List of Annexes

PART 1 - GENERAL INFORMATION

1. Introduction

The Request for Standing Offers (RFSO) is divided into seven parts plus attachments and annexes, as follows:

- | | |
|--------|---|
| Part 1 | General Information: provides a general description of the requirement; |
| Part 2 | Offeror Instructions: provides the instructions applicable to the clauses and conditions of the RFSO; |
| Part 3 | Offer Preparation Instructions: provides offerors with instructions on how to prepare their offer to address the evaluation criteria specified; |
| Part 4 | Evaluation Procedures and Basis of Selection: indicates how the evaluation will be conducted, the evaluation criteria which must be addressed in the offer, and the basis of selection; |
| Part 5 | Certifications: includes the certifications to be provided; |
| Part 6 | Security, Financial and Insurance Requirements: includes specific requirements that must be addressed by offerors; and |
| Part 7 | 7A, Standing Offer, and 7B, Resulting Contract Clauses: |
| | 7A, includes the Standing Offer containing the offer from the Offeror and the applicable clauses and conditions; |
| | 7B, includes the clauses and conditions which will apply to any contract resulting from a call-up made pursuant to the Standing Offer. |

The Annexes include the Requirement, the basis of payment, the pricing, the description of temporary help services categories, the statement of work, the standards and duties with respect to tests, the call-up procedure, the instructions for designated users, the standing offers reporting periodic usage reports, the security requirements checklist (SRCL), the Correctional Service of Canada (CSC) form, the PWGSC-TPSGC 229 form, the evaluation criteria and the offeror's letter of référence.

This procurement is set aside under the federal government's Procurement Strategy for Aboriginal Business.

2. Summary

This Request for Regional and Master Standing Offer (RMSO) is intended to meet temporary help services needs (the categories of services are described in Annex 1 - Statement of Work) for federal departments and organizations located in some areas of the Quebec Region described below.

The RMSO will be for the region of Quebec, which will be divided, eight geographic areas

1. Greater Québec, including Lévis, Valcartier and Donnacona

-
2. Rimouski, Bas-Saint-Laurent and Gaspé
 3. Saguenay, Lac-Saint-Jean and Côte-Nord
 4. Greater Montréal (including the North Shore and South Shore, in a radius of up to 50 km)
 5. Greater Trois-Rivières, Nicolet, Shawinigan, including Grand-Mère
 6. Sherbrooke, including Granby and Cowansville
 7. Laurentians (north of Montréal from St-Jérôme, including La Macaza)
 8. Abitibi

Offerors may propose services in one or more geographic areas to fulfill part or all of the defined need. While the description of the category of services in Annex C is more precise, services required are within the following streams: office support, administrative services, operational services, technical services, professional services. Following the process.

Standing Offers will be issued for a period of one year, plus two optional years.

Several standing offers may be issued further to this process, as long as Offerors meet the stated technical requirements. A Standing Offer may cover one or more areas of the Quebec Region.

Previously, standing offers could generate a total business volume of about \$ 9,000,000.00, tax included, for all areas, offerors and the time frame, including the two option years.

There is a security requirement associated with this requirement. For additional information, consult Part 6 - Security, Financial and Insurance Requirements, and Part 7A - Standing Offer. Offerors should consult the "Security Requirements for PWGSC Bid Solicitations - Instructions for Bidders" (<http://www.tpsgc-pwgsc.gc.ca/app-acq/lc-pl/lc-pl-eng.html#a31>) document on the Departmental Standard Procurement Documents website.

Offerors must submit, before awarding any standing offer, a list of names , or other related information as needed, pursuant to section 01 of Standard Instructions 2006 and 2007.

For services requirements, Offerors in receipt of a pension or a lump sum payment must provide the required information as detailed in article 3 of Part 2 of the Request for Standing Offers (RFSO).

The requirement is subject to a preference for Canadian goods and/or services

3. Security Requirement

There is a security requirement associated with the requirement of the Standing Offer. For additional information, see Part 6 - Security, Financial and Insurance Requirements, and Part 7 - Standing Offer and Resulting Contract Clauses.

4. Debriefings

Offerors may request a debriefing on the results of the request for standing offers process. Offerors should make the request to the Standing Offer Authority within 15 working days of receipt of the results of the request for standing offers process. The debriefing may be in writing, by telephone or in person.

PART 2 - OFFEROR INSTRUCTIONS

1. Standard Instructions, Clauses and Conditions

All instructions, clauses and conditions identified in the Request for Standing Offers (RFSO) by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (<https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual>) issued by Public Works and Government Services Canada.

Offerors who submit an offer agree to be bound by the instructions, clauses and conditions of the RFSO and accept the clauses and conditions of the Standing Offer and resulting contract(s).

The 2006 (2013-06-01) Standard Instructions - Request for Standing Offers - Goods or Services - Competitive Requirements, are incorporated by reference into and form part of the RFSO.

Subsection 5.4 of 2006, Standard Instructions - Request for Standing Offers - Goods or Services - Competitive Requirements, is amended as follows:

Delete: sixty (60) days

Insert: one hundred and twenty (120) days

2. Submission of Offers

Offers must be submitted only to Public Works and Government Services Canada (PWGSC) Bid Receiving Unit by the date, time and place indicated on page 1 of the Request for Standing Offers.

Due to the nature of the Request for Standing Offers, transmission of offers by facsimile or email to PWGSC will not be accepted.

3. Former Public Servant

Contracts awarded to former public servants (FPS) in receipt of a pension or of a lump sum payment must bear the closest public scrutiny, and reflect fairness in the spending of public funds. In order to comply with Treasury Board policies and directives on contracts with FPS, offerors must provide the information required below before the issuance of a standing offer.

Definitions

For the purposes of this clause,

" former public servant " is any former member of a department as defined in the Financial Administration Act R.S., 1985, c. F-11, a former member of the Canadian Armed Forces or a former member of the Royal Canadian Mounted Police. A former public servant may be:

- a. an individual;
- b. an individual who has incorporated;
- c. a partnership made of former public servants; or

d. a sole proprietorship or entity where the affected individual has a controlling or major interest in the entity.

" lump sum payment period " means the period measured in weeks of salary, for which payment has been made to facilitate the transition to retirement or to other employment as a result of the implementation of various programs to reduce the size of the Public Service. The lump sum payment period does not include the period of severance pay, which is measured in a like manner.

" pension " means a pension or annual allowance paid under the Public Service Superannuation Act (PSSA), R.S., 1985, c. P-36, and any increases paid pursuant to the Supplementary Retirement Benefits Act, R.S., 1985, c. S-24 as it affects the PSSA. It does not include pensions payable pursuant to the Canadian Forces Superannuation Act, R.S., 1985, c. C-17, the Defence Services Pension Continuation Act, 1970, c. D-3, the Royal Canadian Mounted Police Pension Continuation Act, 1970, c. R-10, and the Royal Canadian Mounted Police Superannuation Act, R.S., 1985, c. R-11, the Members of Parliament Retiring Allowances Act, R.S. 1985, c. M-5, and that portion of pension payable to the Canada Pension Plan Act, R.S., 1985, c. C-8.

Former Public Servant in Receipt of a Pension

As per the above definitions, is the Offeror a FPS in receipt of a pension? YES () NO ()

If so, the Offeror must provide the following information, for all FPS in receipt of a pension, as applicable:

- a. name of former public servant;
- b. date of termination of employment or retirement from the Public Service.

By providing this information, Offerors agree that the successful Offeror's status, with respect to being a former public servant in receipt of a pension, will be reported on departmental websites as part of the published proactive disclosure reports in accordance with Contracting Policy Notice: 2012-2 and the Guidelines on the Proactive Disclosure of Contracts.

Work Force Adjustment Directive

Is the Offeror a FPS who received a lump sum payment pursuant to the terms of the Work Force Adjustment Directive? YES () NO ()

If so, the Offeror must provide the following information:

- a. name of former public servant;
- b conditions of the lump sum payment incentive;
- c. date of termination of employment;
- d. amount of lump sum payment;
- e. rate of pay on which lump sum payment is based;
- f. period of lump sum payment including start date, end date and number of weeks;
- g. number and amount (professional fees) of other contracts subject to the restrictions of a work force adjustment program.

For all contracts awarded during the lump sum payment period, the total amount of fees that may be paid to a FPS who received a lump sum payment is \$5,000, including Applicable Taxes.

4. Enquiries - Request for Standing Offers

All enquiries must be submitted in writing to the Standing Offer Authority no later than five (5) working days before the Request for Standing Offers (RFSO) closing date. Enquiries received after that time may not be answered.

Offerors should reference as accurately as possible the numbered item of the RFSO to which the enquiry relates. Care should be taken by offerors to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the questions or may request that offerors do so, so that the proprietary nature of the question is eliminated, and the enquiry can be answered with copies to all offerors. Enquiries not submitted in a form that can be distributed to all offerors may not be answered by Canada.

5. Improvement of Requirement During Solicitation Period

Should bidders consider that the specifications or Statement of Work contained in the bid solicitation could be improved technically or technologically, bidders are invited to make suggestions, in writing, to the Contracting Authority named in the bid solicitation. Bidders must clearly outline the suggested improvement as well as the reason for the suggestion. Suggestions that do not restrict the level of competition nor favour a particular bidder will be given consideration provided they are submitted to the Contracting Authority at least ten (10) working days before the bid closing date. Canada will have the right to accept or reject any or all suggestions

6. Offerors' conference

An offerors' conference will be held at PWGSC - Place Bonaventure - 800, de la Gauchetière Ouest Portail Sud-Est - 7 th floor, Montreal, on **Thursday, August 22, 2013**. The conference will begin at **1:30 PM**, in room Nunavut. The scope of the requirement outlined in the Request for Standing Offers (RFSO) will be reviewed during the conference and questions will be answered. It is recommended that offerors who intend to submit an offer attend or send a representative.

Offerors are requested to communicate with the Standing Offer Authority before the conference to confirm attendance. Offerors should provide, in writing, to the Standing Offer Authority, the name of the person(s) who will be attending and a list of issues they wish to table at least five (5) working days before the scheduled conference.

Any clarifications or changes to the RFSO resulting from the offerors' conference will be included as an amendment to the RFSO. Offerors who do not attend will not be precluded from submitting an offer.

7. Applicable Laws

The Standing Offer and any contract resulting from the Standing Offer must be interpreted and governed, and the relations between the parties determined, by the laws in force in province of Quebec.

Offerors may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their offer, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the offerors.

PART 3 - OFFER PREPARATION INSTRUCTIONS

1. Offer Preparation Instructions

Canada requests that offerors provide their offer in separately bound sections as follows:

Section I: Technical Offer (2 hard copies);

Section II: Financial Offer (1 hard copy) and 1 soft copy on CD or DVD (Lotus or Excel format)

Section III: Certifications (1 hard copy)

Note: All three sections must be submitted for an offer whether that offer covers one or more categories of services, mentioned at Annex A - Requirement.

If there is a discrepancy between the wording of the soft copy and the hard copy, the wording of the hard copy will have priority over the wording of the soft copy.

Rates must appear in the financial offer only. No rates must be indicated in any other section of the offer.

Canada requests that offerors follow the format instructions described below in the preparation of their offer.

- (a) use 8.5 x 11 inch (216 mm x 279 mm) paper;
- (b) use a numbering system that corresponds to that of the Request for Standing Offers.

In April 2006, Canada issued a policy directing federal departments and agencies to take the necessary steps to incorporate environmental considerations into the procurement process Policy on Green Procurement

(<http://www.tpsgc-pwgsc.gc.ca/ecologisation-greening/achats-procurement/politique-policy-eng.html>).

To assist Canada in reaching its objectives, offerors should:

- 1) use 8.5 x 11 inch (216 mm x 279 mm) paper containing fibre certified as originating from a sustainably-managed forest and containing minimum 30% recycled content; and
- 2) use an environmentally-preferable format including black and white printing instead of colour printing, printing double sided/duplex, using staples or clips instead of cerlox, duotangs or binders.

Section I: Technical Offer

In their technical offer, offerors should explain and demonstrate how they propose to meet the requirements and how they will carry out the Work.

Section II: Financial Offer

Offerors must submit their financial offer in accordance with the **Annex B, Basis of Payment** by completing the **Annex 2 - Pricing**. The total amount of Applicable Taxes must be shown separately.

NOTE:

The Annex 2 , Pricing will be sent to firms upon request. Please send your request by E-Mail to Mr. Benmoussa Benshila at: benmoussa.benshila@pwgsc-tpsgc.gc.ca.
Payment by Credit Card

Canada requests that offerors complete one of the following:

- (a) () Government of Canada Acquisition Cards (credit cards) will be accepted for payment of call-ups against the standing offer.

The following credit card(s) are accepted:

VISA _____

Master Card _____

- (b) () Government of Canada Acquisition Cards (credit cards) will not be accepted for payment of call-ups against the standing offer.

The Offeror is not obligated to accept payment by credit card.

Acceptance of credit cards for payment of call-ups will not be considered as an evaluation criterion.

Section III: Certifications

Offerors must submit the certifications required under Part 5.

PART 4 - EVALUATION PROCEDURES AND BASIS OF SELECTION

1. Evaluation Procedures

- (a) Offers will be assessed in accordance with the entire requirement of the Request for Standing Offers including the technical and financial evaluation criteria.
- (b) An evaluation team composed of representatives of Canada will evaluate the offers.
- (c) The evaluation team will determine first if there are three (3) or more offers with a valid Canadian Content certification. In that event, the evaluation process will be limited to the offers with the certification; otherwise, all offers will be evaluated. If some of the offers with a valid certification are declared non-responsive, or are withdrawn, and less than three responsive offers with a valid certification remain, the evaluation will continue among those offers with a valid certification. If all offers with a valid certification are subsequently declared non-responsive, or are withdrawn, then all the other offers received will be evaluated.

1.1. Technical Evaluation

Mandatory Technical Criteria

Mandatory technical criteria are listed in Appendix K - Evaluation Criteria

1.2 Financial Evaluation

All firm rates offered and presented in Annex 2 - Pricing - will be used when placing orders. The right of first refusal will be used for call ups (see Annex E Call-up Procedure), and the firm rates will be considered at that time.

