**This amendment #01 to the solicitation is raised to answer questions from potential bidders.**

Q1. The shell material section on Table 1 specifies the yarn as 50% Polyester / 50% Cotton. Should the yarn blend be “ring spun” or “open end” yarn ?

A1. The method chosen either ring spun or open end is up to the supplier . We specify a blend of Polyester/Cotton which leaves it open for the supplier to choose which must meet the criteria specified in Table 1.

Q2. For the Navy color it states “to match colour swatch provided by Quality Control”. How can I get the Navy standard? Do I need the actual swatch or do you have a pantone number we can work with?

A2. A sample swatch and/or an RCMP viewing sample will be provided to the lowest bidder(s) requested to manufacture a pre-award sample. If there is not enough time for the potential suppliers requested to manufacture a PAS to dye the fabric, the shade/colour will not be mandatory at the PAS stage but, the colour/shade will be mandatory at the pre-production sample stage.

Q3. 4.3.9 Marking – describes a heat transfer label. Would the RCMP accept this inside label to match the quality of the crest?

A3.1 ) silk screen is ink directly onto the garment  
2) heat transfer is ink on a carrier transfer paper

both options of the crest are ink base.

The label specifies a polyurethane adhesive had the best performance required and is outlined in the spec. The way the information is currently defined in the spec regarding the label and crest should remain the same for this procurement.

**All other terms and conditions remain the same.**
