This Solicitation Amendment #001 is raised to answer Bidders Questions.

Question #1:

Would full aluminum frame be acceptable rather than all steel rustproof frame? Using all aluminum frame you do not have to bolt frames together so it is much stronger and there is no issue of dissimilar metals.

Answer:

During preliminary discussions about the building of this trailer it was determined by an engineer that aluminum would not provide the same strength as steel. Therefore the frame will remain as steel and rubber isolation mounts will be required.

Question #2:

The frame requests: "all-steel rustproof frame S4@3.64 cross member..."

Would an all aluminum frame and body be accepted provided the engineering of the frame had the same structural integrity?

Body construction:

-Requests .049" thick panels... Would .050 be accepted

-Requests J-type post.... Would 2"x2"x1/8" square tubing be accepted

-If all aluminum construction is accepted would 2"x4"x1/4" extruded aluminum channels 16" on centre be accepted for the floor structure

Answer:

During preliminary discussions about the building of this trailer it was determined by an engineer that aluminum would not provide the same strength as steel. Therefore the frame will remain as steel and rubber isolation mounts will be required. (Same response as to question #1)

.050 panels exceed the requirement of the specification, therefore this is acceptable.

The end user of the unit requests that "J" type posts be used due to concern that square tubing will cause problems with adequate insulation.

The aluminum frame will not be accepted.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