NOTE: Offerors may, before the execution of the two option years, amend and submit new rates that will be valid for the following year

2. Basis of Selection

An offer must comply with the requirements of the Request for Standing Offers and meet all mandatory technical evaluation criteria to be declared responsive. The responsive offer with the lowest evaluated price will be recommended for issuance of a standing offer.

NOTE: The non retained offerors, as well as new offerors that did not participate in the present process, may submit, afterwards, an offer before the exercise of each option of the two following years. This new offer must meet the same technical requirements, financial requirements, and terms and conditions of the present request for standing offer

PART 5 - CERTIFICATIONS

Offerors must provide the required certifications and documentation to be issued a standing offer.

The certifications provided by offerors to Canada are subject to verification by Canada at all times. Canada will declare an offer non-responsive, will have the right to set-aside a standing offer, or will declare a contractor in default, if any certification is found to be untrue whether during the offer evaluation period, during the Standing Offer period, or during the contract period.

The Standing Offer Authority will have the right to ask for additional information to verify the Offeror's certifications. Failure to comply with this request will also render the Offer non-responsive or may result in the setting aside of the Standing Offer or will constitute a default under the Contract.

1. Mandatory Certifications Required Precedent to Issuance of a Standing Offer

1.1 Code of Conduct and Certifications - Related documentation

By submitting an offer, the Offeror certifies that the Offeror and its affiliates are in compliance with the provisions as stated in Section 01 Code of Conduct and Certifications - Offer of Standard Instructions 2006. The related documentation therein required will assist Canada in confirming that the certifications are true.

1.2 Federal Contractors Program for Employment Equity - Standing Offer Certification

By submitting an offer, the Offeror certifies that the Offeror, and any of the Offeror's members if the Offeror is a Joint Venture, is not named on the Federal Contractors Program (FCP) for employment equity "FCP Limited Eligibility to Bid" list

(http://www.labour.gc.ca/eng/standards_equity/eq/emp/fcp/list/inelig.shtml) available from HRSDC-Labour's website.

Canada will have the right to declare an offer non-responsive, or to set-aside a Standing Offer, if the Offeror, or any member of the Offeror if the Offeror is a Joint Venture, appears on the "FCP Limited Eligibility to Bid" list at the time of issuing of a Standing Offer or during the period of the Standing Offer.

2. Additional Certifications Precedent to Issuance of a Standing Offer

The certifications listed below should be completed and submitted with the offer, but may be submitted afterwards. If any of these required certifications is not completed and submitted as requested, the Standing Offer Authority will so inform the Offeror and provide the Offeror with a time frame within which to meet the requirement. Failure to comply with the request of the Standing Offer Authority and meet the requirement within that time period will render the offer non-responsive.

2.1 Green procurement questionnaire

To be declared responsive, the answers on this questionnaire need not be exhaustive. Any ideas that encourage green procurement are appreciated.

Objective

This Request for Standing Offers (RFSO) includes questions about green procurement, which will help the Government of Canada take stock of the industry's progress in its operations and supply chain.

Background

Canada is committed to greening its supply chain. In compliance with the federal government's Policy on Green Procurement, which became effective in April 2006, federal departments and agencies must take the appropriate measures to procure goods and services that have a lesser or reduced impact on the environment than that of previous products and services.

Environmentally preferable goods and services are those that have a lesser or reduced impact on the environment over the life cycle of the good or service, when compared with competing goods or services serving the same purpose. Environmental performance considerations include, among other things, the reduction of greenhouse gas emissions and air contaminants; improved energy and water efficiency; the use of renewable resources; reduced hazardous waste; and reduced toxic and hazardous substances.

At this time, Public Works and Government Service Canada (PWGSC) wants to understand how the industry has progressed in incorporating environmental considerations into its goods and services. Upcoming requests for proposal (RFP) will require that suppliers meet certain mandatory environmental criteria. While adding new environmental criteria, PWGSC needs to ensure that there is still enough competition among potential suppliers to obtain a fair price for the requested goods and services. It is therefore necessary for PWGSC to understand the current state of the industry, relative to environmental factors, in order to successfully incorporate mandatory environmental criteria without inappropriately limiting competition.

1) Please provide information about your corporate environmental policy, if there is one in place. Emphasis on greenhouse gas emissions, energy and water efficiency, solid waste, toxic and hazardous chemicals, forest management and water pollution.

2) Does your business have ISO 14001 certification or equivalent certification in environmental management systems? If so, please specify.

3) Do you use reusable products as alternatives to consumable products? If so, provide examples.

4) With regard to consumable products and product packaging, what measures are being taken to reduce waste and substantially increase the quantity of recycled materials used?

5) Do you have products available that are considered to be environmentally preferable? Please provide a list of these products as well as an explanation as to what makes them preferable.

6) What environmental initiatives are started? With specific emphasis on green house gas, water efficiency, solid waste, toxic products, tree management and water pollution.

3. Certifications Required with the Offer

3.1 Canadian Content Certification

2.1.1 *SACC Manual* clause A3050T (2010-01-10) Canadian Content Definition

2.2.2 Canadian Content Certification

This procurement is conditionally limited to Canadian services.

Subject to the evaluation procedures contained in the request for standing offer, offerors acknowledge that only offers with a certification that the services offered are Canadian services, as defined in clause A3050T, may be considered.

Failure to provide this certification completed with the offer will result in the services offered being treated as non-Canadian services.

The Offeror certifies that:

() the services offered are Canadian services as defined in paragraph 4 of clause A3050T.

For more information on how to determine the Canadian content for a mix of goods, a mix of services or a mix of goods and services, consult Annex 3.6.(9), Example 2, of the Supply Manual.

3.2. Set-aside for Aboriginal Business

3.2.1 Set-aside under the Procurement Strategy for Aboriginal Business

This procurement is set aside under the federal government's Procurement Strategy for Aboriginal Business, as detailed in Annex 9.4 Requirements for the Set-aside Program for Aboriginal Business, of the Supply Manual.

This procurement is set aside from the international trade agreements under the provision each has for set-asides for small and minority businesses.

Further to Article 1802 of the Agreement on Internal Trade (AIT), AIT does not apply to this procurement.

3.2.2. Set-aside for Aboriginal Business

1.This procurement is set aside under the federal government's Procurement Strategy for Aboriginal Business, as detailed in Annex 9.4: Requirements for the Set-aside Program for Aboriginal Business, of the Supply Manual.

2.The Offeror:

i.certifies that it meets, and will continue to meet throughout the duration of the Offer, the requirements described in the above-mentioned annex.

ii.agrees that any subcontractor it engages under the Offer must satisfy the requirements described in the above-mentioned annex.

iii.agrees to provide to Canada, immediately upon request, evidence supporting any subcontractor's compliance with the requirements described in the above-mentioned annex.

3.The Offeror must check the applicable box below:

i.() The Offeror is an Aboriginal business that is a sole proprietorship, band, limited company, co-operative, partnership or not-for-profit organization.

OR

ii.() The Offeror is either a joint venture consisting of two or more Aboriginal businesses or a joint venture between an Aboriginal business and a non-Aboriginal business.

4.The Offeror must check the applicable box below:

i.() The Aboriginal business has fewer than six full-time employees.

OR

ii.() The Aboriginal business has six or more full-time employees.

5.The Offeror must, upon request by Canada, provide all information and evidence supporting this certification. The Offeror must ensure that this evidence will be available for audit during normal

business hours by a representative of Canada, who may make copies and take extracts from the evidence. The Offeror must provide all reasonably required facilities for any audits.

6.By submitting an offer, the Offeror certifies that the information submitted by the Offeror in response to the above requirements is accurate and complete.

3.2.3. Owner/Employee Certification - Set-aside for Aboriginal Business

If requested by the Standing Offer Authority, the Offeror must provide the following certification for each owner and employee who is Aboriginal:

1.I am _____ (insert "an owner" and/or "a full-time employee") of _____
(insert name of business), and an Aboriginal person, as defined in Annex 9.4 of the Supply Manual entitled "Requirements for the Set-Aside Program for Aboriginal Business".

2.I certify that the above statement is true and consent to its verification upon request by Canada.

Printed name of owner and/or employee

Signature of owner and/or employee

Date

PART 6 - SECURITY, FINANCIAL AND INSURANCE REQUIREMENTS

1. Security Requirement

1. Before issuance of a standing offer, the following conditions must be met:
 - (a) the Offeror must hold a valid organization security clearance as indicated in Part 7A - Standing Offer;
 - (b) the Offeror's proposed individuals requiring access to classified or protected information, assets or sensitive work site(s) must meet the security requirement as indicated in Part 7A - Standing Offer;
 - (c) the Offeror must provide the name of all individuals who will require access to classified or protected information, assets or sensitive work sites;
2. Offerors are reminded to obtain the required security clearance promptly. Any delay in the issuance of a standing offer to allow the successful offeror to obtain the required clearance will be at the entire discretion of the Standing Offer Authority.
3. For additional information on security requirements, offerors should consult the "Security Requirements for PWGSC Bid Solicitations - Instructions for Bidders" (<http://www.tpsgc-pwgsc.gc.ca/app-acq/lc-pl/lc-pl-eng.html#a31>) document on the Departmental Standard Procurement Documents website.

2. Financial Capability

SACC Manual clause M9033T (2011-05-16) Financial Capability

3. Insurance Requirements

The Offeror must provide a letter from an insurance broker or an insurance company licensed to operate in Canada stating that the Offeror, if issued a standing offer as a result of the request for standing offer, can be insured in accordance with the Insurance Requirements specified in Part 7 of this RFSO.

If the information is not provided in the offer, the Standing Offer Authority will so inform the Offeror and provide the Offeror with a time frame within which to meet the requirement. Failure to comply with the request of the Standing Offer Authority and meet the requirement within that time period will render the offer non-responsive.

PART 7 - STANDING OFFER AND RESULTING CONTRACT CLAUSES

A. STANDING OFFER

1. Offer

1.1 The Offeror offers to fulfill the requirement in accordance with the Requirement at Annex "A".

2. Security Requirement

2.1 The following security requirement (SRCL and related clauses) applies and form part of the Standing Offer.

2.2 Security requirement for canadian supplier

1. The Contractor/Offeror must, at all times during the performance of the Contract/Standing Offer, hold a valid Designated Organization Screening (DOS), issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC).

2. The Contractor/Offeror personnel requiring access to PROTECTED information, assets or sensitive work site(s) must EACH hold a valid RELIABILITY STATUS, granted or ap-proved by CISD/PWGSC.

3. The Contractor/Offeror MUST NOT remove any PROTECTED information or assets from the identified work site(s), and the Contractor/Offeror must ensure that its personnel are made aware of and comply with this restriction.

4. Subcontracts which contain security requirements are NOT to be awarded without the prior written permission of CISD/PWGSC.

5. The Contractor/Offeror must comply with the provisions of the:

(a) Security Requirements Check List and security guide (if applicable), attached at Annex H;

(b) Industrial Security Manual (Latest Edition).

3. Standard Clauses and Conditions

All clauses and conditions identified in the Standing Offer and resulting contract(s) by number, date and title are set out in the *Standard Acquisition Clauses and Conditions Manual* (<https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual>) issued by Public Works and Government Services Canada.

3.1 General Conditions

2005 (2012-11-19) General Conditions - Standing Offers - Goods or Services, apply to and form part of the Standing Offer.

3.2 Standing Offers Reporting

The Offeror must compile and maintain records on its provision of goods, services or both to the federal government under contracts resulting from the Standing Offer. This data must include all purchases, including those paid for by a Government of Canada Acquisition Card.

The Offeror must provide this data in accordance with the reporting requirements detailed in Annex "G ", Standing Offers Reporting Periodic Usage Reports. If some data is not available, the reason must be indicated. If no goods or services are provided during a given period, the Offeror must still provide a "nil" report.

Electronic reports must be completed and forwarded, each month to the Standing Offer Authority no later than 15 calendar days after the end of the reporting period.

Such reports must contain the following information:

- (i) the Goods and Services identification number (GSIN);
- (ii) the standing offer number;
- (iii) the supplier name;
- (iv) the reporting period;
- (v) the call-up/contract number for each call-up/contract, including amendments;
- (vi) the client department;
- (vii) the contracting authority (not the Standing Offer authority);
- (viii) the date of the call-up/contract;
- (ix) the call-up/contract period;
- (x) the services provided;
- (xi) the value of the call-up/contract, Goods or Services Tax/Harmonized Sales Tax included, as applicable.

Offerors are requested to indicate separately the content of each call-up and its object (category of service). For example, if a call up was for clerks and another for an engineer, a separate line item is requested.

All data fields of the report must be completed as requested.

4. Term of Standing Offer

4.1 Period of the Standing Offer

The period for making call-ups against the Standing Offer is from _____ to _____ (*will be indicated in the Standing offer document*).

4.2 Extension of Standing Offer

If the Standing Offer is authorized for use beyond the initial period, the Offeror offers to extend its offer for an additional _____ period, from _____ to _____ (*will be indicated in the Standing offer document*) under the same conditions and at the rates or prices specified in the Standing Offer, or at the rates or prices calculated in accordance with the formula specified in the Standing Offer.

The Offeror will be advised of the decision to authorize the use of the Standing Offer for an extended period by the Standing Offer Authority 30 calendar days before the expiry date of the Standing Offer. A revision to the Standing Offer will be issued by the Standing Offer Authority.

5. Authorities

5.1 Standing Offer Authority

The Standing Offer Authority is:

Name: Benmoussa Benshila
Title: Supply Specialist
Public Works and Government Services Canada
Acquisitions Branch
Place Bonaventure, South-East Portal, Suite 7300
800 de La Gauchetière Street West
Montreal, Qc
H5A 1L5
E-mail: benmoussa.benshila@pwgsc-tpsgc.gc.ca
Telephone: 514-496-3474
Fax: 514-496-3822

The Standing Offer Authority is responsible for the establishment of the Standing Offer, its administration and its revision, if applicable. Upon the making of a call-up, as Contracting Authority, he is responsible for any contractual issues relating to individual call-ups made against the Standing Offer by any Identified User.

5.2 Project Authority

The Project Authority for the Standing Offer is identified in the call-up against the Standing Offer.

The Project Authority is the representative of the department or agency for whom the Work will be carried out pursuant to a call-up against the Standing Offer and is responsible for all the technical content of the Work under the resulting Contract.

