TITLE : DEVELOPMENT OF A JOINT INTELLIGENCE AND INFORMATION S&T CAPABILITY AMENDMENT 012

Included in the present amendment :

- Question(s) and answer(s) 51

Question 51 :

Based on RFP, criterion 4.c :

"The Bidder should propose a project management methodology suitable to a task authorisation contract, and based on rigorous processes and recognized standards. The Bidder should describe any tailoring considered advisable in order to **manage large, medium and small-scale tasks: small (less than 100k\$), medium (between 100k\$ and 350k\$) and large tasks (more than 350k\$)**. The Bidder should clearly describe the structure with the role and responsibilities of each partner and/or sub-contractor to meet the expertise requirements for each domain or focus area. The Bidder should identify a single point of contact as being responsible for the overall management of the project. The Bidder should outline the use of software Project Management Tools for planning and schedule tracking.

Notes: The Bidder should describe each project submitted in accordance with the information requested in Table 4 - Project Description Template. More precisely, the Bidder must submit the information in the format presented in Table 4 and provide all of the information that is requested in Table 4. The Bidder who demonstrates that the proposed methodology has been successfully applied in **similar projects in terms of size (monetary value between 100k\$ and 350k\$)** and complexity (R&D,S&T, multidisciplinary) will be evaluated with a higher score. Any project not described in accordance with Table 4 - Project Description Template - will not be considered by Evaluation Board members.

10 – Strong. No apparent weaknesses in the proposed project management methodology. The Bidder provides considerable detail in the description of the methodology, and demonstrates a thorough understanding of how the proposed methodology will be used to execute task authorisation contract. The Bidder illustrates how the methodology will be applied for contract management and provides suitable templates for the important reports. The Bidder demonstrates that the proposed approach has been successfully applied to at least for three (3) projects of similar size and complexity with software tools used for Project Management. The Bidder demonstrates a tailored management approach to deal with all kind of tasks when a DND 626 – Task Authorisation is raised. The Bidder illustrates very well how he proposes to deal with the size of tasks in the future.

The Bidder provides a description of the structure with the role and responsibilities of each partner and/or sub-contractor to meet the expertise requirements for each domain or focus area.

[...]"

QUESTION: Based on the paragraphs above, the 100k\$ - 350k\$ values seems to apply to "tasks" within a project, while in the notes above, the same values seems to be applied to "projects"! So, do you mean that the values (100k\$ -350k\$) apply to tasks within a project?

CCC No./N° CCC - FMS No/ N° VME

-
- small scale task: less than 100k\$,
 - medium scale task: between 100k\$ and 350k\$
 - large scale task: more than 350k\$

You also probably also mean that a large "task" could be considered a "project" in some cases, is this correct?

Answer : In the context of this task authorization contract, each task authorisation (TA) is identified as a project.

***** All the other clauses and conditions remain unchanged *****
