Amendment 003 is raised to incorporate the following changes and answer the question below:

The following is to replace references in the specifications, drawings, and elsewhere in the tender documents, regarding the disposal of the concrete: Concrete waste to be disposed of off-site at approved disposal facility; or buried on-site, on land owned by AAFC, in area designated by the Departmental Representative at time of disposal (protruding rebar to be trimmed flush). The on-site disposal location will be within a 30 meter radius from the Bridge No. 2 location.

Addition of the following clause into Section 01 35 43:

Section 01 35 43, Clause 1.9.23: Contractor must install adequate sediment erosion control devices where necessary between Bridge No.1 and Bridge No. 2 to avoid sedimentation in the stream. To avoid rutting and damage to low-lying sections of the ravine trail between Bridge No. 1 and Bridge No. 2, temporary matting to be installed where necessary, and as directed by the Departmental Representative. If ravine trail is flooded (covered by water) it is considered part of the stream and no equipment can traverse the road until water recedes.

Question 1: We would like to view the site relating to the Kentville ravine bridge #2 removal project. Please provide a site contact name so we may access it.

Answer to Question 1: Bridge No.2 is located on the Agriculture and Agri-Food Canada (AAFC) Ravine Trail which is open to public access