5.3 Offeror's Representative

Name: _____

Title: _____

Organization: _____

Address: _____

Telephone: ____ - ____ - _____

Facsimile: ____ - ____ - _____

E-mail address: _____

6. Proactive Disclosure of Contracts with Former Public Servants

By providing information on its status, with respect to being a former public servant in receipt of a Public Service Superannuation Act (PSSA) pension, the Contractor has agreed that this information will be reported on departmental websites as part of the published proactive disclosure reports, in accordance with Contracting Policy Notice: 2012-2 of the Treasury Board Secretariat of Canada.

7. Identified Users

The Identified Users authorized to make call-ups against the Standing Offer include any government department, agency or Crown corporation listed in Schedules I, I.1, II, III, of the *Financial Administration Act*, R.S., 1985, c. F-11.

8. Call-up Procedures

Call-up procedure is detailed in Annex "E" Call-up Procedure.
The right of first refusal applies to this Standing Offer

9. Call-up Instrument

The Work will be authorized or confirmed by the Identified User(s) using form PWGSC-TPSGC 8251, Call-up against a standing offer for temporary help services.

10. Limitation of Call-ups

Individual call-ups against the Standing Offer must not exceed **\$100,000** (which includes all subsequent amendments, travel/living expenses, overtime and GST/HST) **OR 48 consecutive weeks**, whichever comes first. A call-up can be extended by an additional 24 consecutive weeks but must have the prior approval of PWGSC.

11. Priority of Documents

If there is a discrepancy between the wording of any documents that appear on the list, the wording of the document that first appears on the list has priority over the wording of any document that subsequently appears on the list.

- a) the call up against the Standing Offer, including any annexes;
- b) the articles of the Standing Offer;
- c) the general conditions 2005 (2012-11-19), General Conditions - Standing Offers - Goods or Services;
- d) the general conditions 2035 (2013-06-27), General Conditions - Higher Complexity - Services
- e) Annex A, Requirement;
- f) Annex B, Basis of Payment;
- g) Annex C, Description of Temporary Help Services Categories and Annex 1, Statement of Work;
- h) Annex D, Standards and Duties with Respect to Tests;
- i) Annex E, Call-up Procedure;
- j) Annex F, Instructions for designated users;
- k) Annex G, Standing Offers Reporting Periodic Usage Reports;
- l) Annex H, Security Requirements Checklist (SRCL);
- m) Annex I, Correctional Service of Canada (CSC) Form;
- n) Annex J, PWGSC-TPSGC 229 Form;
- o) the Offeror's offer dated _____ .

12. Certifications

12.1 Compliance

Compliance with the certifications and related documentation provided by the Offeror is a condition of authorization of the Standing Offer and subject to verification by Canada during the term of the Standing Offer and of any resulting contract that would continue beyond the period of the Standing Offer. In the event that the Offeror does not comply with any certification, provide the related documentation or if it is determined that any certification made by the Offeror in its offer is untrue, whether made knowingly or unknowingly, Canada has the right to terminate any resulting contract for default and set aside the Standing Offer.

12.2 SACC Manual Clauses

SACC Manual clause M3060C(2008-05-12), Canadian Content Certification
SACC Manual clause A3000C(2011/05/16), Aboriginal Business Certification

13. Applicable Laws

The Standing Offer and any contract resulting from the Standing Offer must be interpreted and governed, and the relations between the parties determined, by the laws in force in province of Québec.

14. Unsatisfactory services

Should one temporary help resource be deemed unsatisfactory for the mandate, and if Canada has advised the contractor within four (4) hours of the beginning of the mandate, Canada will not be responsible for the payment of the service for this period.

Should the notice be made after the first four hours, the contractor must proceed to change the resource within five working days.

For a given requirement, should the designated user reject 4 employees of the contractor for a valid reason, the designated user may contact the next contractor in line following the order of priority.

Should the contractor deliver poor services or resources that are not qualified, the designated users will contact the Standing Offer Authority to provide details, and the contractor will be advised.

Three (3) separate complaints from any designated user to the Standing Offer Authority that are evaluated to be grounded and documented may lead to the withdrawal of the Contractor from the Catalog.

B. RESULTING CONTRACT CLAUSES

The following clauses and conditions apply to and form part of any contract resulting from a call-up against the Standing Offer.

1. Requirement

The Contractor must perform the Work described in the call-up against the Standing Offer.

2. Standard Clauses and Conditions

2.1 General Conditions

2035 (2013-06-27), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

Section 17 Interest on Overdue Accounts, of 2035 (2013-06-27), General Conditions - Higher Complexity - Services will not apply to payments made by credit cards at point of sale.

Add, under article 30, Termination for Convenience, of 2035 (2013-06-27), General Conditions - Higher Complexity - Services:

"5. If the notice of termination given pursuant to subsection 1 is provided at least 2 opening days before the beginning of the contract period, Canada will not have to pay for the contract."

3. Term of Contract

3.1 Period of the Contract

The Work must be completed in accordance with the call-up against the Standing Offer.

4. Proactive Disclosure of Contracts with Former Public Servants

By providing information on its status, with respect to being a former public servant in receipt of a Public Service Superannuation Act (PSSA) pension, the Contractor has agreed that this information will be reported on departmental websites as part of the published proactive disclosure reports, in accordance with Contracting Policy Notice: 2012-2 of the Treasury Board Secretariat of Canada.

5. Payment

5.1 Basis of Payment - Limitation of Expenditure

The Contractor will be reimbursed for the costs reasonably and properly incurred in the performance of the Work, as determined in accordance with the Basis of Payment in Annex B, Basis of Payment and Annex 2, Pricing, to a limitation of expenditure of \$ 100,000.00. Customs duties and applicable taxes are included.

5.2 Limitation of Expenditure

1. Canada's total liability to the Contractor under the Contract must not exceed the amount of the call-up. Customs duties and applicable taxes will be specified in the call-up.

2. No increase in the total liability of Canada or in the price of the Work resulting from any design changes, modifications or interpretations of the Work, will be authorized or paid to the Contractor unless these design changes, modifications or interpretations have been approved, in writing, by the Contracting Authority before their incorporation into the Work. The Contractor must not perform any work or provide any service that would result in Canada's total liability being exceeded before obtaining the written approval of the Contracting Authority. The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum:

- a. when it is 75 percent committed, or
 - b. four (4) months before the contract expiry date, or
 - c. as soon as the Contractor considers that the contract funds provided are inadequate
- for the completion of the Work, whichever comes first.

3. If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Provision of such information by the Contractor does not increase Canada's liability.

5.3 Monthly Payment

SACC Manual clause H1008C (2008-05-12) Monthly Payment

5.4 SACC Manual Clauses

A9117C (2007-11-30) T1204 - Direct Request by Customer Department
 C0711C (2008-05-12) Time Verification
 C2604C (2013-04-25) Customs Duties, Excise Taxes and Applicable Taxes - Non-resident
 C2000C (2007-11-30) Taxes - Foreign-based Contractor

5.5 Payment by Credit Card

The following credit cards are accepted: _____ and _____.

6. Invoicing Instructions

1. The Contractor must submit invoices in accordance with the section entitled "Invoice Submission" of the general conditions. Invoices cannot be submitted until all work identified in the invoice is completed.

Each invoice must be supported by:

- a. a copy of time sheets to support the time claimed;
- b. a copy of the release document and any other documents as specified in the Contract;
- c. a copy of the invoices, receipts, vouchers for all direct expenses, and all travel and living expenses.

2. Invoices must be distributed as follows:

a. The original and one (1) copy must be forwarded to the address shown on page 1 of the Contract for certification and payment.

b. One (1) copy must be forwarded to the Contracting Authority identified under the section entitled "Authorities" of the Contract.

7. Insurance

SACC Manual clause G1005C (2008-05-12) Insurance

8. SACC Manual Clauses

A2000C (2006-06-16) Foreign Nationals (Canadian Contractor)
 A2001C (2006-06-16) Foreign Nationals (Foreign Contractor)
 A9062C (2011-05-16) Canadian Forces Site Regulations
 A9068C (2010-01-11) Government Site Regulations

- ♦ Providing general clerical support including data inputting, processing and updating, routing correspondence, maintaining Bring-Forward (BF) systems, answering the telephone, operating telephone switching systems and taking messages
- ♦ Performing document and file management functions, including e-filing
- ♦ Photocopying, faxing and scanning documents

Senior

Tasks include providing client service related to client accounts in addition to providing administrative support to accounting staff.

Typical duties may include:

- ♦ Retrieving financial data
- ♦ Coding and auditing invoices
- ♦ Reconciliation of accounts with general ledger
- ♦ Preparing period statements, cost statements and reports
- ♦ Calculating costs of materials, overhead and other expenses based on estimates, quotations, or price lists

Minimum Mandatory Qualifications:

Education:

- ♦ Secondary school diploma or an acceptable combination of education, training and experience is required

Experience:

- ♦ Minimum of three (3) years of relevant experience is required

Asset Qualifications:

- ♦ Successful completion of post-secondary program courses in business, accounting or related field from a recognized post secondary institution or an acceptable combination of education, training and experience may be required

Classification: Clerk, Sub-Classification - Accounting

An Accounting Clerk's main task is to process information related to the daily financial operations of the department or agency by manual, written, verbal or electronic means. Skills and abilities required include familiarity with general office procedures, the use of standard office equipment and software (Windows XP, Word, Excel, etc.), accounting software, the ability to communicate effectively orally and in writing and abilities in general accounting and mathematics.

Major Duties:

- ♦ Calculating, preparing and issuing documents related to accounts such as bills, invoices, inventory reports, account statements and other financial statements using computerized and manual systems
- ♦ Coding, totalling, batching, entering, verifying and reconciling transactions such as accounts payable and receivable, payroll, purchase orders, cheques, invoices cheque requisitions, and bank statements in a ledger or computer system or both
- ♦ Providing general clerical support including data inputting, processing and updating, routing correspondence, maintaining Bring-Forward (BF) systems, answering the telephone, operating telephone switching systems and taking messages
- ♦ Performing document and file management functions, including e-filing
- ♦ Photocopying, faxing and scanning documents

Advanced

Tasks include providing client service related to client accounts, providing administrative support to accounting staff and providing guidance regarding work completed by other clerical support staff.

Typical duties may include:

- ♦ Retrieving financial data
- ♦ Coding and auditing invoices
- ♦ Reconciliation of accounts with general ledger
- ♦ Preparing period statements, cost statements and reports
- ♦ Calculating costs of materials, overhead and other expenses based on estimates, quotations, or price lists
- ♦ Providing advice and administration support in areas of finance and budgeting
- ♦ Coordinating and preparing all aspects of financial and budget administration
- ♦ Preparing financial statements
- ♦ Verifying and balancing transactions

Minimum Mandatory Qualifications:

Education:

- ♦ Secondary school diploma or an acceptable combination of education, training and experience is required

Experience:

- ♦ Minimum of five (5) years of relevant experience is required

Asset Qualifications:

- ♦ Certificate, diploma, or degree in business, accounting or related field from a recognized post secondary institution or an acceptable combination of education, training and experience may be required
- ♦ Experience with Government Financial System (GFS) may be required

Classification: Clerk, Sub-Classification - Access to Information & Privacy (ATIP)

ATIP Clerks compile, verify, record and process forms and documents by manual, written, verbal or electronic means, in accordance with established procedures, guidelines and schedules. Skills and abilities required include familiarity with general office procedures, the use of standard office equipment and software (Windows XP, Word, Excel, Access, RDIMS, etc.) and the ability to communicate effectively orally and in writing.

Major Duties:

- ♦ Providing general clerical support including input, processing and updating of data
- ♦ Routing correspondence and maintaining Bring-Forward (BF) systems
- ♦ Answering the telephone, operating telephone switching systems and taking messages
- ♦ Performing document and file management functions, including e-filing
- ♦ Photocopying, faxing, and scanning documents
- ♦ Preparing correspondence, reports, statements and other material

Junior

Duties include the performance of routine, repetitive tasks involving a number of clearly defined procedures and instruction. Work performed will be subject to review while in progress and the THS Resource will report to a more senior clerical level.

Typical duties may include:

- ♦ Entering of data
- ♦ Filing, e-filing and retrieval of documents
- ♦ Addressing and filling envelopes
- ♦ Photocopying, faxing, and scanning documents
- ♦ Entering data in databases, spreadsheets, and inventories
- ♦ Collating, separating and organizing documents
- ♦ Distributing mail

Minimum Mandatory Qualifications:**Education:**

- ♦ Successful completion of two years of secondary school or an acceptable combination of education, training and experience is required

Intermediate

Duties include providing assistance to more senior staff in the completion of various tasks. Work performed is subject to review while in progress.

Typical duties may include:

- ♦ Assisting in the preparation of correspondence, reports, statements and other documents
- ♦ Assisting in the processing of applications and forms
- ♦ Assisting in the maintenance of records
- ♦ Processing database, spreadsheet, and inventory information
- ♦ Sending, receiving and distributing internal and external mail
- ♦ Completion of courier forms and the dispatching of couriers

Minimum Mandatory Qualifications:**Education:**

- ♦ Successful completion of two years of secondary school or an acceptable combination of education, training and experience is required

Experience:

- ♦ Minimum of one (1) year of relevant experience is required

Classification: Clerk, Sub-Classification - Access to Information & Privacy (ATIP)

ATIP Clerks compile, verify, record and process forms and documents by manual, written, verbal or electronic means, in accordance with established procedures, guidelines and schedules. Skills and abilities required include familiarity with general office procedures, the use of standard office equipment and software (Windows XP, Word, Excel, Access, RDIMS, etc.) and the ability to communicate effectively orally and in writing.

Major Duties:

- ♦ Providing general clerical support including input, processing and updating of data
- ♦ Routing correspondence and maintaining Bring-Forward (BF) systems
- ♦ Answering the telephone, operating telephone switching systems and taking messages
- ♦ Performing document and file management functions, including e-filing
- ♦ Photocopying, faxing, and scanning documents
- ♦ Preparing correspondence, reports, statements and other material

Senior

The ability to organize tasks and meet deadlines is required. Work performed will be subject to review initially and at completion rather than throughout the process and the THS Resource will report to an Administrative Officer or Clerical Manager.

