Federal Contractors Program for Employment Equity - Certification

Federal Contractors Program for Employment Equity - over \$25,000 and below \$200,000

Organizations that are subject to the Federal Contractors Program for Employment Equity (FCP-EE) but that have been declared ineligible to receive government contracts of goods and services over the threshold for solicitation of bids as set out in the Government Contract Regulations (GCRs) (currently \$25,000, including all applicable taxes) by the Department of Human Resources and Skills Development (HRSD), either as a result of a finding of non-compliance by HRSD, or following their voluntary withdrawal from the FCP-EE for a reason other than a reduction in their workforce, have been advised by HRSD that as a consequence of this action they are no longer eligible to receive any government

contract over this threshold. Consequently, their certificate numbers have been cancelled and their names have been placed on HRSD's List of Ineligible Contractors. Bids from such organizations will be considered non-responsive.

Bidders must ensure that adequate literature/technical brochure(s) are submitted at time of bid closing to support compliance with all mandatory technical criteria.

1.0 The system must be able to generate reads (tags) with lengths up to 200 base pairs (bps).

Page Reference in documentation supplied _____

1.1 The vendor must provide kits that will enable the system to generate 400 bps or longer reads within 12 months of contract making.

Page Reference in documentation supplied _____

1.2 A complete run on the sequencing instrument must not take longer than four (4) hours when sequencing 200bp read lengths.

Page Reference in documentation supplied _____

1.3 The system must produce 80 million mapped reads of 200bp read length in a single run in four (4) hours or less.

Page Reference in documentation supplied _____

1.4 The instrument must generate high-fidelity base calls with a consensus system accuracy >99.99% and raw accuracy >99.5%.

Page Reference in documentation supplied _____

1.5 The vendor shall also demonstrate that within 12 months of contract making, without major upgrades, the instrument will be able to quadruple its tag throughput. The increase in capacity must be accomplished through consumables upgrades.

Page Reference in documentation supplied _____

1.6 The vendor must provide kits that enable the client to perform whole transcriptome sequencing with ribonucleic acid (RNA) equal to 100 ng while maintaining strandedness information and able to carry out multiplex sequencing.
