Bidders' Questions-01

Question-1

According to our information, the Request for Proposal contains two contradicting technical requirements that could not be satisfied at the same time: a) "The Pixel Count shall be at least 640x480 minimum"; b) "Have a Frame Refresh rate of at least 50 Hz" .

Because of certain technical restrictions, all major manufacturers of thermal sensors offer 640x480 units with 30 Hz only. 50 or 60 Hz are available for lower resolution cores only.

Taking into account the fact that 640x480 pixel cores are not manufactured with 50 Hz refresh rate, would it be possible to offer 30 Hz refresh rate for this requirement?

Answer-1

Yes, 30 Hz refresh rate is acceptable.

Question-2

Would DND accept an F# of 1.17 instead of 1.05 as specified in Annex B Serial 3.7 given that the system we are proposing satisfies all other requirements and exceeds serial 3.6 detection of a man-sized target at 400m?

Answer-2

No, the requirement is for an F# no greater than 1.05