Typical duties may include:

- ♦ Collecting, recording, arranging, transmitting and processing information
- ♦ Processing invoices, expenditures, receipts and other financial information
- ♦ Processing applications and forms
- ♦ Drafting correspondence, reports, statements and other documents
- ♦ Updating, adding and retrieving documents using the Intranet system
- ♦ Maintaining inventories, databases and records
- ♦ Assisting in the control of stationery and office supplies inventory
- ♦ Assisting in the maintenance of office equipment
- ♦ Sending, receiving and distributing internal and external mail

Minimum Mandatory Qualifications:**Education:**

- ♦ Successful completion of two years of secondary school or an acceptable combination of education, training and experience is required

Experience:

- ♦ Minimum of three (3) years of relevant experience is required

Advanced

The ability to plan, organize work, prioritize tasks and meet conflicting deadlines is required. Work performed will be subject to review upon completion and the THS Resource will report to an Administrative Officer or Clerical Manager.

Typical duties may include:

- ♦ Editing, proofreading, and finalizing correspondence, reports, statements, invoices, forms, presentations and other documents
- ♦ Verifying applications, receipts, expenditures, forms and other documents
- ♦ Maintaining and controlling stationery and office supplies inventory
- ♦ Maintaining office equipment and arranging for service
- ♦ Organizing and co-ordinating the flow of work for general office and data entry clerks

Minimum Mandatory Qualifications:**Education:**

- ♦ Secondary school diploma or an acceptable combination of education, training and experience is required

Experience:

- ♦ Minimum of five (5) years of relevant experience is required

Asset Qualifications:

- ♦ Experience working with confidential and secure information may be required

Classification: Clerk, Sub-Classification - Compensation

Classification: Clerk, Sub-Classification - Human Resources

An HR Clerk's main task is to provide support services for human resource activities as carried out by managers and Human Resources Officers. Skills and abilities required include familiarity with general office procedures, the use of standard office equipment and software (Windows XP, Word, Excel, etc.) along with strong communication skills, and the ability to organize and prioritize their own workload.

The position may also require specialization in one discipline (classification, compensation, employment equity, labour relations, planning, staffing or training and development) or it may involve generalist duties.

Major Duties

- ♦ Processing, verifying and registering documentation related to human resources activities
- ♦ Filing, e-filing and retrieving documents
- ♦ Providing general clerical support including data inputting, processing and updating, routing correspondence, maintaining Bring-Forward (BF) systems
- ♦ Answering the telephone, operating telephone switching systems and taking messages
- ♦ Performing document and file management functions, including e-filing
- ♦ Photocopying, faxing, and scanning documents

Junior

Duties include the performance of routine, repetitive tasks of medium complexity involving a limited number of clearly defined procedures and instructions.

Typical duties may include:

- ♦ Responding to inquiries from employees or the general public or both concerning employment opportunities, status of staffing processes, basic compensation and benefits information, etc.
- ♦ Obtaining and verifying information for employee records
- ♦ Providing forms and documents upon request, such as benefits manuals or claim forms, employment applications, leave requests, training applications, etc.
- ♦ Assisting in the preparation of documents such as job postings and descriptions, letters of offer, letters of acknowledgement, organizational charts, and training materials
- ♦ Participating in the screening of candidates by obtaining further information or verifying credentials, when directed

Minimum Mandatory Qualifications:

Education:

- ♦ Secondary school diploma or an acceptable combination of education, training and experience is required

Classification: Clerk, Sub-Classification - Human Resources

An HR Clerk's main task is to provide support services for human resource activities as carried out by managers and Human Resources Officers. Skills and abilities required include familiarity with general office procedures, the use of standard office equipment and software (Windows XP, Word, Excel, etc.) along with strong communication skills, and the ability to organize and prioritize their own workload.

The position may also require specialization in one discipline (classification, compensation, employment equity, labour relations, planning, staffing or training and development) or it may involve generalist duties.

Major Duties

- ♦ Processing, verifying and registering documentation related to human resources activities
- ♦ Filing, e-filing and retrieving documents
- ♦ Providing general clerical support including data inputting, processing and updating, routing correspondence, maintaining Bring-Forward (BF) systems
- ♦ Answering the telephone, operating telephone switching systems and taking messages
- ♦ Performing document and file management functions, including e-filing
- ♦ Photocopying, faxing, and scanning documents

Intermediate

Experience within the position's specialized area of human resources may be required. Knowledge of, or experience with, SAP and a Human Resource Management System (HRMS) may be required.

Typical duties may include:

- ♦ Preparing documents such as job postings and descriptions, letters of offer, letters of acknowledgement, organizational charts, and training materials
- ♦ Assisting Managers and HR Officers in completing rating guides after conducting interviews
- ♦ Assisting in the creation of Statements of Merit Criteria, rating guides, etc.
- ♦ Arranging and administering Public Service Commission tests
- ♦ Maintaining confidential documents, such as compensation records, employment histories, training records, performance evaluations and grievances
- ♦ Coordinating on-site job analysis and interviews with managers, employees and external consultants for classification purposes
- ♦ Arranging for job postings on the Internet through the Public Service Commission
- ♦ Assisting in screening and rating of job applicants, conducting reference checks
- ♦ Assisting in the administration of priorities through the Public Service Commission

Minimum Mandatory Qualifications:

Education:

- ♦ Secondary school diploma is required
- ♦ Successful completion of post-secondary courses in Human Resources, Industrial Relations, Labour Relations, Staff Relations, Business Administration or related discipline; or training, workshops or experience in a field related to the position is required

Experience:

- ♦ Minimum of three (3) years of relevant experience is required

Classification: Clerk, Sub-Classification - Human Resources

An HR Clerk's main task is to provide support services for human resource activities as carried out by managers and Human Resources Officers. - ♦ Answering the telephone, operating telephone switching systems and taking messages
- ♦ Performing document and file management functions, including e-filing
- ♦ Photocopying, faxing, and scanning documents

Senior

Experience relating to the specialized area of human resources as well as advanced knowledge of, or experience with, SAP and a Human Resource Management System (HRMS) may be required.

Typical duties may include:

- ♦ Verifying documents such as job postings and job descriptions prior to submission to translation services or the Public Service Commission (PSC) for web posting
- ♦ Preparing and distributing documents, including letters of offer, letters of acknowledgement, organizational charts, and training materials
- ♦ Assisting Managers and HR Officers in conducting reference checks, verifying information in resumes and identifying discrepancies in the information collected
- ♦ Compiling and tabulating statistics to support compensation and benefits practices, such as leave records and administration of salary increases
- ♦ Starting and maintaining confidential records, such as compensation records, employment histories, training records, performance evaluations and grievances
- ♦ Participating in the screening of employment candidates by conducting and evaluating reference checks, obtaining further information or verifying information in resumes, and identifying discrepancies in the information collected
- ♦ Assisting Managers and HR Officers in conducting employee orientation and information sessions

Minimum Mandatory Qualifications:

Education:

- ♦ Secondary school diploma is required
- ♦ Certificate, diploma, or degree in Human Resources, Industrial Relations, Labour Relations, Staff Relations, Business Administration or related discipline from a recognized post secondary institution or an acceptable combination of education, training and experience is required

Experience:

- ♦ Minimum of five (5) years of relevant experience is required

Asset Qualifications:

- ♦ Demonstration of continuous advancement towards obtaining certification as a Human Resources Professional (CHRP) may be required.

Classification: Clerk, Sub-Classification - Legal

Legal clerks are employed in a variety of legal practice areas within the federal government including civil litigation, criminal prosecutions, tax law, property law, advisory services, and legislative drafting. Legal clerks assist in preparing for and attending hearings, legal research, interviewing witnesses, managing evidence and drafting legal documents. The THS Resource will work as part of a multi-disciplinary team that may include counsel, information technology specialists and other experts. The demonstration of applied and current knowledge of military and criminal jurisprudence and practice, as well as law and practice under other federal statutes, in order to apply precedents and legal principles to particular case situations is required. Skills and abilities required include familiarity with general office procedures, the use of standard office equipment and software (Windows XP, Word, Excel, RDIMS, etc.).

Major Duties:

- ♦ Providing general legal support of a clerical nature, including data inputting, processing and updating, and routing correspondence
- ♦ Maintaining a Bring-Forward (BF) system encompassing various stages of litigation
- ♦ Answering the telephone, operating telephone switching systems and taking messages
- ♦ Performing document and file management functions, including e-filing
- ♦ Photocopying, faxing, and scanning documents
- ♦ Assembling documentary evidence, preparing trial briefs, and arranging for trials
- ♦ Assisting lawyers by interviewing clients, witnesses and other related parties
- ♦ Researching records, court files and other legal documents
- ♦ Preparing correspondence, reports, statements and other material

Junior

In order to provide a consistent level of service while adhering to time limitation deadlines imposed by statutes and court rules, familiarity with the theories, principles and procedures of the Canadian Parliamentary and Canadian court systems is required.

Typical duties may include:

- ♦ Conducting legal and factual research upon request
- ♦ Preparing a variety of legal documents (e.g. Orders, Motions, Affidavits, and applications for the prosecutors, etc.)
- ♦ Assisting in the formatting documents in the proper format for the regions and legal services in prosecution matters
- ♦ Registering and assigning dockets to appropriate lawyer
- ♦ Compiling and coordinating trials and appeal reports
- ♦ Ensuring that the information contained in each file is complete and accurate at each stage of criminal litigation process before forwarding it for further action
- ♦ Reporting to and answering queries from investigators, defence counsel, crown and senior counsels, support staff, and the general public in relation to case files

Minimum Mandatory Qualifications:

Education:

- ♦ Secondary school diploma or an acceptable combination of education, training and experience is required

Asset Qualifications:

- ♦ Successful completion of courses, from a recognized post secondary institution related to administration in a legal environment or an acceptable combination of education, training, and experience may be required

Classification: Clerk, Sub-Classification - Legal

Legal clerks are employed in a variety of legal practice areas within the federal government including civil litigation, criminal prosecutions, tax law, property law, advisory services, and legislative drafting. Legal clerks assist in preparing for and attending hearings, legal research, interviewing witnesses, managing evidence and drafting legal documents. The THS Resource will work as part of a multi-disciplinary team that may include counsel, information technology specialists and other experts. The demonstration of applied and current knowledge of military and criminal jurisprudence and practice, as well as law and practice under other federal statutes, in order to apply precedents and legal principles to particular case situations is required. Skills and abilities required include familiarity with general office procedures, the use of standard office equipment and software (Windows XP, Word, Excel, RDIMS, etc.).

Major Duties:

- ♦ Providing general legal support of a clerical nature, including data inputting, processing and updating, and routing correspondence
- ♦ Maintaining a Bring-Forward (BF) system encompassing various stages of litigation
- ♦ Answering the telephone, operating telephone switching systems and taking messages
- ♦ Performing document and file management functions, including e-filing
- ♦ Photocopying, faxing, and scanning documents
- ♦ Assembling documentary evidence, preparing trial briefs, and arranging for trials
- ♦ Assisting lawyers by interviewing clients, witnesses and other related parties
- ♦ Researching records, court files and other legal documents
- ♦ Preparing correspondence, reports, statements and other material

Intermediate

Familiarity with the Canadian legal process is required to facilitate the analysis of and response to various requests for assistance. The work performed will be subject to little or no review.

Typical duties may include:

- ♦ Managing ad hoc file assignments of daily events in relation to court and counsel
- ♦ Requesting additional files or information where required
- ♦ Ensuring that all files have been properly screened prior to counsel's receipt of documentation

Minimum Mandatory Qualifications:

Education:

- ♦ Secondary school diploma is required

Experience:

- ♦ Minimum of three (3) years of experience as a law clerk is required

Asset Qualifications:

- ♦ Certificate, diploma, or degree related to administration in a legal environment from a recognized post secondary institution or an acceptable combination of education, training and experience may be required
- ♦ Experience as a law clerk within the federal government may be required

Classification: Clerk, Sub-Classification - Legal

Legal clerks are employed in a variety of legal practice areas within the federal government including civil litigation, criminal prosecutions, tax law, property law, advisory services, and legislative drafting. Stream 3 ~ Operational Services

Classification: Building Technician	
A building technician's main duties involve performing routine maintenance jobs such as general landscaping, painting, and various types of minor repairs.	
Intermediate	<p>Duties include the performance of routine, repetitive tasks of low complexity involving a limited number of clearly defined procedures and instructions. Tasks include the cleaning and maintenance of the interior and exterior of commercial, institutional and residential buildings and their surrounding grounds.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Washing windows, interior walls and ceilings ♦ Clearing snow and ice from walkways and parking areas ♦ Performing landscaping tasks ♦ Cleaning and disinfecting washrooms and fixtures ♦ Performing minor repairs of HVAC, plumbing, electrical systems, etc. ♦ Moving furniture, equipment or supplies <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of one (1) year of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - WHMIS, fall protection, manual material handling, personal protective equipment, rights of the workers, confined spaces, first-aid at the emergency level ♦ Training in heating, ventilation and air conditioning (HAC) may be required
Senior	<p>Duties include the performance of more complex, repetitive tasks including the coordination of duties performed by junior building techs. Work performed does not require supervision.</p> <p>Typical Duties may include:</p> <ul style="list-style-type: none"> ♦ Performing cleaning tasks ♦ Performing landscaping tasks ♦ Monitoring and performing more complex repairs and maintenance of HVAC and plumbing systems ♦ Moving furniture, equipment, supplies, etc. ♦ Ensuring that the appropriate security and safety measures are in place <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Successful completion of training in HVAC (Heating, Ventilation and Air Conditioning) from a recognized post secondary institution, is required ♦ Current and valid Health and Safety Certification - Part One (Health and Safety Representative) is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - WHMIS, fall protection, manual material handling, personal protective equipment, rights of the workers, powered elevated work platforms, confined spaces, first-aid (standard level), custodial training

