Cambridge Bay, Nunavut,

Addendum No. 002

2013-07-26

THE PURPOSE OF THIS ADDENDUM IS TO GIVE EFFECT TO THE FOLLOWING:**1 Specification Section 31 00 00 Earthwork Item – 3.5 Backfilling - 3.5.6.3**

delete Item 3.5.6.3 and replace with the following:

- .1 Placing:
 - .1 Place backfill, for the FTA area, fill and base-course material in 150 mm lifts:
add water as required to achieve specified density.
 - .2 Place Granular Material for the LTU to a depth of 0.25m across the surface of
the LTU as shown in Figure 2.

2 Figure 2 and Figure 3

Delete and replace with the revised Figure 2 and Figure 3 which are attached as separate electronic attachments.

REVISION 2:

SPECIFICATIONS - QUESTIONS AND ANSWERS:

Question 1

We note there is a unit cost item in the Basis of Pricing form for the supply and installation of clean granular material for the LTU, which seems to only relate to the 0.25 m thick layer of ¾-inch crushed rock to be placed above the geomembrane liner (see section 02 55 13, item 1.5.3 for Measure of Payment description). We do not see a corresponding unit cost item in the Basis of Pricing form, or a payment description in the specifications, for the 0.15 m thick layer of sand/20 mm minus material to be placed underneath the geomembrane liner (as described in 31 00 00, item 3.5.6.3, and in Figure 2). Can you please clarify how the 0.15 m layer is to be priced.

Answer 1

The 0.15 thick layer of sand below the geomembrane has been removed from the design.
