Amendment 001 is raised to answer Bidders Questions as follows:

Q1: Table 1, Section 3, Item K, calls for a 2.5" hard drive while other sections call for 3.5" drives. Can a 3.5" hard drive be used for this particular item?

A1: No. We are standardizing our OS installs on 2.5" drives and anticipate using SSD (Solid State Drives) in the future – all of which are 2.5". The 3.5" drives are intended as data drives due to the higher capacities available and generally lower cost. (we deal with large amounts of data).

Q2: 901D Requirement – We are assuming 35G, 20ms shock input to server based upon levels derived from shock-mitigated cabinets in reference to 901D Grad A, Class II, Type B. What are the shock levels that are expected to be met?

A2: The 35G, 20ms shock on the servers under the assumptions given in the above question are acceptable.

Q3: Noise Requirement – Is the 56dB noise level requirement for Airborne or Structure Borne Noise?

A3: Airborne Noise

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
