Question from supplier and answer from Canada.

Question

In reference to the amendment question # 4, can you provide dimensions for the pickup trucks that you want to carry and how many of each as there would be a considerable difference between carrying standard size pickup trucks as opposed to trucks that are all $\frac{3}{4}$ ton, crew cab, 4WD. This would drop the capacity to only 3-4 units due to the shear length and height of the vehicles. Can you please clarify?

Answer:

We are looking for a car-hauler that can carry five standard sized pick up trucks approximate dimensions would be Height 66in x width 73 x length 190. If we need to load the heavy duty trucks such as the $\frac{3}{4}$ ton, crew cab, 4WD, we would drop the capacity to 4 vehicles
