Amendment No. 002 is being issued to provide answers to bidders questions received to date concerning the Request for Proposal (RFP) document.

Questions and Answers

- Q1. Do all tests requested in the RFP require accreditation or is additional QA/QC acceptable?
- A1. All tests require accreditation and any additional QA/QC is not acceptable for this requirement. Bidders must refer to the RFP mandatory technical criteria detailed at Part 4 - Evaluation Procedures and Basis of Selection. After award of contract, some analysis of metals may be subcontracted, however, the test results must be provided on an accredited laboratory letterhead.
- Q2. If accreditation is required for all work listed in the scope, is it acceptable to commit to accreditation of a particular test upon award of contract?
- A2. No. Please refer to answer 1 above.
- Q3. When "regulated" metals are listed – can you please confirm which regulation you will be comparing to?
- A3. Regulated metals are compared to O Reg 170; however for this purpose testing is for raw groundwater and limited to Antimony, Arsenic, Barium, Boron, Cadmium, Chromium, Mercury, Selenium, Silica and Uranium.
- Q4. Radionuclides are included for pricing, however the individual analytes are not listed. Can you please confirm which radionuclides are required for this contract for testing and pricing purposes.
- A4. Initial scans using Gross Alpha, Beta and Tritium are required for testing and pricing purposes.

All other terms and conditions remain unchanged.
