### **SOLICITATION AMENDMENT NO.008**

**Part 1: Questions and Answers are provided in reference to the specifications for clarification.**

1. **Q.** Please indicate if essentially all accommodation and office/lab functions can be based out of the nearby lodge? If there are restrictions to this request can you please elaborate?
 

**A.** An on-site office and lab for the Departmental Representative, as per the specifications, is considered a mandatory requirement. Accommodations for staff is not mandatory on-site.
2. **Q.** As per the drawings received from Merx page 14 shows a 60 mil liner between two (2) layers of geotextile. In the main document attached on pg. 226 has the specifications of a typical 60 mil HDPE Geomembrane. In addendum #4 the specifications have changed. Is a 60 mil HDPE no longer acceptable for the landfarm pond?
 

**A.** As per Solicitation Amendment 004 (includes Specification Addendum 001) , the 60 HDPE mil liner has been replaced with the RPE liner, as per the revised geomembrane specifications section (31 32 19-02). The drawings will be updated to reflect the revised geomembrane section post tender, but prior to award.
3. **Q.** With respect to the 56 drums of Jet-A fuel currently stored at the Ennadai Lake Lodge, (Refer to section 01 11 00- 1.12-2 of the specifications), the specifications say that "on execution of contract agreement, execute an agreement with the Departmental Representative for purchase of the pre-ordered product," (Costs of Jet-A fuel in drums at Ennadai Lake Lodge to be negotiated post contract award).
 

We note that you have indicated that we can use the fuel barrel's on site but we do not seem to have a price for this fuel. Can you please let us know where we would find the price of this fuel if it is given?

**A.** The fuel that is in the tanks, can be used by the contractor for heating purposes at no cost (Refer to specifications section 02 41 16-.10).
4. **Q.** I have been in touch with Aziz Kheraj who I have worked with on Northern projects in the past. I would like to find out if PWGSC would consider not having a camp set up on site but flying from Aziz's site daily and running your operation out of his site? We are considering doing the same for our staff. This way a big cost of setting up and operating the site daily can be avoided I believe. Let me know your thoughts.
 

**A.** A camp on-site is not mandatory.

**Part 2: The following questions and answers arer provided for clarification to the Request for Proposal document:**

- A.** The project team is not considering an extension at this time.
