

FRONTENAC INSTITUTION NEW 50 BED LIVING UNITS
PWGSC Project R.045083.001

QUESTIONS AND RESPONSES:

Question 64a - It appears to many contractors that there will be more than 400m of steel piles needed on this project in comparison to only 200m in the unit price section of the tender form and they are surprised that there is such a huge difference in quantity.

Response 64a - See Amendment 009 (Use new UNIT PRICE table).

Question 64b - Also, there are 2 different types of piles with a considerable difference in weight per metre. Some generals will price the lighter piles at the lower rate per m to reduce their overall tender price and gain advantage. They will then fight it out with you later for a higher price on the heavier piles. So, which pile size should be priced on the tender form.

Response 64b - See Amendment 009 (Use new UNIT PRICE table).

Question 65 - Our subs have asked the following questions.

A/ Section 07 62 00 item 2.9.1 it makes reference to Ice Guards

B/ Section 08 80 50 item 2.1.11 makes reference to Decorative Glazing Film

**C/ Division 12 Section 12 21 17 & 12 22 00 make reference to Vertical Louvre Blinds and Draperies
However none of these are shown on the drawings.**

**D/ A upright freezer is shown in Laundry rooms of Residence Pods on drawings, but is not indicated in 11 31 00 Item 2.1 Products
Is this by others. Please advise on these items?**

Response 65 - A/ Include Ice Guards at all locations above flat roof;

B/ Omit decorative film;

C/ Omit vertical louvre blinds and draperies; and

D/ Omit upright freezer.
