Amendment No. 004

This amendment is being issued to provide responses to requests for clarification.

1. Responses to Requests for Clarification

Q1: Can you identify any out of boundary sites including areas with species at risk? Can you provide us with a map or diagram as to the location of the species at risk?

A1: There are species at risk within the areas that are slated to have borehole investigations. Areas have been marked with flags and will be clearly delineated. The diagram/map showing the location of species at risk is attached.

Q2: There seems to be gray area around the U.S. side. Will there be access issues?

A2: We know more about the Canadian side than the U.S. Transport Canada will work with the Consultants to get access.

Q3: It is our understanding that Transport Canada will be moving any species at risk off of the plaza site. Please advise as to the proposed timelines that such species will be moved.

A3: Yes, Transport Canada will have the species at risk to be relocated off of the plaza site. It is anticipated that the species at risk will be moved later in the fall or winter of this year, although the exact timing of the move has not been set.

Q4: Do you need the 'Consent to a Criminal Record Verification' form for all Board of Directors on the Board of Directors?

A4: Yes. Individual forms are required for all Directors of the Proponent's Board of Directors.

Q5: For the Hydro One property, will we need special access? Will workers need to be unionized and require training?

A5: Access will need to be arranged through Hydro One. Workers will need to be unionized and safety training as required by Hydro One will need to be undertaken by workers. Special arc resistant clothing may be required.

Q6: Are boreholes required on the transformer site?

A6: Yes. Boreholes are required on the Keith Transformer property.

All other terms and conditions remain the same.
