Amendment Number 002 is being issued to make changes to the Statement of Work (SOW) and to provide answers to bidders questions received to date.

AT ANNEX A, STATEMENT OF WORK

At Section 3.1.3.2.2 Contractor Field Representative (CFR)

Delete in its entirety.

Replace with:

3.1.3.2.2 Contractor Field Representative (CFR). The Contractor will provide the Client with one (1) CFR for every CIBs supported training scenario. The CFR will coordinate with the Clients training scenario POC to ensure that the Contractors activities are synchronized with the exercise scenario Master Events List. The CFR must be equipped with a mobile device capable of sending and receiving phone calls and e-mail messages from the client POC during the Exercise.

QUESTIONS AND ANSWERS RECEIVED TO DATE

Q1. Please confirm whether or not the number of training scenarios and CIBS will remain constant throughout a training exercise?

A1. The number of training scenarios will remain constant throughout a training exercise. A training scenario may include multiple training activities.

Training activities may be added, removed, or repeated during the exercise depending on the performance of the training audience and whether or not they are meeting their training objectives. There is a daily coordination meeting to discuss activities over the next 24, 48, and 72 hrs, and any changes to the plan are discussed at that time. Significant changes are always carefully considered based on personnel availability and time constraints, and the CIB representative at the COEFOR table gets to weigh in and say what can be provided.

The Contractor could be requested to increase the number of CIBS in support of an exercise by up to 50% for a period not less than one (1) full day. If a surge in the number of CIBS is required, the Contractor will be advised no later than 60 days prior to the exercise.

Q2. Please clarify if cleaning costs for barrack accommodation and work space will be a contractor or client expense?

A2. The Contractor is responsible for the space allotted to them upon clear-in, during their stay, and upon clear-out. The space has to be cleaned before they leave. The Contractor has options where they can clean it themselves, bring a cleaner with them, or hire a local subcontractor to clean up during and after their stay. This includes accommodations and work spaces.

Q3. Please define standard military accommodations? Are male and female accommodations separate?

A3. Typically, you can expect an indoor, heated shelter, with access to washrooms with running water. Rooms can have from 8 to 100 people in them depending on the style/age of the building, as more modern buildings have 8-16 people in them, and the older H-hut style buildings are not

separated into rooms at all and everyone sleeps in the same area. Males and females are normally separated in garrison, and will have access to separate washrooms.

At CFB Wainwright, the troop barrack space for the CIBS and the Contractor work space are all on the 2nd floor of building 599. The floor is divided by a central common stairwell creating a one half floor for male and one half floor for female occupants. The rooms are private while the washrooms are gender specific communal. The work offices are integrated into that area as well as TV lounge areas.

- Q4. What is the CF plan if the accommodation requirement exceeds base capacity?
- A4. The number of CIBS required during an exercise will not exceed CFB Wainwright's base capacity for accommodation.
- Q5. Will there be defined minimum or maximum numbers of CAS-SIM effects in a session?
- A5. Major CAS-SIM events are planned in advance during the Exercise Design Working Group. There are also typically small injects requests that do not require a lot of time or manpower to pull off (gun shot wounds to add realism during a firefight, etc). As part of the Battle Task Standards, there must be at least one mass casualty scenario for the training audience to deal with. If not executed properly it will be attempted again.
- Q6. Will there be a defined minimum or maximum number of days CAS-SIM effects will be required in a session?
- A6. To be decided at the Exercise Design Working Group for all major CAS-SIM events. One major mass casualty event will be planned for the scenario, with many smaller CAS-SIM events requiring moulage, up to three per day is typically the maximum, with the norm being one a day.
- Q7. Will there be a defined minimum or maximum number of CAS-SIM scenarios in a day?
- A7. Be prepared to support a minimum of one CAS-SIM minor event per day. No maximum is typically set per day or per scenario.
- Q8. Will quarters and work areas have internet provided by the CF?
- A8. Internet is not available through CMTC or DND.
- Q9. If internet is not provided by the CF, is there base contract that the contractor can use to secure internet?
- A9. All wired and wireless communications devices of ANY KIND need to be approved by CMTC G6 for use and/or installation. THIS IS NON-NEGOTIABLE.

The Contractor can attempt to set up internet service or a network if they so choose but, no wires, no dishes. You can, however, through the local TELUS Commercial Division, access LIMITED internet services that have the infrastructure installed in a LIMITED number of locations. This

may allow internet in the some of the office spaces and a very limited number of accommodation room spaces.

Any services or devices obtained by the supplier are the responsibility of the contractor including anything that the provider supplies. All invoices for these services are to be sent direct to the Contractor. There would be no DND support on any of this installation or use and it still needs to be approved by the CMTC G6 at least 30 days prior to connection and 30 days prior to the Exercise.

Q10. If internet is CF provided, what bandwidth is available for the contractors use?

A10. None is provided.

Q11. What are the ration rates through the CFB Wainwright kitchen, for contractor personnel working on base Wainwright?

A11. DND rates for meals served in the Wainwright Base Kitchen are currently as follows:

Breakfast - \$5.75

Lunch - \$11.50

Dinner - \$11.50

Rates are subject to change.

Q12. Will the CF provide any form of overnight security within the barracks where the role players will be housed?

A12. There is no commissionaire or security on duty overnight as well as no military duty staff during the day in the CIBS areas. All rooms can be locked and keys will be provided upon clearing in, and returned upon clearing out. The responsibility for CIBS equipment, both group and personal, falls to the Contractor and the CIBS.

The Contractor can hire their own security for their space if they so desire, at their own expense. The Base does have a Military Police Station that is manned and the base is patrolled 24/7.

All other terms and conditions remain unchanged.
