Questions from suppliers and answers from Canada.**Question #1**

Regarding # 3.1.9 - Is there a particular reason why you want 3 Axles? I would like to recommend suspension with 22.5" oil bath axles (Tandem Dual), these axles would be far superior and have been the industry standard for over 10 years as well, tires and parts are readily available.

Answer #1: - Tandem Dual would be acceptable.

Question #2

3.1.12 - A spare tire is available but would have to be mounted on the front deck above the fifth wheel as there would not be sufficient room under the rear deck due to road clearances. Is that acceptable.

Answer #2 - If there is sufficient room under the rear deck the spare tire may be mounted there.

Question #3

3.8 Delivery time would be 14-18 weeks from time of order being placed. Unfortunately in last couple of months the manufacturer has been working to capacity and they have been forced to extend their normal delivery time. Will a longer delivery be acceptable.

Answer #3 - Delivery is mandatory prior to 31 March 2013

Question #4

Could you please elaborate on "standard sized pick-up trucks", as this is being used for DND, would you be able to confirm standard implying the SMP MILCOT, which I believe is a quad cab chevy silverado HD 2500, or by standard do you mean the 2wd, 2door, half ton. Our concern is that the standard height between 2WD and 4WD tends to be different, in addition to the length of box. Lastly, we understand certain organizations within DND solely use the F350 1 ton, as these trucks are much greater in length, and height than the half ton and therefore, the bottom deck would need to accommodate. Any insight would be greatly appreciated.

Answer- #4

Trailer must be able to carry 3/4 tonne, crew cab, 4WD type pick up trucks.
