SI03 PRODUCT OPTIONS

SI03 INTERPRETATION OF DRAWINGS

1. The Contractor shall, before close of Tender, bring to the attention of the RCMP Asset Management, the omission of any items which is obviously intended or required for a complete job. Any item that is specified or shown which varies from the code or ordinance requirements should also be reported to the RCMP Asset Management before Tender close. Failure to co-operate in these two respects will not relieve the Contractor of the responsibility of completing the work in accordance with the standard of the contract as though it has been properly incorporated in the Contract Documents.
2. Where the same items appear in more than one Specification Section or where Sub-Trades duplicate each other's work, in their Tender, the Contractor will decide before tendering who will do such work. There will be no adjustment where such an item is left out by both parties, each assuming that the other has made allowance for the same.
3. In any case of doubt as to the intention of the Drawing or Specifications, request clarification before proceeding. Should the drawings show, or the specifications call for any item which is either impractical or impossible, the Contractor is required to obtain instructions from the RCMP Asset Manager before proceeding, otherwise the Asset Manager will assume that all work can be carried out in an acceptable manner.
4. If the specifications conflict with the drawings, or vice versa, the specifications shall govern.
5. RCMP may furnish additional drawings for clarification. These additional drawings have the same meaning and intent as if they were included with the original plans referred to in the Contract Documents.
6. The Contractor shall check the existing building dimensions before starting work and ordering any materials. Discrepancies affecting the work shown on the drawings shall be reported to the RCMP Asset Manager for clarification and final decision. It is the responsibility of the Contractor to visit the site personally to verify or obtain dimensions. Any dimensions given are approximate and the RCMP assumes no responsibility for the accuracy of these dimensions.

2. When a request to substitute a product is made, Owner may approve substitution and will issue an Addendum to known bidders.
3. In submission of substitutions to products specified, Bidders shall include in their Bid, any changes required in work to accommodate such substitutions. A later claim by Bidder for an addition to contract price because of changes in work necessitated by use of substitutions will not be considered.
4. Submissions shall provide sufficient information to enable the Owner to determine acceptability of such products.
5. Provide complete information on required revisions to other work to accommodate each substitution, dollar amount of additions to or reductions from Bid Price, including revisions to other work.
6. Unless substitutions are submitted in this manner and subsequently accepted, provide products specified.
