THIS AMENDMENT **001** IS RAISED TO POST QUESTIONS AND ANSWERS ON THE REFERENCED SOLICITATION:

Question #1:

The specifications for the above noted tender requests a steer axle tire size of 385/65R22.5 tire (16 ply). This size of tire is rated only to handle 19,840 lbs at max pressure of 130 psi, this poses an issue for the requested minimum GAWR of 20,000 lbs minimum. In order to maintain the 20k GAWR minimum rating, the vehicle would have to be equipped with 425/65R22.5 (18 ply) tire at a minimum pressure of 105 psi have a capacity of 20,400 lbs.

Answer:

Front axle true working load is under 15000 lbs.

Question #2:

In Part 3, Technical Specifications, Section 3.1 it states that the vehicle must be a Conventional or Cab Over Engine type Cab, without a sleeper unit with min 18" cab extension, however, the pictures supplied with the solicitation mostly have sleepers. What will the extension be used for (storage, tools, bunk, etc.) and is there a pass through required from the cab to the extension? Perhaps more pictures can be provided.

Answer:

Will be used for storage of personal items clothing. A pass through would be nice but not a must.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
