**Question:**

**Part A:** Both the Intermediate Data Architect and the Intermediate SAP Interface (PI) Specialist have a requirement for the resource to be SAP ABAP 2000 Certified. Can the Crown please confirm that SAP NetWeaver (Ver. 6.20) certification is acceptable as a substitute as this is a more recent SAP ABAP certification and covers the same material (and more) as the ABAP 2000 certification which is related to ver. 4.7?

**Answer:**

SAP NetWeaver (Ver. 6.20) certification is not acceptable as a substitute.

SAP ABAP Certification is the requirement. ABAP is the language while NetWeaver is the environment for SAP applications.

ABAP (Advanced Business Application Programming, originally Allgemeiner Berichts-Aufbereitungs-Prozessor = general report creation processor) is a high level programming language created by the German software company SAP. It is currently positioned, alongside the more recently introduced Java, as the language for programming SAP's Web Application Server, part of its NetWeaver platform for building business applications. SAP NetWeaver is SAP's integrated technology platform and is the technical foundation for all SAP applications since the SAP Business Suite. SAP NetWeaver is marketed as a service-oriented application and integration platform. SAP NetWeaver provides the development and runtime environment for SAP applications and can be used for custom development and integration with other applications and systems. SAP NetWeaver is built using open standards and industry de facto standards and can be extended with, and interoperate with, technologies such as Microsoft .NET, Sun Java EE, and IBM WebSphere.

**Part B:** R1 for the Intermediate BASIS Software consultant states that the resource should have a university degree (2 points) or a college diploma (1 point) in computer engineering or computer science. Would experience in excess of 10 years with BASIS PLUS a college diploma be acceptable to score the full 2 points?

**Answer:**

Experience is already accounted for in M1.
