AMENDMENT NO. 2

This amendment is raised in response to the following questions:

Question #1

Can you advise if the following would be acceptable? "L" and "T" design.

Answer #1

Yes

Question #2

Is the following acceptable? Cold roll steel, electrostatic painted product.

Answer #2

The types of steel are outlined in the specification:

6. Components

Galvanized steel sheet: commercial grade to ASTM A653/A653M with Z275 zinc coating.

Uprights:

Roll formed steel angles or tees with perforations to accommodate shelves and other components.

Size and thickness of angles or tees to support 650 pounds per shelf total load.

Shelves:

Brake formed sheet metal box shelf reinforced to carry specified loads.

Pre-punched holes in shelves to accommodate dividers and other components.

Finishing panels:

Formed steel sheet panels to close off ends, backs and tops of closed-type shelving units, or sections, and as partitions between adjacent bays.

Perforated sheet steel panels to close off ends, backs, and as separation between adjacent bays, as shown on layout sketches.

Gusset plates:

Heavy gauge metal plates to reinforce corner connections of shelving components.

Question #3

Please describe what is meant by Open Type. Does it mean that the uprights do have no end panels and the units do not require back panels?

Answer #3

The open type metal shelving is open, no back panels, no side panels.

Question #4

Please describe what is meant by Closed Type. Does it mean that the uprights have end panels and the units have full back panels? Please confirm this selection does not have doors or locks. Are dividers required for this section of shelving?

Answer #4

5.3 Closed-Type Heavy Duty Metal Storage Shelving

1. Type: heavy-duty closed shelving system (i.e. With top, bottom, sides, and back panels).

Under Shelves heading: pre-punched holes in shelves to accommodate dividers and other components. No doors, locks required.

All other terms and conditions remain unchanged.