Classification: Building Superintendents	
A building superintendent's duties include overseeing routine maintenance and repair jobs.	
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Ensuring security and safety measures are in place and are followed ♦ Making adjustments and minor repairs to heating, cooling, ventilating, plumbing and electrical systems ♦ Contacting appropriate service provider for major repairs ♦ Assisting in the coordination of repair activities with those of other departments ♦ Assisting in the adherence to a budget and keeping financial records <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - WHMIS, fall protection, manual material handling, personal protective equipment, rights of the workers, confined spaces, first-aid at the emergency level ♦ Successful completion of training in HVAC (Heating, Ventilation and Air Conditioning) from a recognized post secondary institution may be required ♦ Current Building Operator Certification to level I or II may be required ♦ Certificate, diploma, or degree in Occupational Health & Safety from a recognized post secondary institution may be required
Advanced	<p>Duties will include involvement in planning, organizing, co-ordinating activities within a maintenance department.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Co-ordinating the activities of external workers engaged in bricklaying, roofing, cement finishing, tile setting, plastering, drywall installation, glazing, insulating, painting, etc. ♦ Requisitioning materials and supplies ♦ Providing or arranging appropriate safety training for staff ♦ Ensuring safety legislation and regulations are followed ♦ Inspecting sites or facilities to ensure established safety and cleanliness standards are met ♦ Recommending or arranging additional services required such as painting, repair work, renovations, replacement of furnishings and equipment, etc. ♦ Coordinating the work of light duty, industrial or specialized cleaners, janitors, apprentices and labourers ♦ Preparing work schedule and coordinating activities with those of other departments ♦ Preparing budgets and keeping financial records <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of five (5) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - WHMIS, fall protection, manual material handling, personal protective equipment, rights of the workers, confined spaces, first-aid at the emergency level ♦ Successful completion of training in HVAC (Heating, Ventilation and Air Conditioning) from a recognized post secondary institution may be required ♦ Current Building Operator Certification to level I or II may be required ♦ Certificate, diploma, or degree in Occupational Health & Safety from a recognized post secondary institution may be required

Classification: Construction Site Coordinator	
<p>A construction site coordinator's main duties involve reading blue prints, setting priorities, managing contractors and troubleshooting. Skills include the ability to succeed in stressful situations and the ability to manage conflicts. Awareness of current trends in construction methods, concepts and technological advances in the industry is required.</p>	
Intermediate	<p>Duties involve coordinating and managing specific activities performed by external construction trades, specific phases of construction or sub-projects.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Interpretation of blue prints and setting of priorities ♦ Managing external contractors related to specific activities, phase or sub-project ♦ Reporting of any problems (technical or safety related) to the senior Construction Site Administrator <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Successful completion of two years of secondary school or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of five (5) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - WHMIS, fall protection, manual material handling, housekeeping, personal protective equipment, traffic control for road and pedestrians, elevated work platforms, scaffold erection, confined spaces, fire extinguisher and first-aid at the emergency level ♦ Certificate, diploma, or degree in Occupational Health & Safety from a recognized post secondary institution may be required
Advanced	<p>Duties involve complex coordinating and management activities, pertinent to a complete project, performed by external construction trades.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Interpreting blue prints and setting of priorities ♦ Managing contractors and troubleshooting ♦ Supervising different external trades on site ♦ Attending meetings as required by PWGSC ♦ Providing solutions for minor disputes with or between contractors ♦ Identifying problems and providing viable solutions ♦ Performing inspections of work performed <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of ten (10) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - for WHMIS, fall protection, manual material handling, housekeeping, personal protective equipment, traffic control for road and pedestrians, powered elevated work platforms, scaffold erection, confined spaces, fire extinguisher and first-aid at the emergency level ♦ Certificate, diploma, or degree in Occupational Health & Safety from a recognized post secondary institution may be required

Classification: General Labourer	
A general labourer's include construction work, scaffolding, demolition, heavy labour, shovelling, chipping, and assisting trade workers in the performance of daily duties.	
Junior	<p>Duties include the performance of routine, repetitive tasks of low complexity involving a limited number of clearly defined procedures and instructions. Limited knowledge or experience relating to the work to be performed is required as the work will be closely supervised and directed. Tools are provided to the THS Resource.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Performing basic demolition, site clean-up and other basic construction work ♦ Handling material ♦ Snow removal, landscaping, grounds keeping ♦ Assisting trade workers <p>The THS Resource will not be:</p> <ul style="list-style-type: none"> ♦ Required to work at heights above 4 feet ♦ Required to use electrical or motorized equipment <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma or an acceptable combination of education, training and experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - WHMIS, fall protection, manual material handling, personal protective equipment, rights of the workers and first-aid at the emergency level
Intermediate	<p>Duties include the performance of routine, repetitive tasks of higher complexity involving a limited number of clearly defined procedures and instructions. Decent knowledge and experience relating to the work to be performed is required, as the work will be performed with minimal supervision. The THS Resource is required to supply their own basic tools such as a hammer, pouch, measuring tape, cutting tools, etc.</p> <p>Typical Duties may include:</p> <ul style="list-style-type: none"> ♦ Performing construction work involving scaffolding, demolition, heavy labor, shoveling, chipping etc. ♦ Working at heights above 10 feet ♦ Using basic electrical tools ♦ Using basic motorized equipment (if certified in the use of the equipment in question) <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of one (1) year of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required: WHMIS, fall protection, manual material handling, personal protective equipment, rights of the workers, traffic control for road and pedestrians, powered elevated work platforms, scaffold erection, confined spaces, first-aid (emergency level) ♦ Current forklift certification level I or II may be required

Classification: General Labourer	
A general labourer's include construction work, scaffolding, demolition, heavy labour, shovelling, chipping, and assisting trade workers in the performance of daily duties.	
Senior	<p>Duties include the performance of routine, repetitive tasks of higher complexity involving a limited number of clearly defined procedures and instructions. Significant knowledge and experience relating to the work to be performed is required, as the work will be performed with minimal or no supervision. The THS Resource is required to supply their own basic tools such as a hammer, pouch, measuring tape, cutting tools, etc.</p> <p>Typical Duties may include:</p> <ul style="list-style-type: none"> ♦ Performing construction work involving scaffolding, taping, using cutting tools (including torches), etc. ♦ Working at heights above 10 feet, rooftops, etc. ♦ Using basic electrical tools ♦ Using basic motorized equipment (if certified in the use of the equipment in question) ♦ Performing material handing tasks <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required: WHMIS, fall protection, manual material handling, personal protective equipment, rights of the workers, traffic control for road and pedestrians, powered elevated work platforms, scaffold erection confined spaces training, and first-aid (standard level)

Classification: Trade Helper	
A trade helper's main duties involve assisting certified trades people in the performance of their duties.	
Intermediate	<p>Duties include the performance of routine, repetitive tasks of higher complexity involving a limited number of clearly defined procedures and instructions. Work will be performed with less direction but with some supervision. The THS Resource is required to supply their own basic tools such as a hammer, measuring tape, and cutting tools.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting journeyman or master trades in the performance of their duties ♦ Working at heights above 10 feet ♦ Using basic electrical or motorized equipment <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Successful completion of two years of secondary school, or; an acceptable combination of education, training and experience is required ♦ Registration as an apprentice, in a recognized program, is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - for WHMIS, fall protection, manual material handling, personal protective equipment, rights of the workers, powered elevated work platforms, scaffold erection, confined spaces and first-aid at the emergency level ♦ Current forklift certification level I or II may be required
Senior	<p>Duties include the performance of routine, repetitive tasks of higher complexity involving a limited number of clearly defined procedures and instructions. Work will be performed with minimal supervision. The THS Resource is required to supply their own basic tools such as a hammer, pouch, measuring tools, and cutting tools.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting journeyman or master trades in the performance of their duties ♦ Working at heights above 10 feet ♦ Using basic electrical or motorized equipment <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma or an acceptable combination of education, training and experience is required ♦ Successful completion of the first three (3) years of a four (4) year apprenticeship, in a recognized program, is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - for WHMIS, fall protection, manual material handling, personal protective equipment, rights of the workers, traffic control for road and pedestrians, powered elevated work platforms, scaffold erection, confined spaces and first-aid at the emergency level ♦ Current forklift certification level I or II may be required

Classification: Stores Services Personnel	
A stores services person's main duties may involve commercial moving, packaging, shipping and receiving, inventory and order control, material handling, printing, mailroom, forklift operations, office installation, quality control, and other industrial duties.	
Junior	<p>Duties include the performance of routine, repetitive tasks of low complexity involving a limited number of clearly defined procedures and instructions. Limited knowledge or experience relating to the work to be performed will be required. Work will be closely supervised and directed.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Moving commercial or government materials ♦ Packaging, shipping and receiving, inventory and order picking ♦ Performing warehouse duties <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Successful completion of two years of secondary school or an acceptable combination of education, training and experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - WHMIS, manual material handling, counter balance equipment personal protective equipment, rights of workers, laceration protection, housekeeping and first-aid at the emergency level
Intermediate	<p>Duties include the performance of routine, repetitive tasks of higher complexity involving a limited number of clearly defined procedures and instructions.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Performing material handling, printing, mailroom, forklift, office installation, office clerk and other industrial duties ♦ Performing warehouse duties <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Successful completion of two years of secondary school or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of one (1) year of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - WHMIS, manual material handling, counter balance equipment, personal protective equipment, rights of workers, laceration protection, housekeeping, fall protection and first-aid at the emergency level ♦ Current forklift certification level I or II may be required

Classification: Stores Services Personnel	
A stores services person's main duties may involve commercial moving, packaging, shipping and receiving, inventory and order control, material handling, printing, mailroom, forklift operations, office installation, quality control, and other industrial duties.	
Senior	<p>Duties include the performance of routine, repetitive tasks of higher complexity involving a limited number of clearly defined procedures and instructions. Work will require minimal or no supervision.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Performing warehouse work involving shipping and receiving, order picking, wrapping, mailroom, moving material, restacking ♦ Operating computers ♦ Operating basic tools, hand tools, wrapping equipment, electric pallet lifts, manual pallet lifts, cherry pickers, forklifts <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma or an acceptable combination of education, training and/or experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - WHMIS, manual material handling, counter balance equipment (forklift and pallet truck), personal protective equipment, rights of workers, laceration protection, housekeeping, fall protection, propane handling and first-aid at the emergency level ♦ Current forklift certification level I or II may be required
Advanced	<p>Duties include the performance of routine, repetitive tasks of higher complexity involving a limited number of clearly defined procedures and instructions and the providing of direction or guidance when necessary. Familiarity with the <i>Occupational Health and Safety Act</i> and the regulations for industrial establishments will be required.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Performing of warehouse work including shipping and receiving, order picking, wrapping, mailroom, moving material, restacking, quality control, administration, and inventory control ♦ Operating computers, basic tools, hand tools, wrapping equipment, electric pallet lifts, manual pallet lifts, cherry pickers and forklifts ♦ Providing guidance or overseeing other workers <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma or an acceptable combination of education, training and/or experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of five (5) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Safety training or current certification in any or all of the following may be required - WHMIS, manual material handling, counter balance equipment (forklift and pallet truck), personal protective equipment, rights of workers, laceration protection, housekeeping, fall protection and propane handling and first-aid at the emergency level ♦ Certificate, diploma, or degree in Occupational Health & Safety from a recognized post secondary institution may be required ♦ Current forklift certification level I or II may be required

Stream 4 Technical Services

Classification: Assembler and Fabricator, Electronics	
Electronics assemblers and fabricators assemble and fabricate electronic equipment, parts, and components.	
Junior	<p>Duties include the performance of routine, repetitive assembly or fabrication tasks of low complexity involving a limited number of clearly defined procedures and instructions. Work is generally reviewed while in progress.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assembling, manually, various electronic components ♦ Installing, mounting, fastening, aligning and adjusting parts, components, wiring and harnesses to subassemblies and assemblies using hand and small power tools ♦ Operating automatic and semi-automatic machines to position, solder and clean prescribed components on printed circuit boards ♦ Setting up, operating and monitoring process equipment including automatic and semi-automatic machines to fabricate electronic components, solder, clean, seal and stamp components and perform other process operations as specified ♦ Replacing defective components ♦ Repairing and overhauling older devices ♦ Using microscopes ♦ Adhering to clean room procedures <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Successful completion of two years of secondary school or an acceptable combination of education, training and experience is required
Intermediate	<p>Duties include the performance of more complex assembly and fabrication tasks.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assembling, manually, various electronic components ♦ Assembling microcircuits requiring fine hand assembly ♦ Installing, mounting, fastening, aligning and adjusting parts, components, wiring and harnesses to subassemblies and assemblies using hand and small power tools ♦ Operating automatic and semi-automatic machines to position, solder and clean prescribed components on printed circuit boards ♦ Setting up, operating and monitoring process equipment including automatic and semi-automatic machines to fabricate electronic components, solder, clean, seal and stamp components and perform other process operations as specified ♦ Replacing defective components ♦ Repairing and overhauling older devices ♦ Using microscopes ♦ Adhering to clean room procedures <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Successful completion of two years of secondary school or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of one (1) year of experience as an electronics assembler or fabricator is required

Classification: Assembler, Mechanical	
Assemblers assemble a wide variety of mechanical products such as trucks, buses, snowmobiles, garden tractors, automotive engines, transmissions, outboard motors, gearboxes, hydraulic pumps and sewing machines.	
Junior	<p>Duties include the performance of routine, repetitive assembly tasks of low complexity involving a limited number of clearly defined procedures and instructions. Work will be reviewed while in progress.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assembling, fitting and installing prefabricated parts to form subassemblies or finishing products using hand or power tools ♦ Positioning, aligning and adjusting parts for proper fit and assembly and connecting cables, tubes and wires ♦ Fastening parts together using bolting and riveting equipment or other fastening and joining techniques or equipment <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Successful completion of two years of secondary school or an acceptable combination of education, training and experience is required
Intermediate	<p>Duties include the performance of more complex assembly.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assembling, fitting and installing prefabricated parts to form subassemblies or finishing products using hand or power tools ♦ Positioning, aligning and adjusting parts for proper fit and assembly and connect cables, tubes and wires ♦ Fastening parts together using bolting and riveting equipment or other fastening and joining techniques ♦ Operating or tending automated assembling equipment such as robotics and fixed automation equipment ♦ Operating small cranes to transport or position larger parts ♦ Reading assembly, schematic or scale (e.g., blueprints) drawings <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Successful completion of two years of secondary school or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of one (1) year of relevant experience is required

