Amendment No. 001 is being issued to provide answers to bidders questions received to date concerning the Request for Proposal (RFP) document.

**Questions and Answers**

Q1. 1 wanted to confirm that the Radionuclide analyses requested, in the above noted solicitation number, includes all the parameters specified in Schedule 3 of the ODWS, O.Reg. 169/03, as they are not listed in the RFP. Please note, Schedule 23 and 24 parameters are listed in the RFP.

A1. There is no Federal or Provincial requirement to continually test for all 78 Radiological standards.

There is a requirement to test using the gross alpha and beta screening mentioned below.

Water samples to be initially analysed for the presence of radioactivity using gross alpha and gross beta screening rather than measurements of individual radionuclides. If screening levels are exceeded (0.5 Bq/L for gross alpha and 1.0 Bq/L for gross beta), then concentrations of specific radionuclides should be analysed at the request of the Project Authority.. A guideline for radon is not deemed necessary and has not been established.

All other terms and conditions remain unchanged.
