This amendment is raised to answer a question from a potential bidder and change the closing date.

CLOSING DATE :

DELETE: February 20, 2013

INSERT : April 2, 2013

Q17. In table 1 where the Height is specified, it mentions that the boot height must be 8 inches +/- 0.5 inches in height as measured on the outside of the boot from the bottom of the heel (on a level surface) to the top of the collar on a pair of Mondopoint 265/104 boots.

Is the height measured at the highest point of the collar in this case? The reason we ask is that in certain designs you can have a sloped collar or even an opening at the back (heel) of the collar to allow for better movement. So the collar is not always running parallel with the surface.

A17. The height must be taken at the highest point of the collar. This decision results in the revision of the following:

- Annex B, Table I (Height (paragraph 2.4)): Delete the test method details and substitute the following: "As measured on the outside of the boot from the bottom of the heel (on a level surface) to the highest point of the collar on a pair of Mondopoint 265/104 boots.

All other Terms and Conditions remain the same.
