This solicitation amendment is raised to:

- i. address any new questions received; and
- ii. incorporate applicable amendments into the solicitation document.

## Questions and Answers

### Q224.

Amendment 004 Clarifications (p.2/42) says

After further evaluation of the points allocated for achieving various levels of Canadian Content, Canada has decided that awarding points for Canadian Content ... does not provide any significant value to Canada. ... The appropriate sections of the solicitation are amended in the amendments to the solicitation in this solicitation amendment.

Please confirm that the amendments should have included deletion of Canadian Content Evaluation Criteria on RFP p.40/76.

### A224.

Yes, the deletion of Canadian Content Evaluation Criteria on page 40 of 76 in the RFP should have been included in a solicitation amendment. The appropriate section of the solicitation is amended in the Amendments to the Solicitation section in this solicitation amendment.

### Q225.

Upon review of the STS v2.2, we have noted that statement GR 29 appears to be more of an information statement as opposed to a requirement. Can the following statement be clarified? "The Data Presentation component provide an interface to various "Effectors" (interfaces to technologies that effectuate COAs)."

### A225.

GR 29 from the STS table v2.2 should read as follows:

" The Data Presentation component SHOULD provide an interface to various "Effectors" (interfaces to technologies that effectuate COAs) "

An updated STS spreadsheet has been posted to the project sharepoint site. The STS spreadsheet is now at V2.3, dated May 23, 2013.

### Q226.

RE: Question and Answer 220

The provision of a single blade server for ARMOUR in the CyberOps lab (question 220) and the statement from section 1.13 of Appendix A for the SoW: "Dependent vendor software that is not

---

part of the ARMOUR TD project development (e.g., COTS products integrated into the ARMOUR TD project solution) will be included as executable code only and contained in the VM image" indicates that the envisioned deployed architecture for ARMOUR is as a single VM (i.e. "the VM image"). Can DRDC confirm that the turnkey ARMOUR solution is meant to be a single VM?

**A226.**

The turnkey ARMOUR solution is required to be delivered as a virtual machine solution as specified by the RFP. This does not need to be a single VM system, but could span multiple systems, VM's or image files to deliver the complete solution. This architectural decision is left to the bidder to decide.

**Q227.**

Expectations for the ARMOUR project are leading to significant risk to both the Contractor and Canada.

These risks include the cost for labs on the bidders site; as well as the need to provision and support to 2 different environments for Canada and lastly lack of access DRENET until there is a demonstration planned date.

This then imposes bidders' assumptions about the target environment; including, estimates about the simulation of source data/effectors and behaviour that will be encountered in that environment; non available architecture and configuration details and simulation of the source data and effector behavior.

Given that integration is a complex yet critical step in the maturing of the solution and is essential for the success of the demonstrations, will DRDC reconsider allowing access to a production environment earlier in the project schedule? Meeting this need is deemed to be essential for risk management for the contractor and a critical success factor for DRDC. As well, permitting industry to leverage existing labs at DRDC would further reduce risk for all.

**A227.**

The ARMOUR project team has currently been granted use of the DREnet for the 3 demonstrations for the project as outlined in the RFP. Changes to the access to the DREnet are possible over the almost 4 year duration of the project, but these changes (if any occur) and what changes are needed to this access cannot be predicted at this time and are outside the control of the ARMOUR project team.

Provisioning and licenses for two labs was answered in **Q131** in Solicitation Amendment 005.

---

DRDC has permitted access to the labs and existing equipment on-site - please refer to **Q221** and **Q222** in Solicitation Amendment 006. Access to non-DRDC labs on-site was addressed in **Q220** in Solicitation Amendment 005.

Bidders have not been provided with details regarding the architecture and configuration of the DREnet in the bid process, as these items are Controlled Goods. The successful bidder will have access to this type of information prior to any demonstrations performed on the DREnet.

## Amendments to the Solicitation

- 1) **Reference:** Attachment 4, Mandatory and Point Rated Criteria, Point Rated Evaluation Criteria on pages 39 and 40 of 76 of the solicitation  
**Delete:** the Point Rated Evaluation Criteria Summary Table in its entirety; and  
**Insert:** the following Point Rated Evaluation Criteria Summary Table to replace the above deletion:

Evaluation Criteria	Points	Min
<b>Technical, Management and Corporate Experience Evaluation Criteria</b>	<b>130</b>	<b>90</b>
1.0 Architectural Design (Draft Architectural Design Document)	<b>60</b>	<b>40</b>
1.1 Understanding of the vision, objectives and scope	<b>10</b>	<b>6</b>
1.2 Adequacy of the technical solution	<b>50</b>	<b>32</b>
a) How solution meets capability requirements stated in System Technical Specification	20	14
b) How solution meets performance requirements stated in System Technical Specification	3	0
c) How solution aligns with open standards	4	0
d) How solution aligns with identified security standards	4	0
e) Ability to meet technology challenges	10	5
f) Level of COTS incorporated into the proposed solution	5	0
g) Level of risk associated with technical aspects of the solution	4	0
2.0 Management Proposal	<b>40</b>	<b>30</b>
2.1 Project Management Plan	<b>18</b>	<b>12</b>
a) Development Approach and Risk Mitigation	5	0
b) Work plan and schedule	6	0
c) Quality Management System	4	0
d) Resource Allocation and Control	3	0
2.2 Personnel	<b>22</b>	<b>16</b>
2.2.1 Project Manager	<b>7</b>	<b>4</b>
a) Experience	3	0
b) Education and Credentials	2	0
c) Technical Expertise	2	0
2.2.2 Key Technical Personnel	<b>15</b>	<b>10</b>
a) Relevant IT Security experience	3	0
b) Education and Credentials	2	0
c) Computer Network Defence Experience	4	0
d) Experience developing open architectures and using relevant technology standards	3	0
e) Experience using relevant security standards	3	0
3.0 Corporate Experience	<b>30</b>	<b>8</b>