Classification: Computer, Application Support	
The Computer Application Support Specialist provides basic technical or web-related support to users. The main tasks are responding to calls and providing accurate responses and installing, maintaining and troubleshooting hardware, software or peripherals at the desktop, network or server level.	
Junior	<p>The Computer Application Support Specialist duties include providing new staff with system orientation as well as contributing to processing and procedural documentation, developing Frequently Asked Questions (FAQ's) to assist users, the installation of applications on new desktops and following asset management practices to track inventory of hardware and software.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Adding new functionality, documenting functionality and changes ♦ Responding to 1st level support calls and providing accurate responses ♦ Opening and closing of trouble tickets ♦ Participating in the maintenance of a knowledge base of problems and solutions ♦ Interfacing with end users on support issues in a professional manner and respond to user demands in a specified time period <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Successful completion of additional courses in computer science or related field, or an acceptable combination of education, training and experience is required
Intermediate	<p>Duties include the installation, maintenance and troubleshooting of desktop computers, laptops and printer hardware and associated software as well as providing remote support for external desktop computer and laptop connections, wireless, and broadband.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Providing problem recognition, isolation, research, resolution and follow-up ♦ Providing 2nd level technical support ♦ Providing systems administration duties such as creating and maintaining network accounts, performing basic security back-ups. ♦ Escalating more complex problems to senior support personnel to expedite resolution ♦ Assisting with the automation of desktop computer build processes and packaging applications ♦ Troubleshooting and resolving network problems ♦ Creating problem and resolution logs for help desk activities ♦ Ensuring technical support issues are resolved in a prompt and efficient manner <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in computer science or other relevant field from a recognized post secondary institution is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of one (1) year experience providing desktop computer support services specifically for PC or Macintosh computers is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Current and valid certification in A+, MCP, or MCSE may be required

Classification: Computer, Application Support	
The Computer Application Support Specialist provides basic technical or web-related support to users. The main tasks are responding to calls and providing accurate responses and installing, maintaining and troubleshooting hardware, software or peripherals at the desktop, network or server level.	
Senior	<p>Duties include the planning or participating in the implementation of a department wide system upgrades, occasional project work, asset management, technical documentation and making recommendations on technology. Extensive experience with analysis phase of the SDLC (System Development Life Cycle), as well as a balanced mix of business and technical knowledge, interviewing and analytical skills is required.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Resolving advanced application support issues ♦ Coordinating emerging technology application specifications ♦ Solving complex end-user technical problems that more junior levels cannot resolve ♦ Serving as a user support liaison between vendors, information systems technicians, and end-user departments ♦ Providing training expertise and direction in the area of emerging technology and special application support ♦ Emulating or reproducing technical problems encountered by users ♦ Providing advice and training to users in response to identified difficulties ♦ Recommending and implementing complex security requirements ♦ Providing business systems, network and Internet support to users in response to identified difficulties ♦ Collecting, organizing and maintaining a problems and solutions log for use by others <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in computer science or other relevant field from a recognized post secondary institution is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Current and valid certification in A+, MCP, or MCSE may be required

Classification: Computer, Application Support	
The Computer Application Support Specialist provides basic technical or web-related support to users. The main tasks are responding to calls and providing accurate responses and installing, maintaining and troubleshooting hardware, software or peripherals at the desktop, network or server level.	
Advanced	<p>Broad technical experience, the ability to handle multiple tasks in a fast-paced environment and proven success working with a great deal of autonomy and providing leadership to the other team members is required. The THS Resource must be able to adjust priorities as needed and work in an "interrupt-driven" work environment and have a natural talent for analyzing problems, developing and simplifying procedures, explaining complex tasks and ideas in an easy to understand manner, and finding innovative, cost-effective solutions.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Verifying accuracy and completeness of work performed ♦ Designing, configuring and deploying server-based file systems and applications ♦ Identifying subtle or overlooked problems and implementing solutions ♦ Diagnosing root cause of software or hardware problems ♦ Identifying, researching, and resolving complex technical problems ♦ Documenting technical changes, upgrades, etc. ♦ Recommending new products or processes which support and enhance the user groups business activities ♦ Responding to client inquiries concerning systems operations and diagnosing system hardware and software issues ♦ Training and mentoring more junior Computer Application Support personnel <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in computer science or other relevant field from a recognized post secondary institution is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of five (5) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Current and valid certification in A+, MCP, or MCSE may be required

Classification: Computer, Website Support	
Computer Website Support includes web maintenance, changing and enhancing websites or providing services such as the development of interfaces to connect web pages to departmental databases.	
Junior	<p>Duties may include the responsibility for Web content conversions; converting complex tables, spreadsheets, charts and images to HTML; following Common Look and Feel and Accessibility standards adhered to in the federal government's day-to-day works.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Performing HTML, DHTML, XML conversions ♦ Performing basic web design ♦ Preparing Word, WordPerfect, PDF, Excel or Quattro Pro Spreadsheets, tables, charts and other documents required for web publishing using applications such as Homesite, Dreamweaver, Adobe Acrobat, Snag it, etc. ♦ Performing changes updates and uploads and maintenance of the departmental web sites <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education;</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Successful completion of additional courses in computer science, web design, or other relevant field, or an acceptable combination of education, training and experience is required
Intermediate	<p>Duties require a strong knowledge of Treasury Board Common Look and Feel guidelines and W3 standards.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Performing HTML, DHTML, XML conversions ♦ Performing more complex web design ♦ Preparing Word, WordPerfect, PDF, Excel or Quattro Pro Spreadsheets, tables, charts and other documents required for web publishing using applications such as Homesite, Dreamweaver, Adobe Acrobat, Snag it, etc. ♦ Performing changes updates and uploads and maintenance of the departmental web sites <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in computer science, web design or other relevant field from a recognized post secondary institution is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of one (1) year of relevant experience is required

Classification: Computer, Website Support	
Computer Website Support includes web maintenance, changing and enhancing websites or providing services such as the development of interfaces to connect web pages to departmental databases.	
Senior	<p>Proficiency in HTML as well as one or more scripting and interface languages such as JavaScript and Perl (Cold Fusion) is required.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Gathering user requirements ♦ Creating functional specifications ♦ Developing new websites ♦ Conducting research on websites for information on best practices <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in computer science, web design or other relevant field from a recognized post secondary institution is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required
Advanced	<p>The ability to handle multiple tasks in a fast-paced environment and proven success working with a great deal of autonomy and providing leadership to the other team members is required. The THS Resource must be able to adjust priorities as needed and be able to analyze problems, explaining complex tasks and ideas in an easy to understand manner, and finding innovative, cost-effective solutions.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Verifying accuracy and completeness of work performed ♦ Providing technical advices to clients regarding web site needs ♦ Coordinating web site development in specialized fields (communication, scientific, etc.) <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in computer science, web design or other relevant field from a recognized post secondary institution is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of five (5) years of relevant experience is required

Classification: Electrician	
<p>Electricians work in commercial, industrial and residential settings, installing, testing and maintaining the electrical wiring infrastructures that supply light, power, air-conditioning and refrigeration. The main tasks are to install wiring systems into new buildings including homes, businesses and factories, and to rewire or upgrade existing electrical systems so that they conform to building codes and other regulations. The electrician must be able to work with wiring schematics and blueprints (which indicate the locations of circuits, outlets, load centers, panel boards, and other equipment) when installing electrical systems. Finally, the electrician will use test equipment to verify proper installation and operation and to confirm that new or repaired installations meet fire and safety code standards.</p>	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the installation, repair and maintenance of electrical systems ♦ Assisting in the testing and troubleshooting of circuits to ensure that systems operate safely <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Registration as an electrical apprentice is required ♦ Entry into a recognized apprenticeship program is required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Installing, repairing and maintaining electrical systems ♦ Reading and interpreting blueprints, schematics and drawings ♦ Interpreting electrical code specifications ♦ Testing and troubleshooting circuits to ensure that systems operate safely <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate of Qualification as a journeyman electrician is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of one (1) year experience as a journeyman electrician is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Installing, repairing and maintaining electrical systems ♦ Reading and interpreting blueprints, schematics and drawings ♦ Interpreting electrical code specifications ♦ Testing and troubleshooting circuits to ensure that systems operate safely ♦ Preparing cost estimates and documentation for clients <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate of Qualification as a journeyman electrician is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years experience as a master electrician is required

Classification: Engineer

Engineers apply established principles drawn from mathematics and science in order to develop economical solutions to technical problems. The work of engineers is the link between perceived social needs and commercial applications. Engineers consider many factors when developing a new product. For example, in developing an industrial robot, engineers precisely specify the functional requirements; design and test the robot's components; integrate the components to produce the final design; and evaluate the design's overall effectiveness, cost, reliability, and safety. This process applies to the development of many different products, such as chemicals, computers, engines, aircraft, and toys.

In addition to design and development, many engineers work in testing, production, or maintenance. These engineers supervise production in factories, determine the causes of component failure, and test manufactured products to maintain quality. They also estimate the time and cost to complete projects.

Engineers use computers extensively to produce and analyze designs; to simulate and test how a machine, structure, or system operates; and to generate specifications for parts. Many engineers also use computers to monitor product quality and control process efficiency.

Classification: Engineer, Sub-Classification - Aerospace	
<p>Aerospace engineers design, develop, test, and supervise production of aircraft, spacecraft, and missiles. Engineers in this classification may also develop new technologies for use in aviation, defence systems, and space exploration, often specializing in areas such as structural design, guidance, navigation and control, instrumentation and communication, or production methods. This type of engineer may also specialize in a particular type of aerospace product, such as commercial aircraft, military fighter jets, helicopters, spacecraft, missiles or rockets. They also may become experts in aerodynamics, thermodynamics, celestial mechanics, propulsion, acoustics, or guidance and control systems.</p>	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the design and development of components used in aerospace vehicles (such as aircraft, spacecraft, missiles and satellites) or systems (such as space-based communication systems) ♦ Assisting in the development of computer simulations of aerospace vehicles, systems and components using advanced mathematical modeling ♦ Assisting in the preparation of specifications for materials and processes to be used in aerospace manufacturing, maintenance, repair or modification ♦ Assisting in the development of operational specifications, maintenance schedules and manuals for operators ♦ Assisting in the development of the technical phases of logistical and operational support for aerospace vehicles and systems ♦ Assisting in the investigation of structural, component or system failures <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent {as determined by one of the agencies referred by the Canadian Information Centre for International Credentials (CICIC)} from a foreign institution, is required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Designing and developing components used in aerospace vehicles (such as aircraft, spacecraft, missiles and satellites) or systems (such as space-based communication systems) ♦ Developing and conducting computer simulations on components used in aerospace vehicles and systems using advanced mathematical modeling ♦ Preparing specifications for materials and processes to be used in aerospace manufacturing, maintenance, repair or modification ♦ Developing operational specifications, maintenance schedules and manuals for operators ♦ Investigating structural or other component or system failures <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred by the CICIC) is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required

Classification: Engineer, Sub-Classification - Aerospace	
<p>Aerospace engineers design, develop, test, and supervise production of aircraft, spacecraft, and missiles. Engineers in this classification may also develop new technologies for use in aviation, defence systems, and space exploration, often specializing in areas such as structural design, guidance, navigation and control, instrumentation and communication, or production methods. This type of engineer may also specialize in a particular type of aerospace product, such as commercial aircraft, military fighter jets, helicopters, spacecraft, missiles or rockets. They also may become experts in aerodynamics, thermodynamics, celestial mechanics, propulsion, acoustics, or guidance and control systems.</p>	
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Designing and developing aerospace vehicles (such as aircraft, spacecraft, missiles and satellites) or systems (such as space-based communication systems) ♦ Developing and conducting computer simulations of complete aerospace vehicles and systems using advanced mathematical modeling ♦ Preparing specifications for materials and processes to be used in aerospace manufacturing, maintenance, repair or modification ♦ Co-ordinating the manufacturing, assembly modification, repair and overhaul of aerospace vehicles or systems ♦ Co-ordinating the ground and flight tests of aerospace vehicles ♦ Developing the technical phases of logistical and operational support for aerospace vehicles and systems ♦ Investigating and reporting on structural or other component or system failures ♦ Providing input into the preparation of tender documents, evaluation of tenders and preparation of contractual documents ♦ Coordinating and administering a wide range of technical endeavors including the planning and scheduling of work <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred by the CICIC) <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of ten (10) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Licensing as a Professional Engineer from a Provincial or territorial association of professional engineers may be considered desirable

Classification: Engineer, Sub-Classification - Architectural	
An Architectural Engineer applies scientific and engineering principles to the design and construction of buildings and building systems. This type of engineer has an interdisciplinary background, encompassing the areas of structural, building mechanical, electrical, lighting, fire protection and construction.	
Junior	<p>Typical duties include:</p> <ul style="list-style-type: none"> ♦ Assisting in the design of buildings or building sections, preparation of specifications ♦ Assisting in the development of models of buildings and building systems ♦ Assisting in the resolution of problems ♦ Assisting in the execution of studies ♦ Writing reports ♦ Performing design drafting <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent {as determined by one of the agencies referred by the Canadian Information Centre for International Credentials (CICIC)} from a foreign institution, is required
Intermediate	<p>Typical duties include:</p> <ul style="list-style-type: none"> ♦ Designing of buildings or building sections, preparation of specifications ♦ Developing of models of buildings and building systems ♦ Performing studies ♦ Performing design drafting ♦ Preparing specifications ♦ Assisting in the operation of pilot projects ♦ Performing quality control functions ♦ Interpreting and evaluating situations and data ♦ Researching problems and developing solutions ♦ Assisting in the planning, scheduling and co-ordination of work ♦ Assisting in the preparation of detailed estimates ♦ Writing reports <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred by the CICIC) is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required

Classification: Engineer, Sub-Classification - Architectural	
An Architectural Engineer applies scientific and engineering principles to the design and construction of buildings and building systems. This type of engineer has an interdisciplinary background, encompassing the areas of structural, building mechanical, electrical, lighting, fire protection and construction.	
Senior	<p>Typical duties include:</p> <ul style="list-style-type: none"> ♦ Designing of buildings or building sections, preparation of specifications ♦ Developing of models of buildings and building systems ♦ Performing studies ♦ Coordinating the operation of pilot projects ♦ Coordinating quality control functions ♦ Interpreting and evaluating situations and data ♦ Resolving problems ♦ Preparing detailed estimates ♦ Providing input into the preparation of tender documents, evaluation of tenders and preparation of contractual documents ♦ Coordinating and administering a wide range of technical endeavors including the planning and scheduling of work <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred by the CICIC) <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of ten (10) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Licensing as a Professional Engineer from a Provincial or territorial association of professional engineers may be considered desirable

