Solicitation Amendment

Title Liquid Chromatography System

Solicitation Amendment No. 001

This solicitation is hereby amended to provide the following questions and answers:

Q1. Item 5 of the mandatory specifications: "Sample pack of columns/cartridges, to cover a loading of 1-20g of materials". Would there be any preference with regards to the kind and volume of media required (ion exchange, gel filtration, size exclusion) - could it be more specific? Maybe you have references on what is currently used and should be included in that package?

A1. Regular phase Silica gel is the planned media to be used with this system, in order to stream line and automate the manual flash chromatography performed on synthetic materials and/or the isolation of natural products of natural extracts. However, in the future, reverse phase may be considered for other applications.

Q2. Item 7 of the mandatory specifications: "UV-Vis or Refractive index (Ri) detector for monitoring chromatography". What specific wavelengths should be covered by the detector?

A2. Since we will be purifying various organic materials, as much as the whole ultraviolet and visible range of the electromagnetic spectrum is desired but if actual numbers are required then I'll say 200-780nm. Also, some synthetics we deal with have no chromophores so a Ri detector would solve that problem however, the instrument manufacturers seem to be discontinuing this technology, an odd concept given its versatility.

If your bid has already been forwarded and you wish to revise same, this revision should be sent either in a sealed envelope and mailed to the above address or by facsimile (506) 851-6759 and reach the undersigned before the appropriate closing date. The solicitation number and the closing date are to be shown on the outside of the sealed envelope or on the facsimile transmission.

All other terms and conditions of the solicitation document remain unchanged remain unchanged.

All enquiries concerning this amendment are to be forwarded to:
