Title: Development of Advanced Radarsat-Based Products and Services

This Request for proposal (RFP) is hereby modified in order to postpone the closing date and to answer a question received from a bidder as described below:

The solicitation closing date is postponed on 2013-03-04 02:00 PM

Question 1) Would it be admissible if the targeted and participating Government of Canada organization not be the direct end-user of the technology if this technology, once proven to meet the needs of that GoC organization, be imposed by the latter as a new standard to be followed by a third party? Such use of the technology would enable the Government of Canada organization to better address its priorities and needs, and serve its mandate.

Response: The Bidder must demonstrate that the research and development for the technology or applications is likely to expand the utilization of RADARSAT data within a Government of Canada organization. In this sense, the potential users of the technology / application could be employees of the targeted department or third parties designated by the department to help address its priorities and needs, and serve its mandate.

ALL OTHER TERMS AND CONDITIONS OF THE RFP REMAIN UNCHANGED.
