(i) *Basis and Calculation of Adjustment to the firm unit prices for:*

The adjustment to the unit prices shall be the difference between the Edmonton (Suncor) reference price appearing in the OBG Volume in effect on the "A" date of **May 18, 2012**, and the Friday immediately prior to fuel loading at origin. If no OBG volume is published on a particular date indicated, the OBG Volume published immediately prior to that date shall apply.

For the purpose of determining the adjustment in unit prices, the Canadian Unbranded Rack price shall be used as follows:

Product as described in Annex "A"	Product as described in the OBG	Location
Wide Cut Type Aviation Fuel (Jet B)	Regular Unleaded	Edmonton (Suncor)

The per litre "A" date value for May 18, 2012 is **\$0.7820 CAD**.

7.1.3 Adjustment Methodology - Platt's Oilgram

Basis and Calculation of Adjustment to the firm unit prices for Aviation Turbine Fuel (Jet A-1) (Items 12, 13, 14, 15, 16 and 17):

The unit price effective on date of bid closing shall be based on an "A" date of **May 18, 2012**.

Reference Marker -

NYH - Platt's Oilgram average weekly assessment for the New York Harbor, Cargo, Jet. The average weekly assessments will be based on the Monday to Friday week average of the high and low daily assessments as compiled by Platt's Oilgram and made available electronically at the beginning of the following week from either GlobalView or PAWS.

The per litre "A" date value for May 18, 2012 is **\$0.7991 CAD**.

An adjustment to the unit price will be calculated as indicated hereunder:

The adjustment to the unit prices shall be the difference between the average of Platt's Oilgram in effect on the "A" date of **May 18, 2012**, and the Friday immediately prior to fuel loading at origin. If no Platt's Oilgram is published on a particular date indicated, the Oilgram published immediately prior to that date shall apply.

For Reference Marker "NYH", the average weekly assessment will be:

- a) converted from U.S. funds to Canadian funds using the day average of the Bank of Canada official exchange rate for the corresponding day; and
- b) converted from U.S. gallon to litres using 3.785412 as the conversion factor.

The Reference Marker price converted to Canadian dollars per litre will be rounded to four decimal places to the nearest hundredth of a cent per litre (\$0.0001/litre). Not considering any resultant value in the sixth decimal place, the fifth decimal place will be rounded as follows: less than or equal to \$0.00004 rounded down, \$0.00005-\$0.00009 rounded up.

Example calculation using the "NYH" Marker:

(All prices indicated are for example purposes only)

Related NYH marker price for week ending February 19, 2011 = U.S. \$0.5123/U.S.Gal.

Related NYH marker price for week ending May 21, 2011 = U.S. \$0.5298/U.S. Gal.

Bank of Canada official U.S. exchange rate for day ending February 19, 2011 = \$1.3871 per U.S. dollar

Bank of Canada official U.S. exchange rate for day ending May 21, 2011 = \$1.4072 per U.S. dollar
