

Part 1 General

1.1 RELATED SECTIONS

- .1 Section 01 00 10 – General Instructions.
- .2 Section 26 05 00 - Common Work Results for Electrical.
- .3 Section 26 28 16.02 - Moulded-Case Circuit Breakers.

1.2 REFERENCES

- .1 Canadian Standards Association (CSA International).
 - .1 CSA C22.2 No. 29-M1989 (R2004), Panelboards and Enclosed Panelboards.

1.3 SHOP DRAWINGS

- .1 Refer to Section 01 00 10 – General Instructions.
- .2 Drawings to include electrical detail of panel, branch breaker type, quantity, ampacity provisions, enclosure dimension, and panel locking.

1.5 WASTE MANAGEMENT AND DISPOSAL

- .1 Separate and recycle waste materials in accordance with Section 01 00 10 – General Instructions.
- .2 Remove from site and dispose of all packaging materials at appropriate recycling facilities.
- .3 Collect and separate for disposal all packaging material in appropriate on-site bins for recycling in accordance with Waste Management Plan.
- .4 Divert unused metal and wiring materials from landfill to metal recycling facility as approved by Departmental Representative.

Part 2 Products

2.1 PANELBOARDS

- .1 Panelboards: to CSA C22.2 No. 29 and product of one manufacturer.
 - .1 Install circuit breakers in panelboards before shipment.
 - .2 In addition to CSA requirements manufacturer's nameplate must show fault current that panel including breakers has been build to withstand.
- .2 250 and 600 volt panelboards: bus and breakers rated for symmetrical interrupting capacity as follows:
 - .1 240 volt 10,000 amps.
 - .2 600 volt 42 kA RMS symmetrical..

- .3 Sequence phase bus with odd numbered breakers on left and even on right, with each breaker identified by permanent number of identification as to circuit number.
- .4 Panelboards: mains, number of circuits, and number and size of branch circuit breakers as indicated.
- .5 Copper bus with full size neutral.
- .6 Mains suitable for bolt-on breakers.
- .7 Finish trim and door baked grey enamel, with hinged cover.
- .8 Supply two (2) keys for each panelboard and key panelboards alike.

2.2 BREAKERS

- .1 Breakers to Section 26 28 16.02 – Moulded Case Circuit Breakers.
- .2 Main breaker: separately mounted on top or bottom of the panel to suit the cable entry.
- .3 Panelboards shall be supplied with breakers as described on drawings.

2.3 EQUIPMENT IDENTIFICATION

- .1 Provide equipment identification in accordance with Section 26 05 00 – Common Work Results for Electrical.
- .2 Nameplate for each panelboard Size 4 engraved as indicated.
- .3 Nameplate for each circuit in distribution panelboards Size 2 engraved as indicated.
- .4 Complete circuit directory with a type-written legend showing location and load of each circuit.

2.4 MATERIALS

- .1 Panelboards to be the product of one manufacturer.

Part 3 Execution

3.1 INSTALLATION

- .1 Locate panelboards as indicated and mount securely, plumb true and square, to adjoining surfaces.
- .2 Install surface- and recessed-mounted panelboards as indicated. Provide steel channel. Use masonry anchors to attach panelboards to interior wall partitions. Perforated steel channel not acceptable.
- .3 Mount panelboards to height given in Section 26 05 00 – Common Work Results for Electrical or as indicated.
- .4 Connect loads to circuits as indicated.
- .5 All breakers shall be tested and test reports submitted.

3.2 PANELBOARD DIRECTORY SHEETS

- .1 Complete a new panelboard directory sheet for each distribution and each branch circuit panelboard.
- .2 Panelboard directory sheets are to be completed in English only.
- .3 Using a laser jet printer, print all complete electronic panelboard directory sheets and panelboard cards, as described later herein, on quality white bond paper. Provide a sample of the paper and printing process to the Departmental Representative for review and approval.
- .4 Use the template format designated for this purpose. Refer to the sample form in this section.
- .5 As work progresses, bring any anomalies to the attention of the Departmental Representative and seek written clarification.
- .6 The template will be provided to the Contractor in electronic format in MS WORD, or as approved by the Departmental Representative.
- .7 Complete all fields of the panelboard directory sheet in typewritten form. Properly centre and align the information entered.
- .8 Adjust the template to suit the number of spaces in the panelboard.
- .9 Fill in the fields as the information becomes available.
- .10 Enter specific descriptive information with regard to the type of device(s), room location(s), etc. Vague terminology is not acceptable.
- .11 Enter the information on spare circuit breakers and empty spaces. Differentiate between the two.
- .12 Make corrections to the directory sheets as directed by the Departmental Representative where the descriptive information is found to be inadequate.

3.3 PANELBOARD DIRECTORY CARDS

- .1 Complete a new directory card for each panelboard in the format shown on the samples in this section.
- .2 Panelboard directory cards are to be completed in English only.
- .3 The template will be provided to the Contractor in electronic format in MS WORD, or as approved by the Departmental Representative.
- .4 Insert a copy of the directory card in a plastic pocket on the inside face of its door, or as applicable, on the face of the branch panels and CDP. Supply and install the plastic pockets of a quality acceptable to the Departmental Representative. Cut the printed panelboard directory sheets to fit in the plastic sleeve.
