This Amendment number 006 is raised to respond to the following Vendor's questions:

QUESTION 1

Please confirm that in keeping with R-2 through R-5, R-6 (which also asks for client particulars), should actually read:

"To be considered, the reference project provided must:

- i. Have been a Java-based application development project;
- ii. Have been completed in the last seven years. If the reference project is not complete, the contract must have been in place for a minimum of twelve months.

not

"To be considered, the reference project provided must be one of the three Corporate Reference Projects provided in response to #M-1." (Which is from R-1).

ANSWER 1:

The RFP is correct as stated. The RFP remains unchanged.

QUESTION 2

Page 94 of the RFP, the responsibilities of the Application/Software Architect does not correspond to the description of this category in TBIPS. The TBIPS description is shown below. It appears that the description for the Programmer/Software Developer was used for the Application/Software Architect category. Please clarify the responsibilities of the Application/Software Architect.

Responsibilities could include but are not limited to:

- Develop technical architectures, frameworks and strategies, either for an organization or for a major application area, to meet the business and application requirements.
- Identify the policies and requirements that drive out a particular solution.
- Analyze and evaluate alternative technology solutions to meet business problems.
- Ensures the integration of all aspects of technology solutions.
- Monitor industry trends to ensure that solutions fit with government and industry directions for technology.
- Analyze functional requirements to identify information, procedures and decision flows.
- Evaluate existing procedures and methods, identify and document database content, structure, and application sub-systems, and develop data dictionary.
- Define and document interfaces of manual to automated operations within application sub-systems, to external systems and between new and existing systems.
- Define input/output sources, including detailed plan for technical design phase, and obtain approval of the system proposal.
- Identify and document system specific standards relating to programming, documentation and testing, covering program libraries, data dictionaries, naming conventions, etc.

ANSWER 2:

At **ANNEX A, STATEMENT OF WORK**, of the RFP, amend as follows:

Delete: 6.1 Application/Software Architect, in its entirety.

Insert: 6.1 Application/Software Architect

- i. Develop technical architectures, frameworks and strategies, either for an organization or for a major application area, to meet the business and application requirements.
- ii. Identify the policies and requirements that drive out a particular solution.
- iii. Analyze and evaluate alternative technology solutions to meet business problems.
- iv. Ensures the integration of all aspects of technology solutions.
- v. Monitor industry trends to ensure that solutions fit with government and industry directions for technology.
- vi. Analyze functional requirements to identify information, procedures and decision flows.
- vii. Evaluate existing procedures and methods, identify and document database content, structure, and application sub-systems, and develop data dictionary.
- viii. Define and document interfaces of manual to automated operations within application sub-systems, to external systems and between new and existing systems.
- ix. Define input/output sources, including detailed plan for technical design phase, and obtain approval of the system proposal.
- x. Identify and document system specific standards relating to programming, documentation and testing, covering program libraries, data dictionaries, naming conventions, etc.

At **APPENDIX D TO ANNEX A, RESOURCE ASSESSMENT CRITERIA**, of the RFP, amend as follows:

1. Application/Software Architect, delete **Experience Levels** in its entirety.

Insert:

EXPERIENCE LEVELS

- Level 2: 5 to 10 years of experience as an Application/Software Architect.
- Level 3: Over 10 years of experience as an Application/Software Architect.

For the purposes of this contract, the roles and responsibilities of an Application/Software Architect are defined as follows:

- Develop technical architectures, frameworks and strategies, either for an organization or for a major application area, to meet the business and application requirements.
- Identify the policies and requirements that drive out a particular solution.
- Analyze and evaluate alternative technology solutions to meet business problems.
- Ensures the integration of all aspects of technology solutions.
- Monitor industry trends to ensure that solutions fit with government and industry directions for technology.
- Analyze functional requirements to identify information, procedures and decision flows.
- Evaluate existing procedures and methods, identify and document database content, structure, and application sub-systems, and develop data dictionary.
- Define and document interfaces of manual to automated operations within application sub-systems, to external systems and between new and existing systems.
- Define input/output sources, including detailed plan for technical design phase, and obtain approval of the system proposal.
- Identify and document system specific standards relating to programming, documentation and testing, covering program libraries, data dictionaries, naming conventions, etc.