Classification: Engineer, Sub-Classification - Biological	
The Biological Engineer is concerned with the study of living organisms and is often involved in product design, mimicking biological systems in order to create new products and modifying and controlling biological systems in order to replace, augment or sustain chemical and mechanical processes.	
Junior	<p>Typical duties include:</p> <ul style="list-style-type: none"> ♦ Assisting in the design of equipment or processes, prototypes ♦ Assisting in the resolution of problems ♦ Assisting in the troubleshooting of complex equipment ♦ Assisting in the execution of studies ♦ Writing reports ♦ Performing design drafting <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent {as determined by one of the agencies referred by the Canadian Information Centre for International Credentials (CICIC)} from a foreign institution, is required
Intermediate	<p>Typical duties include:</p> <ul style="list-style-type: none"> ♦ Designing of equipment or processes and specifications ♦ Performing studies ♦ Assisting the development of prototypes ♦ Preparing specifications ♦ Assisting in the operation of pilot projects or plants ♦ Performing quality control functions ♦ Interpreting and evaluating situations and data ♦ Researching problems and developing solutions ♦ Troubleshooting complex equipment ♦ Assisting in the planning, scheduling and co-ordination of work ♦ Assisting in the preparation of detailed estimates ♦ Performing design drafting ♦ Writing reports <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred by the CICIC) is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required

Classification: Engineer, Sub-Classification - Biological	
The Biological Engineer is concerned with the study of living organisms and is often involved in product design, mimicking biological systems in order to create new products and modifying and controlling biological systems in order to replace, augment or sustain chemical and mechanical processes.	
Senior	<p>Typical duties include:</p> <ul style="list-style-type: none"> ♦ Designing of equipment or processes ♦ Coordinating the preparation of specifications ♦ Performing studies ♦ Coordinating the development of prototypes and the operation of pilot projects or plants ♦ Coordinating the troubleshooting of complex equipment ♦ Coordinating quality control functions ♦ Interpreting and evaluating situations and data ♦ Resolving problems ♦ Preparing detailed estimates ♦ Providing input into the preparation of tender documents, evaluation of tenders and preparation of contractual documents ♦ Coordinating and administering a wide range of technical endeavors including the planning and scheduling of work <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred by the CICIC) <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of ten (10) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Licensing as a Professional Engineer from a Provincial or territorial association of professional engineers may be considered desirable

Classification: Engineer, Sub-Classification -Chemical	
<p>Chemical Engineers apply and use principles primarily with respect to the study of the design, manufacture, and operation of plant and machinery in chemical, pharmaceutical, petroleum, pulp and paper, food and other processing industries. In addition they perform duties related to chemical quality control, environmental protection and biochemical or biotechnical engineering.</p>	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the conducting of economic and technical feasibility studies ♦ Assisting in the research in the development or improvement of chemical engineering processes, reactions and materials ♦ Assisting in the evaluation of chemical processes, technology and equipment ♦ Assisting in the determination of production specifications ♦ Assisting in the design and testing of chemical processes, plants and equipment <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent (as determined by one of the agencies referred by the Canadian Information Centre for International Credentials (CICIC)) from a foreign institution, is required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Conducting economic and technical feasibility studies ♦ Conducting research into the development or improvement of chemical engineering processes, reactions and materials ♦ Evaluating chemical process, technology and equipment ♦ Determining production specifications ♦ Designing and testing of chemical processes and equipment ♦ Assisting in the design and testing of chemical plants ♦ Assisting in the co-ordination of the construction, modification, operation and maintenance of pilot plants, processing units or processing plants ♦ Assisting in the planning, scheduling and co-ordination of work ♦ Assisting in the establishment operating procedures and quality control strategies and the operation of quality control programs, to ensure consistency and adherence to standards for raw materials, products and waste products or emissions ♦ Assisting in the development of guidelines and specifications for the handling of dangerous chemicals, environmental protection ♦ Assisting in the development of standards for foods, materials or consumer goods <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred referred by the CICIC) is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required

<p>Chemical Engineers apply and use principles primarily with respect to the study of the design, manufacture, and operation of plant and machinery in chemical, pharmaceutical, petroleum, pulp and paper, food and other processing industries. In addition they perform duties related to chemical quality control, environmental protection and biochemical or biotechnical engineering.</p>	
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Conducting economic and technical feasibility studies ♦ Coordinating the research into the development or improvement of chemical engineering processes, reactions and materials ♦ Coordinating the evaluating chemical process, technology and equipment ♦ Coordinating the designing and testing of chemical processes, equipment and plants ♦ Coordinating the construction, modification, operation and maintenance of pilot plants, processing units or processing plants ♦ Coordinating the establishment operating procedures and quality control strategies and the operation of quality control programs, to ensure consistency and adherence to standards for raw materials, products and waste products or emissions ♦ Developing guidelines and specifications for the handling of dangerous chemicals, environmental protection ♦ Developing standards for foods, materials or consumer goods ♦ Providing input into the preparation of tender documents, evaluation of tenders and preparation of contractual documents ♦ Coordinating and administering a wide range of technical endeavors including the planning and scheduling of work <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred by the CICIC) <p>Experience</p> <ul style="list-style-type: none"> ♦ Minimum of ten (10) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Licensing as a Professional Engineer from a Provincial or territorial association of professional engineers may be considered desirable

Classification: Engineer, Sub-Classification - Electrical	
The Electrical Engineer's work is based on the behaviour and effects of electrons (as in electron tubes and transistors) and electronic devices, systems, or equipment.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the research of design, operation and performance of electrical generation and distribution networks, equipment and components; electrical machinery, components and circuits; and electronic equipment, components and circuits used in communication, instrumentation and control systems ♦ Assisting in the investigation of electrical or electronic failures <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent (as determined by one of the agencies referred by the Canadian Information Centre for International Credentials (CICIC)) from a foreign institution, is required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Carrying out research into the design, operation and performance of electrical generation and distribution equipment and components; electrical machinery, components and circuits; and electronic equipment, components and circuits used in communication, instrumentation and control systems ♦ Assisting in the research of design, operation and performance of electrical generation and distribution networks ♦ Assisting in the preparation of material cost and timing estimates, reports and design specifications for electrical and electronic systems and equipment ♦ Assist in the coordination and inspection of the installation, modification, testing and operation of electrical and electronic systems and equipment ♦ Assisting in the development of maintenance and operating standards for electrical and electronic systems and equipment ♦ Assisting in the planning, scheduling and co-ordination of work ♦ Investigating electrical or electronic failures <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred reffered by the CICIC) is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required

Classification: Engineer, Sub-Classification - Electrical	
The Electrical Engineer's work is based on the behaviour and effects of electrons (as in electron tubes and transistors) and electronic devices, systems, or equipment.	
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Coordinating out research into the design, operation and performance of electrical generation and distribution networks, equipment and components; electrical machinery, components and circuits; and electronic equipment, components and circuits used in communication, instrumentation and control systems ♦ Coordinating the preparation of material cost and timing estimates, reports and design specifications for electrical and electronic systems and equipment ♦ Coordinating the inspection of the installation, modification, testing and operation of electrical and electronic systems and equipment ♦ Developing maintenance and operating standards for electrical and electronic systems and equipment ♦ Coordinating the investigation into electrical or electronic failures ♦ Providing input into the preparation of tender documents, evaluation of tenders and preparation of contractual documents ♦ Coordinating and administering a wide range of technical endeavors including the planning and scheduling of work <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred by the CICIC) <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of ten (10) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Licensing as a Professional Engineer from a Provincial or territorial association of professional engineers may be considered desirable

Classification: Engineer, Sub-Classification - Mechanical	
Mechanical engineers research, design and develop machinery and systems for heating, ventilation, air conditioning, power generation, transportation, processing and manufacturing. They also perform duties related to the evaluation, installation, operation and maintenance of mechanical systems.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the research of design, operation and performance of power plants, systems, machines, components, and equipment ♦ Assisting in the investigation of electrical or electronic failures ♦ Assisting in the analysis of dynamics and vibrations of mechanical systems and structures ♦ Assisting in the investigation of mechanical failures or unexpected maintenance problems <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent {as determined by one of the agencies referred by the Canadian Information Centre for International Credentials (CICIC)} from a foreign institution, is required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Conducting research into the design, operation and performance of power systems, machines, components, and equipment ♦ Assisting in the research of the design, operation and performance of power plants ♦ Assisting in the planning of projects including the preparation of material, cost and timing estimates ♦ Analyzing dynamics and vibrations of mechanical systems and structures ♦ Assisting in the inspection of the installation, modification and commissioning of mechanical systems at construction sites or industrial facilities ♦ Assisting in the planning, scheduling and co-ordination of work ♦ Assisting in the development of maintenance standards, schedules and programs ♦ Investigating mechanical failures or unexpected maintenance problems <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred by the CICIC) is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required

Classification: Engineer, Sub-Classification - Mechanical	
Mechanical engineers research, design and develop machinery and systems for heating, ventilation, air conditioning, power generation, transportation, processing and manufacturing. They also perform duties related to the evaluation, installation, operation and maintenance of mechanical systems.	
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Coordinating the research into the design, operation and performance of power plants, systems, machines, components, and equipment ♦ Coordinating the planning of projects including the preparation of material, cost and timing estimates ♦ Analyzing dynamics and vibrations of mechanical systems and structures ♦ Coordinating the inspection of the installation, modification and commissioning of mechanical systems at construction sites or in industrial facilities ♦ Developing maintenance standards, schedules and programs ♦ Providing guidance to industrial maintenance crews ♦ Coordinating the investigation into mechanical failures or unexpected maintenance problems ♦ Providing input into the preparation of tender documents, evaluation of tenders and preparation of contractual documents for industrial construction or maintenance ♦ Providing input into the preparation of tender documents, evaluation of tenders and preparation of contractual documents ♦ Coordinating and administering a wide range of technical endeavors including the planning and scheduling of work <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Undergraduate degree in an engineering program, specializing in a specific relevant field, from a recognized Canadian University or an acceptable equivalent from a foreign institution (as determined by one of the agencies referred by the CICIC) <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of ten (10) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Licensing as a Professional Engineer from a Provincial or territorial association of professional engineers may be considered desirable

Classification: Inspector, Electronics	
Electronic inspectors scrutinize electronic and electromechanical assemblies, subassemblies, parts and components to ensure conformance to prescribed standards.	
Senior	<p>Ensure that products conform to standards and specifications.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Inspecting electronic components and assemblies to specified requirements are met while products are being assembled or fabricated ♦ Checking final assembly for finish, labelling and packaging methods ♦ Checking mechanical dimensions and performing "go-no-go" electrical tests ♦ Identifying and marking assemblies as being either acceptable or defective ♦ Returning faulty assemblies to production for repair ♦ Collecting, recording and summarizing inspection results ♦ Investigating equipment malfunction and instructing proper operation <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Successful completion of relevant courses (e.g. basic electronic theory, testing techniques and testing equipment) from a recognized post secondary institution may be required ♦ Experience as an electronics assembler or fabricator may be required

Classification: Inspector, Mechanical	
Inspectors check and inspect subassemblies and finished products to ensure proper quality and product specifications.	
Senior	<p>Ensure that products conform to standards or specifications.</p> <p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Inspecting mechanical subassemblies, assemblies and finished products to specified requirements are met while products are being assembled or fabricated ♦ Checking final assembly for finish, labelling and packaging methods ♦ Checking mechanical dimensions ♦ Identifying and marking subassemblies, assemblies or finished products as being either acceptable or defective ♦ Returning faulty assemblies to production for repair ♦ Collecting, recording and summarizing inspection results ♦ Investigating equipment malfunction and instructing proper operation <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Experience as a mechanical assembler may be required

Classification: Interior Designer	
Interior Designers design the interior space of buildings and are trained to identify, research and creatively solve problems relating to the function and aesthetic quality of interior space. They are concerned with building systems and structure, furnishings, three-dimensional space planning, colour materials and all aspects of environmental design.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the planning two-dimensional space ♦ Assisting in the development of three-dimensional designs ♦ Assisting in the recording of movements (churn) within the space ♦ <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in Interior Design from a Association of Registered Interior Designers of Ontario (ARIDO) or National Council for Interior Design Qualification (NCIDQ) recognized program is required ♦ Intern membership with the ARIDO or NCDIQ is required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Planning two-dimensional space ♦ Developing three-dimensional designs ♦ Assisting in the selection and application of colour, light, materials, and electrical and mechanical elements ♦ Recording movements (churn) within the space ♦ Designing space and layout in a building and performing the necessary calculations <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in Interior Design from an ARIDO or NCIDQ recognized program is required ♦ Current and valid registration as a Professional Interior Designer with ARIDO or NCIDQ is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of one (1) year of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Reviewing data ref movements (churn) within the space ♦ Selecting and applying colour, light, materials, and electrical and mechanical elements ♦ Coordinating the design and layouts of buildings ♦ Coordinating work performed by various trades ♦ Applying relevant laws, codes, standards and regulations <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in Interior Design from an ARIDO or NCIDQ recognized program is required ♦ Current and valid registration as a Professional Interior Designer with ARIDO or NCIDQ is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required

Classification: Machinist	
Machinists set up and operate equipment such as lathes, milling machines, saws, grinding machines, drilling and boring machines, shapers, planers, precision measuring tools, hand and power tools, and related attachments and accessories. These cutting tools are used to manufacture and repair parts and products made from metals, plastics, rubber textiles, fiberglass and space age alloys.	
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Studying specifications, drawings or sample parts to determine the machining operation needed ♦ Calculating dimensions and tolerances and preparing working sketches if necessary ♦ Setting up and operating tools, including lathes, drills and milling machines - both manual and computer numerical control (CNC), to perform precision machining operations ♦ Performing precision machining operations such as sawing, turning, milling, boring, etc. ♦ Fitting and assembling machined metal parts and subassemblies ♦ Verifying dimensions of products for accuracy and conformance to specifications using precision measuring instruments <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Current and valid trade certification is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of one (1) year of experience as a certified machinist is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Studying specifications, drawings or sample parts to determine the machining operation needed ♦ Calculating dimensions and tolerances and preparing working sketches if necessary ♦ Setting up and operating tools, including lathes, drills and milling machines - both manual and computer numerical control (CNC), to perform precision machining operations ♦ Performing precision machining operations such as sawing, turning, milling, boring, etc. ♦ Fitting and assembling machined metal parts and subassemblies ♦ Verifying dimensions of products for accuracy and conformance to specifications using precision measuring instruments ♦ Coordinating activities of other machinists <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Current and valid trade certification is required <p>Experience;</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years as a certified machinist is required

