Solicitation Amendment No 002 is issued for the purpose providing bidders with answers to questions submitted to the Contracting Authority.

**Question 1:**

REF Amendment # 1 Specification Item H-5.7

What oil is to be filtered? The existing oil in reservoir? or is there new oil to be supplied by contractor or owner?

Is the reservoir to be drained and cleaned before the new oil is added? or the existing oil is to filtered to 16/14/11?

**Answer 1:**

It has been suggested that it may not be possible to reach a cleanliness of ISO 16/14/11 by filtering old oil and particularly without cleaning the reservoir, therefore specification item H-5.7 is amended to include the following requirement:

*The reservoir is to be drained and the old oil is to be disposed of in an approved manner. The reservoir is to be cleaned and new oil to be polished by use of a flushing machine prior to being added to the cleaned reservoir. The quantity of oil required is approximately 800 litres of Petro Canada Hydrex MV36 and shall be contractor supplied.*
