Questions and Answers regarding the RFI:

Question 7:

During the July 6th, 2012 Industry Workshop, the requirements around Protected A, B and C were briefly discussed. In order to determine optimum solution architectures that meet with SSC's objectives, and to ensure we can validate whether certain solutions meet or exceed SSC's requirements, it is imperative that CSE (Yan Robichaud at Yan.Robichaud@CSE-CST.GC.CA) provide a classification mapping of Canada's Protected A, B and C categories and how they map to the security classifications in the USA.

Furthermore, if details can be provided as to estimates of the number of users in each classification, and how they distribute across the 44 Depts within the SSC mandate, as well as if there is any overlap whereas some users have requirements to communicate in more than one classification, would be very helpful in determining an optimum segmentation strategy.

Answer 7:

There is no formally accepted GC standard mapping Canadian classification to US classification. Based on CSEC's policies and experience exchanging information with the US and the knowledge of their handling requirements, this mapping should be used in the context of the ETI project:

Canadian Marking	Equivalent US Marking
Unclassified	Unclassified
Protected A	Unclassified//FOUO (For Official Use Only)
Protected B	Confidential
Protected C	Secret
Confidential	Confidential
Secret	Secret
Top Secret	Top Secret

Additional information on current state volumetrics will be provided during the Review and Refine Requirements phase.
