## Questions and Answers:

Q:

Can you please clarify the requirements for the construction fence around the site and our lay down area. The drawings refer to 6 ft. standard construction fence, but the spec lists a 2x4 and plywood fence with barbed wire. This will make a significant difference in the cost of the fence.

A:

Refer to Addendum No.01., Section 01 56 00 - Temporary Barriers and Enclosures. 2x4 and plywood fencing is not required. No fencing is required for the lay down area.

Q:

Can you please clarify if the concrete block is to be painted? Are the steel HSS frames to be painted? (If so, are they painted already?) Is the mesh to be painted? There is a spec section for the painting of block and steel but it states for the painting of all items indicated, but it only indicates the doors and frames.

A:

Refer to Addendum No. 01, Section 09 91 00 - Painting for a revised finish coating system for concrete block.

Refer to Addendum No. 01, Section 05 12 23 - Structural Steel for Buildings: Galvanized mesh is not to be painted but welds to be touched-up with zinc-rich paint after installation.

Refer to Addendum No.01, Section 05 50 01 - Metal Fabrications: Doors and frames to be painted in accordance with Section 09 91 00, paragraphs 2.2.1/2.3.3. Other items to be painted according to systems listed in Section 09 91 00, unless indicated otherwise.

Q:

Are we to assume that the quantity of materials in the spec are the numbers we go with due to the short time frame and that we cannot verify what is there.

A:

Yes, assume that quantities of materials already on site, as listed in the specifications and on the drawings, are accurate.

ADDENDUM No.01, dated 2012-10-31.
