Appendices: Required content for reports, and templates

Client has challenged himself to become more socially active and take on unpaid work activities. He occasionally uses Clonazepam .5 mg as needed for anxiety. The client is asking for assistance with his job search. He feels he has transferable work skills and has been getting interviews but no success in getting a job.

Client's doctor is supporting the client to return to work on a near/full time basis with a recommendation to avoid jobs where interpersonal confrontation is the norm.

**Note:** Client had requested assistance from CPP voc rehab a few years ago. At that time, the case manager determined that client was not ready for voc rehab due to his medical situation. However, suggestions were made regarding engaging in pre-vocational activity which the client has followed through on over the past year.
