### Questions and Answers

Q1 - Annex A - Other than the 6 vertical 1x1x 58" long tubes shown on drawing Annex C, are the 1x1 tubes also used to support the ~36" width of the 4 main shelves? If so, how many of these are required per shelf section. (The 6 lengths of 24 ft seems like too much material since the rest of the frame sections can be made from 120 ft of 1.5 SQR tubing.)

A1 - Please see Revision 1 - Annex A, Requirement.

Q2 - Annex C - There is a vertical sheet metal baffle between the shelves. How far from the end is it located?

A2 - Please see Revision 1 - Annex A, Requirement.

Q3 - There was an amendment to change the number of hinge lengths from 5 to 4. Isn't there really only 2 - 72" lengths required (one per door)?

A3 - Please see Revision 1 - Annex A, Requirement.

Q4 - What are the general tolerances required for this project? Are there any critical dimensions which must be held? (i.e. like the distance between the shelves)?

A4 - Please see Revision 1 - Annex A, Requirement.

Q5 - Annex A - What is the purpose of the 1 x 36" 1x1 steel angle .125" thk?

A5 - It supports the divider.
