This amendment number two (02) is raised to extend the respond to a bidder question received and to make changes to the Statement of Work:

1. Question:

Parks is requesting 10' 6" high-cube freight containers but from my knowledge containers of this size do not exist? Standard height is 8' and oversized is 9' 6", and those appear to be all that is available. Please advise.

Answer:

The height of the freight containers was incorrectly identified in the Statement of Work. Additionally, the bait manufacturer will now pre-load freight containers with the bait and the Contractor will not be required to supply these containers as originally indicated. The Statement of Work is amended as indicated below.

2. Under 4. Tasks/Technical Specifications of the Statement of Work at Annex A:

Delete:

- 4.1.** The Contractor must provide a marine barge at minimum 160ft long and 40ft wide from August 27th to October 1, 2013 at a designated location (see Appendix – Figure 1).

The working surface of the barge must be large enough to accommodate the following:

- (a) Thirty (30) drums of Jet A helicopter fuel in 45 gallon drums.
- (b) Three (3) high-cube freight containers 10ft 6" high at 53ft long [to accommodate 4.1.(d)].
- (c) One (1) high-cube freight container 10ft 6" high at 48ft long or longer [to accommodate 4.1.(e) and other equipment].

Insert:

- 4.1.** The Contractor must provide a marine barge at minimum 160ft long and 40ft wide from August 27th to October 1, 2013 at a designated location (see Appendix – Figure 1).

The working surface of the barge must be large enough to accommodate the following:

- (a) Thirty (30) drums of Jet A helicopter fuel in 45 gallon drums.
- (b) Four (4) standard freight containers 8ft 6" high by 8ft wide by 20ft long [to accommodate 4.1.(d)].
- (c) One (1) high-cube freight container 9ft 6" high at 20ft long [to accommodate 4.1.(e) and other equipment].

3. Under 4. Tasks/Technical Specifications of the Statement of Work at Annex A:

Delete:

- 4.2.** The Contractor must provide the following equipment (to be leased/provided by the Contractor and transported on the barge) for use by Parks Canada (unless otherwise indicated) for the Contract duration:

- (a) Three (3) high-cube freight containers 10ft 6" high at 53ft long.
- (b) One (1) high-cube freight container 10ft 6" high at 48ft or longer.
 - i. Must be able to accommodate secure storage of forklift [see 4.2.(d)].
- (c) Two (2) electric/manual pallet jacks with a lift capacity of 700kg minimum.
- (d) Propane powered forklift with a lift capacity of 700kg minimum.
 - i. Forklift must be able to lift 700kg at least 15ft high.
 - ii. Forklift must be of a size that it can be stored inside a freight container during periods of inactivity and in inclement weather.

Insert:

4.2. The Contractor must provide the following equipment (to be leased/provided by the Contractor and transported on the barge) for use by Parks Canada (unless otherwise indicated) for the Contract duration:

- (a) One (1) high-cube freight container 9ft 6" high at 20ft.
 - i. Must be able to accommodate secure storage of forklift [see 4.2.(c)].
- (b) Two (2) electric/manual pallet jacks with a lift capacity of 700kg minimum.
- (c) Propane powered forklift with a lift capacity of 700kg minimum.
 - i. Forklift must be able to lift 700kg at least 15ft high.
 - ii. Forklift must be of a size that it can be stored inside a freight container during periods of inactivity and in inclement weather.

4. Under 4. Tasks/Technical Specifications of the Statement of Work at Annex A:

Delete:

4.4. The Contractor must load and transport approximately 25,000kg of pelleted bait containing a rodenticide to Project Site.

- (a) Parks Canada will provide this bait and ensure it is shipped to point-of-origin in sufficient time for loading and transport.
- (b) The bait will be packaged in approximately seventy-five (75) heavy cardboard laminate boxes (4 ft x 4ft each). Boxes can be stacked only two (2) high.
- (c) The Contractor will oversee the loading of the bait inside the freight containers for safe and secure transport, but Parks Canada will provide a site plan for how the freight containers should be configured, and will advise on the storage of bait (i.e. it must be kept dry at all times).

Insert:

4.4. The Contractor must load and transport approximately 25,000kg of pelleted bait containing a rodenticide to Project Site.

- (a) Parks Canada will provide this bait and ensure it is shipped to point-of-origin in sufficient time for loading and transport.
- (b) The bait will be packaged laminate cardboard boxes and pre-loaded into four (4) standard freight containers (8ft 6" high by 20 ft long).
- (c) The Contractor will load the freight containers on the barge for safe and secure transport, and Parks Canada will provide a site plan for how freight containers should be configured, and will advise on storage of bait (i.e. must be kept dry at all times).

All other terms and conditions remain the same.
