Solicitation Amendment 001 is raised to:

1. Provide potential bidders with the following Questions and Answers:

Question 1: Minimum of two full height 32 bit PCI peripheral cards 190 mm in length; **and** Should the AND be an OR? If no, do the expansion cards for this application come in an PCIe form factor? Will 2 PCI and 2+ PCIe slots be acceptable

Answer 1: The word “and” is expressed as “fitting into” which means, we need to be able to fit two full height 32 bit PCI peripheral cards, 190 mm in length, into two available PCI slots supporting universal (3.3 V and 5 V) PCI cards.

Question 2: How many cores are acceptable?

Answer 2: A minimum of 4 cores must be provided. Refer to Annex A, Processing Computer Systems, Mandatory Technical Specifications Item No. 7.

Question 3: How much CPU processing power do you need?

Answer 3: The minimum must be E5 family quad-core, 2.00GHz clock speed, 12MB cache.

Question 4: Why is the E5 family of processors called out?

Answer 4: The E5 family of processors is required because it is a requirement of the radar processing software. The latest version of the commercial software/hardware system requires an Intel Xeon processor. The commercial radar processing software used in the radar network is standard across the country.
