### Amendment 001

Amendment 001 is raised to provide answers to questions.

#### Bidder questions/answers relating to the SoW:

**Q1** At 2.3 Hours of Work - Will there be someone there during the late hours?

**A1** Yes - Either ECM or SNC Lavalin representative will be on site.

**Q2** At **3 System Performance Description** - In order to get a better idea of how much cable will be required, can the bidders get more precise distances regarding the projectors/screen?

**A2** Distances between the floor to the projectors and between the projectors to the screen as well as the exact length of cables required to complete the installation cannot be provided, as the exact position of the projectors/screen will depend of the type proposed/accepted and the exact installation/mounting position. **SACC Manual Clause B5007C Procedures for Design Change or Additional Work** allows for design changes or additional work if required.

**Q3** At **3.2 BARCO RLM-W12 Projector (Or equivalent)** - The SoW states that the equivalent projector must have dual link DVI - Is it necessary?

**A3** ECM requires a state of the art system with dual link DVI at a minimum.

**Q4** At **3.2 BARCO RLM-W12 Projector (Or equivalent)** - Why are I/O cards not allowed; this seems to lead into one brand of projectors?

**A4** I/O cards add more processing to the signal; ECM wants as less processing as possible so no I/O cards.

#### Bidder questions/answers of a general nature:

**Q5** Will the contractor be allowed to bring a lift?

**A5** Only a 1-man lift is allowed due the computer flooring installed in the room. The contractor will need to provide the make and model of the 1-man lift to ECM for approval in order to comply with the weight capacity of the floor.

**Q6** Is there a timeline to do this project?

- 
- A6** The contractor must provide ECM with how long they need the room for completion of the work and ECM will book it for you for continuous work.
- Q7** Who will tell the contractor the ratio safety standard for mounting a projector on the ceiling?
- A7** SNC Lavalin will provide the contractor (Through ECM) their safety standard after contract award.
- Q8** How will the contractor coordinate shipping/delivery/receipt of the Projection Screen?
- A8** ECM cannot accept any shipment directly from your supplier. The contractor will have to coordinate everything with ECM for shipping/delivery/receipt. Due to its size, the loading dock cannot be used to receive the projection screen. The contractor will have to use the front doors and it will have to be around 6 PM after regular hours of work.
- Q9** Is there a network switch?
- A9** Yes - It's installed in the ECM AV rack.
- Q10** Who will install the conduit and provide CAD drawings for this project?
- A10** There will be a SNC Lavalin project manager for this project who will install the conduit and supply ECM with the required CAD drawings. PWGSC will attempt to provide the bidders with CAD drawings before the bid closing date. If unavailable before the bid closing date, CAD drawings will be provided to the contractor prior to commencement of the work.
- Q11** Is there any documentation for the existing ECM AV system or maybe an end point?
- A11** No - ECM will provide documentation on where to patch to the contractor after contract award.

All other terms and conditions remain the same.
