This solicitation amendment is raised to provide the question and answer set #2:

Question and Answer set 2

Question 3:

1. For our last proposal we had asked if it was possible to survey the door prior to proposal. I believe one vessel is located in Comox, are we able to visit?

Answer 3:

1. The Department of National Defence and PWGSC has determined that there are foreground and background Intellectual Property rights involved with this requirement. Therefore, Canada cannot allow the examination of the current door.

2. Without the original technical specification and testing procedure a potential supplier cannot complete the certification process for an equivalent product, including but not limited to: production of a blueprint for preliminary DND technical approval (phase I, engineering approval), production of a prototype door for non-destructive and destructive testing (phase II) and presentation of a production sample door for final approval (phase III). After all potential bidders received technical approval, PWGSC would then conduct the financial evaluation in order to identify the winning bid.

3. The entire approval process for the certification of an equivalent product could take as long as one year and the cost to a potential bidder could be in excess of \$100,000.00 (please note that this is not an exhaustive estimate and does not include all potential cost for a potential bidder).

4. Canada cannot consider an equivalent product and meet the critical delivery date of March 18, 2013.
