This Addendum is raised to provide the following answers to questions provided by bidders.

The following changes in the tender documents are effective immediately. This addendum will form part of the contract documents.

ANSWERS TO QUESTIONS

1. **QUESTION**

We are preparing pricing for this drill program and wondering if you have approximate numbers for land vs. marine holes?

ANSWER

Answered in Addendum No. 1.

2. **QUESTION**

We wanted to confirm that simply a factual report is required, and no recommendations.

ANSWER

No recommendations are required.

3. **QUESTION**

Are we going to be paid for each mob/demob done or to the maximum price shown in column 5?

For example, If I have a lump sum of \$1,000 to mob/demob for all 3 counties (Prince, Queens and Kings) and during the contract time period I have 2 different projects in each county. Will we be paid \$6,000 (2 sites x 3 counties x \$1,000) or only \$3,000 (as per the total of Item No. 1, 2 and 3)?

ANSWER

The contractor will be reimbursed for mob and de-mob for each call up under the contract. If the contractor is required to perform drilling at three locations in a county that would equal three times the bid price per drilling operations. The example above would result in the contractor receiving \$6,000.00.

4. **QUESTION**

Please confirm that Item No. 4 (Drilling in Overburden) and Item No. 5 (Drilling in Bedrock) are to include surveying, drilling supervision, and all engineering costs/expenses associated with the preparation of a geotechnical report for each site.

ANSWER

For Item No.4 and Item No.5 it does include costs as described above.

5. **QUESTION**

Please confirm that a comprehensive, site specific, Health and Safety Plan is to be submitted for each site with the corresponding cost to be included in Item No. 4 and No. 5.

ANSWER

A generic Health and Safety should be developed for all the drilling operations that are performed on land. The plan can be altered to include site specific plans because the proposed locations may differ. Plant drilling would require a separate Health and Safety Plan.

6. **QUESTION**

Please provide an example as to when Item No. 12 (Other drilling methods, sampling, and reporting) would be applicable.

ANSWER

PWGSC may be required to perform floating plant drilling and this would be covered under Item 12.

7. **QUESTION**

What is the required drilling diameter for the geotechnical investigations? HQ or NQ?

ANSWER

Contractor to use a drill diameter that will provide the information as required in the RFSO. PWGSC does not recommend a drill diameter.
