Amendment 002

Amendment 002 is raised to update the location of the Bidder Conference on May 2, 2013 and to answer Bidder questions.

1) Update to Bidder Conference location:

In the RFP under Part 2, delete Section 6. Bidders' Conference its entirety and replace with:

6. Bidders' Conference

A bidders' conference is scheduled for:

Date: May 2, 2013
Time: 9:00am
Location: Oberon Conference Room
2648 Lorne Terrace
Juno Tower, CFB Halifax
Halifax, NS
B3K 5X5
Canada

The scope of the requirement outlined in the bid solicitation will be reviewed during the conference and questions will be answered. It is recommended that bidders who intend to submit a bid attend or send a representative.

Bidders are requested to communicate with the Contracting Authority before the conference to confirm attendance. Bidders should provide, in writing, to the Contracting Authority, the names of the person(s) who will be attending and a list of issues they wish to table at least 5 working days before the scheduled conference.

Any clarifications or changes to the bid solicitation resulting from the bidders' conference will be included as an amendment to the bid solicitation. Bidders who do not attend will not be precluded from submitting a bid.

2) Responses to Bidder questions:

Question #1:

Appendix 1 to Annex A, Paragraph A1.1.6.1 requires conformance to C-03-010-000/MM-001. This is an extensive specification, however it does not state if there is any testing required for emissions, susceptibility, radiated and conducted limits nor the criteria of acceptance for testing.

What is this purpose of this reference and what is required?

Answer #1:

Agreed that C-03-010-000/MM-001 is an extensive specification. It was decided to reference the entire spec rather than specific sections/paras because there were far too many relevant sections to cite individually.

CCC No./N° CCC - FMS No/ N° VME

The purpose of the statement in Annex A, Appendix 1, Para A1.1.6.1 is to ensure that bidders take the necessary measures for Electromagnetic Compatibility of the proposed equipment with our ships. Electromagnetic Interference should be controlled using techniques such as bonding, grounding and shielding.

The proposed equipment may be Commercial Off-The-Shelf (COTS), but must state what standard it is built to and must be tested in accordance with C-03-010-000/MM-001 Part 6 for MIL-SPEC Equipment. Table 6.1 specifies the tests and parameters of acceptance for EMI (for conducted, radiated, susceptibility, emissions). Results of the testing must be provided before acceptance.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
