics Canada	M	P	YES/NO	
---	---	---	--------	--

***All other terms and conditions remain unchanged.***
