The purpose of this amendment is to respond to questions relating to this bid solicitation as detailed below:

#	Question	Response
1	What verification of defects will be required as part of the verification?	Each specimen shall be assigned a Specimen Number. A detailed, schematic drawing of each specimen, with the various flaws highlighted (in top view and cross sectional view) on the drawing, indicating flaw location in regard to the weld X and Y axis, the flaws depth from scanning surface, and the flaw length. The verification of the tolerances is usually conducted by a third party since the NDT Specimen manufactures are normally not in the business of testing and measuring.
2	How strict is the A36 or 1018 carbon steel specifications and evidence (certification) will be required?	As long as the bid clearly states and indicates that the specimens' material is A36 or 1018 carbon steel, this will be sufficient. Having some specimens made with A36 and others with 1018 CS is also sufficient.

**ALL OTHER TERMS AND CONDITIONS OF THE BID SOLICITATION REMAIN UNCHANGED**
