The purposes of this amendment are as follows:

- 1) To respond to questions related to this bid solicitation as detailed in Section A; and
- 2) To modify the bid solicitation as detailed in Section B.

## SECTION A - QUESTIONS AND ANSWERS

#	Questions	Responses
1	What is the make and model of the current MNS systems as referred to in Annex A item 4.4.	The Royal Military College of Canada currently does not have an existing mass notification system; however, Queens University has an ATI speaker array system, type and model are unknown. Also, as set out in the UFC, any individual building MNS installed must be designed to allow future interface with a wide area MNS procured from another manufacturer.
2	Are drawings being made available that detail the locations of the required MNS speakers/horns, head-end MNS locations, existing conduit paths if any?	The speaker array system location has not been decided. The Contractor is expected to provide advice on location. The building drawings of likely locations have been attached. Please see Section B below.
3	Is conduit installation a part of the scope of work to be provided?	Yes, conduit installation is within the scope of work.
4	SoW 4.7 The MNS must be independent of other emergency systems..... must be implemented on a secure channel using two or more of the following types: 4.6.1 IP over Fiber 4.6.2 IP over CAT 6 Cable 4.6.3 IP over analog telephone line(backup only) 4.6.4 VHF/UHF two-way radio system Question: What does RMC have on site now? Do they have the infrastructure above already and what capabilities do they want it to do?	RMC has fibre, CAT6 and telephone currently.
5	Is there a way to provide us with the height of the buildings on site and identify by name?	For building names, please see Section 10, RMCC Campus, of Annex A. Likely installation locations will be on four story high buildings which are approximately 80 feet in height.
