Amendment 002 is raised for the following:

Modification to the specification:

Annex "A", Item 7

The system must have a minimum of 25 GB of usable RAID-1 or RAID-6 disk storage per core for data, using hot-swappable disk drives, upgradeable to 50 GB per core. The vendor should maximize use of internal disk space capacity with SAS drives before reverting to an external storage solution. The vendor must provide two spare disk drives with the system.

Remove reference to "hot-swappable".

Q1: In the RFP, Annex "A", Item 9 states "The system must be able to connect to an HP SDLT 160/320 tape drive" however the connectivity type is not specified. Can DRDC Atlantic provide this information so that we can ensure that the correct connectivity is included with the system?

A1 Must be able to connect to a SCSI 3-LVD SE tape drive connector.

Q2: In the RFP, Annex "A", Item 14 states: "This must include installation of the operating system and ANSYS CFX". We want to confirm that ANSYS CFX will be provided by DRDC Atlantic and providing this software is not a part of this RFP. In addition, assuming ANSYS CFX will be provided by DRDC we cannot assume responsibility for installing this application. We will however, as part of delivery, gladly work with and provided assistance to DRDC's technical personnel in installing ANSYS CFX. We ask that this requirement be modified to read ""This must include installation of the operating system, and assisting DRDC's technical personnel in installing ANSYS CFX".

A2 The system and OS must be able to run the current version of ANSYS CFX at time of delivery. ANSYS CFX software will be supplied by DRDC Atlantic and installed during set-up of the system after delivery.

All other terms and conditions remain the same.
