Amendment 001 is raised to make the following revisions:

1) In the Technical Specifications (Annex C) the section 14.6 Test Facilities should read as follows:

14.6 Test Facilities -

All ballistic testing must be performed by a testing facility which operates independently and is unaffiliated with any of the potential proponents and is capable of performing ballistic testing on an ongoing basis to the satisfaction of the DFO and is certified by NIJ to conduct such testing to meet NIJ 0101.06 requirements.

2) Correct the measurements specified in the Rated Criteria, paragraph B (Annex B) for the Backface Signature:

Delete:

Offerors submitting Proposals on Ballistic Protective Panels that have a Backface Signature (BFS) less than 0.44mm and are NIJ certified shall receive additional points in accordance with the formula below:

The offer with the lowest millimetre measurement of all offers submitted will receive 100% of the points available, or 10 points, and will be set as the standard against which all other offers are evaluated.

For example: the lowest millimetre measurement of all received offers is 0.30 mm. This offer would receive 10 of 10 points. The next lowest millimetre rating received is 0.38 mm. The points received for this rating are determined as follows:

$$\begin{array}{c}
 0.14 \left\{ \begin{array}{c} 0.06 \left\{ \begin{array}{c|c|c|c} 0.30 & = & 10 \text{ points} \\ 0.38 & = & X \text{ points} \\ 0.44 & = & 0 \text{ points} \end{array} \right\} X \text{ points} \end{array} \right\} 10 \text{ points} \\
 \\
 \frac{0.06}{0.14} = \frac{X \text{ points}}{10 \text{ points}} \\
 \\
 \frac{0.06 \times 10}{0.14} = X \text{ points} \\
 \\
 0.38 \text{ mm} = 4.28 \text{ points}
 \end{array}$$

The offer with a BFS rating of 0.38 mm would score 4.3 points out of a possible 10.

Insert:

Offerors submitting Proposals on Ballistic Protective Panels that have a Backface Signature (BFS) less than 44mm and are NIJ certified shall receive additional points in accordance with the formula below:

The offer with the lowest millimetre measurement of all offers submitted will receive 100% of the points available, or 10 points, and will be set as the standard against which all other offers are evaluated.

For example: the lowest millimetre measurement of all received offers is 30 mm. This offer would receive 10 of 10 points. The next lowest millimetre rating received is 38 mm. The points received for this rating are determined as follows:

14	{	6	{	30	=	10 points	}	Xpoints	}	10 points
				38	=	Xpoints				
				44	=	0 points				
				6		Xpoints				
				14	=	10 points				
				6 x 10	=	Xpoints				
				14						
				38 mm	=	4.28 points				

The offer with a BFS rating of 38 mm would score 4.3 points out of a possible 10.

3) Add the following condition to the Pre-Award Sample and Supporting Documentation in Part 4.

In the event that a component, [other than the main fabric] is not available to the Offeror in a time frame to manufacture the pre-award samples, the Offeror may use a similar substitute component. Also, the Offeror must include a letter explaining the substitution is submitted with the pre-award samples, together with a statement that, should the Offeror be awarded the contract, all materials will be strictly in accordance with the technical requirement.
