

Part 1 General

1.1 CONTRACTOR'S OBLIGATIONS

- .1 The whole AC electrical part of the project is the Contractor's responsibility. Before commencing the project, the Contractor's must examine all the existing electrical installations on the site, and he must prepare complete installation plans, sealed by an electrical engineer. The plans and related documents will be submitted to the Departmental Representative for verification.
- .2 The whole DC electrical part of the project is also the Contractor's responsibility, and the same specifications as those listed in item 1.1.1 are required.
- .3 Once the installation completed and before starting up the system, the Contractor must have all the electrical installations verified by a competent and qualified engineer having authority to proceed in the province of Quebec. A written certification by this engineer will be required and will be supplied to the Departmental Representative before starting up the cathodic protection system..
