Title: vWorld Capability Development Support for DRDC, Dartmouth, Nova Scotia

This amendment is raised to provide questions and answers as follows:

Q. Do you currently have servers setup with Opensim?

A. No

Q. Do you have a project plan or required dates for launch or changes?

A. Yes there is an initial project plan, but since it is linked to a number of other initiatives and dependent upon initial investigation/training dates and elements are still soft. The research project must be completed by 31 Mar 2014.

Q. Does any of your staff have experience at Opensim?

A. No, hence requirement in contract for training. Staff have lots of experience working with other serious games such as VBS-2, Dangerous waters, HLA distributed simulation etc. We also have experience with servers, but not with OpenSim servers.

Q. Do you need training in Opensim for your staff?

A. That is one of the requirements of the contract.

Q. Do you have outlines or content material for the development of the simulations available for review?

A. Not until contract is let,

Q. Will you be supplying servers for this effort?

A. Yes since servers must be internal to the network, we can not work with external servers.

Q. Do you have any requirements regarding authentication?

A. That may be part of issue of getting accreditation on the internal DND network.

Q. Do you need technical support? If so, how much time do you want to allocate for this effort?

A. We will require technical advice, how to set up servers etc. We will not be allowed to let third party personnel maintain software on the internal network from outside once installed.

Note: Bidding on this Contract does not exclude the bidder from bidding on any future contracts.

All other terms and conditions remain unchanged.
