Amendment No. 004

This Amendment No. 004 has been raised to answer questions from industry, as per the following:

Question 008:

As per 6.1(d) (ii)- Security Requirements,

"The Bidder's proposed individuals requiring access to classified or protected information, assets or sensitive work site(s) must each hold a valid reliability status, granted and approved by CISD/PWGSC."

Our current workplan does not require our partner to have access to protected information or sensitive work sites. Our subcontractor's work will be limited to requirements workshops that do not require access to classified information or sites. We would like to receive confirmation that our partner will not be required to enter sensitive sites to do its work or, if our partner does need to enter sensitive sites to do work, that a CSC escort will be sufficient to satisfy the security requirement as per the Security Requirements Check List (SRCL), which seems to indicate that this measure would be appropriate.

Answer 008:

As per paragraph 7.5 (d) of the bid solicitation, "Subcontracts which contain security requirements are NOT to be awarded without the prior written permission of CISD/PWGSC." If your company has been awarded the contract and you would like to subcontract a portion of the work, then you could request the Initiation of a Security Clearance for the subcontractor. It should be noted that the SRCL in Annex B and the security clause in section 7.5 of the Bid Solicitation are for the Contractor. Any subcontractors utilized would then get their SRCL and associated security clauses based on the nature of work subcontracted.

CSC does not foresee any supplier resource(s) requiring access to protected information and/or sensitive work sites during the planning, design, adaptation/ configuration, testing data migration and training phases of the project.

SWAT request(s), which will only occur once the system is in the CSC production environment, may require access to both protected information and/or sensitive work sites.

If the subcontractor's resources are not going to be providing SWAT services, the subcontractor and its resources will not require security clearances.

If the subcontractor's resources will be providing SWAT services, the subcontractor and its resources will require security clearances.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