Classification: Millwright	
Millwrights install stationary industrial machinery and mechanical equipment.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the installation, alignment and moving stationary industrial machinery and mechanical equipment ♦ Assisting in the inspection and examination machinery and equipment to detect and investigate irregularities and malfunctions ♦ Assisting in the assembling of machinery and equipment prior to installation ♦ Operating machine tools required during set up of machinery <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Current and valid apprenticeship as a millwright is required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Reading diagrams and schematic drawings to determine work procedures ♦ Installing, aligning and moving stationary industrial machinery and mechanical equipment according to layout plans ♦ Operating hoisting and lifting devices as necessary to position machinery and parts during installation ♦ Inspecting and examining machinery and equipment to detect and investigate irregularities and malfunctions ♦ Assembling machinery and equipment prior to installation ♦ Operating machine tools required during set up of machinery ♦ Constructing foundations for machinery <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Current and valid trade certification is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of one (1) year of as a certified millwright is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Reading diagrams and schematic drawings to determine work procedures ♦ Installing, aligning and moving stationary industrial machinery and mechanical equipment according to layout plans ♦ Operating hoisting and lifting devices as necessary to position machinery and parts during installation ♦ Inspecting and examining machinery and equipment to detect and investigate irregularities and malfunctions ♦ Assembling machinery and equipment prior to installation ♦ Operating machine tools required during set up of machinery ♦ Constructing foundations for machinery ♦ Coordinating the work of junior and intermediate millwrights <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Successful completion of two years of secondary school or an acceptable combination of education, training and experience is required ♦ Current and valid Millwright Journeyman Certificate is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years relevant experience is required

Classification: Stationary Engineer and Auxiliary Equipment Operator

A Stationary Engineer and Auxiliary Equipment Operator's main duties involve operating automated or computerized control systems, stationary engines and auxiliary equipment for buildings, industrial plants and other work sites.

The main duties may include:

- ♦ Operating automated or computerized control systems, stationary engines and auxiliary equipment such as boilers, turbines, generators, pumps, compressors, pollution control devices and other equipment to provide heat, ventilation, refrigeration, light and power
- ♦ Monitoring and inspecting plant equipment, computer terminals, switches, valves, gauges, alarms, meters and other instruments to measure temperature, pressure and fuel flow, to detect leaks or other equipment malfunctions and to ensure plant equipment is operating at maximum efficiency
- ♦ Analyzing and recording instrument readings and equipment malfunctions
- ♦ Troubleshooting and performing corrective action and minor repairs to prevent equipment or system failure
- ♦ Cleaning and lubricating generators, turbines, pumps and compressors and performing other routine equipment maintenance duties using appropriate lubricants and hand, power and precision tools
- ♦ Maintaining a daily log of operation, maintenance and safety activities
- ♦ Assisting in the development of operation, maintenance and safety procedures

Junior	<u>Minimum Mandatory Qualifications:</u> Education: <ul style="list-style-type: none">♦ Current and valid provincial or territorial certification or licensing as a 4th Class Stationary (Operating) Engineer is required Asset Qualifications: <ul style="list-style-type: none">♦ Current and valid provincial or territorial certification or licensing as a Class B Refrigeration Operator may be required♦ Successful completion of a Technical Standards & Safety Authority (TSSA) approved training program may be required
Intermediate	<u>Minimum Mandatory Qualifications:</u> Education: <ul style="list-style-type: none">♦ Current and valid provincial or territorial certification or licensing as a 3rd Class Stationary (Operating) Engineer is required Experience: <ul style="list-style-type: none">♦ Minimum of one (1) year of relevant experience is required Asset Qualifications: <ul style="list-style-type: none">♦ Current and valid provincial or territorial certification or licensing as a Class A or B Refrigeration Operator may be required♦ Successful completion of a Technical Standards & Safety Authority (TSSA) approved training program may be required
Senior	<u>Minimum Mandatory Qualifications:</u> Education: <ul style="list-style-type: none">♦ Current and valid provincial or territorial certification or licensing as a 2nd Class Stationary (Operating) Engineer is required Experience: <ul style="list-style-type: none">♦ Minimum of three (3) years of relevant experience is required Asset Qualifications: <ul style="list-style-type: none">♦ Current and valid provincial or territorial certification or licensing as a Class A or B Refrigeration Operator may be required♦ Successful completion of a Technical Standards & Safety Authority (TSSA) approved training program may be required
Advanced	<u>Minimum Mandatory Qualifications:</u> Education: <ul style="list-style-type: none">♦ Current and valid provincial or territorial certification or licensing as a 1st Class Stationary (Operating) Engineer is required Experience: <ul style="list-style-type: none">♦ Minimum of five (5) years of relevant experience is required Asset Qualifications: <ul style="list-style-type: none">♦ Current and valid provincial or territorial certification or licensing as a Class A or B

	<p>Refrigeration Operator may be required</p> <ul style="list-style-type: none">♦ Successful completion of a Technical Standards & Safety Authority (TSSA) approved training program may be required

Classification: Technician
Technicians are individuals who, through academic training and experience in the application of mathematics and engineering or scientific principles, are capable of assuming responsibility and exercising independent judgement in the specialized portion of the field of field of engineering or applied science technology in which training has been received.

Classification: Technician, Sub-Classification - Architectural	
The Architectural Technologist supports the efforts of professional architects and civil design engineers by conducting research, preparing drawings, architectural models, and specifications.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Preparing basic manual and CAD (computer-assisted design) drawings and specifications ♦ Assisting in the construction of architectural and display models, and three dimensional virtual models of architectural designs <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in the related discipline from a post secondary institution accredited by the Canadian Council of Technicians and Technologists (CCTT) or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Preparing more complex manual and CAD (computer-assisted design) drawings and specifications ♦ Constructing basic architectural and display models, and three dimensional virtual models of architectural designs ♦ Assisting in the development of architectural designs <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the development of architectural designs ♦ Preparing of manual and CAD (computer-assisted design) drawings and specifications ♦ Constructing architectural and display models, and three dimensional virtual models of architectural designs ♦ Coordinating and inspecting the activities of drafters and more junior technicians <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in the related discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of five (5) years relevant experience is required

Classification: Technician, Sub-Classification - Biological	
The Biological Technologist supports the efforts of scientists, engineers and other professionals by conducting biological, microbiological and biochemical tests and laboratory analyses, performing field research, conducting experimental procedures and preparing reports to detail findings.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> Performing basic biological, microbiological and biochemical tests Collecting data and samples of water, soil, plant and animal populations <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> Certificate, diploma, or degree in the related discipline from a post secondary institution accredited by the Canadian Council of Technicians and Technologists (CCTT) or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> Performing more complex biological, microbiological and biochemical tests Collecting data and samples of water, soil, plant and animal populations Assisting in the operation of programs (e.g. fish hatchery, greenhouse and livestock production programs) <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> Secondary school diploma is required Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Experience:</p> <ul style="list-style-type: none"> Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> Performing complex biological, microbiological and biochemical tests Collecting data and samples of water, soil, plant and animal populations Conducting environmental monitoring and compliance activities for the protection of natural resources Conducting operational programs (e.g. fish hatchery, greenhouse and livestock production programs) Coordinating the activities of more junior technicians <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> Secondary school diploma is required Certificate, diploma, or degree in the related discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> Minimum of five (5) years of relevant experience is required

Classification: Technician, Sub-Classification - Chemical	
The Chemical Technologist supports the efforts of scientists, engineers and other professionals by conducting chemical testing, conducting experiments, assisting in studies, etc.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> • Conducting simple chemical tests • Operating laboratory equipment and apparatus • Preparing solutions of gas, liquid, or reagents • Compiling records of test results <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> • Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> • Certificate, diploma, or degree in the related discipline from a post secondary institution accredited by the Canadian Council of Technicians and Technologists (CCTT) or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> • Setting up and conducting more complex chemical tests • Operating laboratory equipment and apparatus • Preparing solutions of gas, liquid, or reagents • Conducting sampling and testing of raw materials, chemical intermediates and products • Conducting air and water quality testing • Compiling records of test results <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> • Secondary school diploma is required • Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> • Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> • Setting up and conducting chemical experiments and tests • Operating and maintaining laboratory equipment and apparatus • Preparing solutions of gas, liquid, or reagents • Compiling records of experimental or analytical results • Coordinating programs of sampling and testing of raw materials, chemical intermediates and products • Coordinating air and water quality testing, chemical tests, etc. • Fabricating experimental apparatus • Coordinating the work of more junior technicians <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> • Secondary school diploma is required • Certificate, diploma, or degree in the related discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> • Minimum of five (5) years of relevant experience is required

Classification: Technician, Sub-Classification - Civil Engineering	
The Civil Engineering Technologist supports the efforts of scientists, engineers and other professionals by conducting testing, preparing drawings, conducting field surveys, inspections or technical investigations.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the performance of field surveys ♦ Assisting in the performance of inspections ♦ Conducting basic testing of construction materials ♦ Assisting in the inspection of construction materials <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in the related discipline from a post secondary institution accredited by the Canadian Council of Technicians and Technologists (CCTT) or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Performing field surveys ♦ Performing basic inspections ♦ Conducting more complex testing of construction materials ♦ Inspecting construction materials <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Coordinating field surveys ♦ Assisting in inspections or technical investigations that provide data for engineering projects ♦ Coordinating the inspection and testing of construction materials ♦ Coordinating the work of more junior technicians <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in the related discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of five (5) years of relevant experience is required

Classification: Technician, Sub-Classification - Drafting	
Drafting technicians prepare engineering designs, drawings and related technical information, while working in multidisciplinary engineering teams or in support of engineers, architects or industrial designers, or independently.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the development and preparation of engineering drawings, plans, diagrams or layouts ♦ Operating computer-assisted design (CAD) and drafting workstations <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in the related discipline from a post secondary institution accredited by the Canadian Council of Technicians and Technologists (CCTT) or an acceptable combination of education, training and experience may be required

Classification: Technician, Sub-Classification - Electrical and Electronics Engineering	
The Electrical and Electronics Engineering Technologist supports the efforts of scientists, engineers and other professionals in support of the design, development, testing, production and operation of electrical and electronic equipment and systems.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> • Testing of basic equipment and systems, industrial process-control systems, micro-electronic systems, etc. • Assisting in the installation and operation of electrical and electronic equipment and systems (other than aircraft electronics or instruments) • Setting-up standard test equipment to diagnose, test and analyze the performance of electrical and electronic components, assemblies and systems <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> • Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> - Certificate, diploma, or degree in the related disciplines from a post secondary institution accredited by the Canadian Council of Technicians and Technologists (CCTT) or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> • Testing of more complex power equipment and systems, industrial process-control systems, micro-electronic systems, etc. • Assisting in the building and testing of prototypes according to general instructions and established standards • Installing and operating basic electrical and electronic equipment and systems (other than aircraft electronics or instruments) • Operating standard test equipment to diagnose, test and analyze the performance of electrical and electronic components, assemblies and systems <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> • Secondary school diploma is required • Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Experience:</p> <ul style="list-style-type: none"> • Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> • Coordinating and conducting the testing of power equipment and systems, industrial process-control systems, micro-electronic systems, etc. • Building and testing of prototypes according to general instructions and established standards • Performing the installation and operation of complex electrical and electronic equipment and systems (other than aircraft electronics or instruments) • Setting-up and operation of specialized test equipment to diagnose, test and analyze the performance of electrical and electronic components, assemblies and systems <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> • Secondary school diploma is required • Certificate, diploma, or degree in the related discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> • Minimum of five (5) years of relevant experience is required

Classification: Technician, Sub-Classification - Geomatics	
Geomatics technologist gather, analyze, interpret and use geospatial information for applications in natural resources, geology, environment, and land use planning.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Compile data from aerial photographs, survey notes, records, reports and other maps ♦ Assisting in the operation of digitized stereoscopic plotting and computer graphics equipment to provide three-dimensional optical models of terrain, to trace maps, and to prepare charts and tables ♦ Monitoring recording quality ♦ Performing data entry and editing activities <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in the related discipline from a post secondary institution accredited by the Canadian Council of Technicians and Technologists (CCTT) or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Compile data from aerial photographs, survey notes, records, reports and other maps ♦ Generating maps and related graphs and charts using digital mapping techniques, computer interactive graphics, etc. ♦ Preparing topographic maps, aerial-photograph mosaics and related charts ♦ Operating digitized stereoscopic plotting and computer graphics equipment to provide three-dimensional optical models of terrain, to trace maps, and to prepare charts and tables ♦ Adjusting monitoring recording quality ♦ Operating analog or computer-based remote sensing, interpretive equipment to prepare images, graphic and alphanumeric reports, maps and charts from airborne or satellite data ♦ Performing maintenance operations to systems following pre-determined calibration procedures <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required

Classification: Technician, Sub-Classification - Geomatics	
Geomatics technologist gather, analyze, interpret and use geospatial information for applications in natural resources, geology, environment, and land use planning.	
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Compile data from aerial photographs, survey notes, records, reports and other maps ♦ Coordinating the generation of maps and related graphs and charts using digital mapping techniques, computer interactive graphics, etc. ♦ Inspecting final compositions for accuracy and completeness ♦ Preparing topographic maps, aerial-photograph mosaics and related charts ♦ Operating digitized stereoscopic plotting and computer graphics equipment to provide three-dimensional optical models of terrain, to trace maps, and to prepare charts and tables ♦ Operating airborne remote sensing equipment which produce images of large areas of the earth, coastline or of the atmosphere ♦ Monitoring recording quality and adjusting equipment as required ♦ Operating analog or computer-based remote sensing, interpretive equipment to prepare images, graphic and alphanumeric reports, maps and charts from airborne or satellite data ♦ Operating specialized computer hardware and software and peripheral equipment to model, manage, analyze and display geospatial data ♦ Coordinating data entry and editing activities ♦ Coordinating maintenance operations to systems following pre-determined calibration procedures ♦ Coordinating the activities of more junior technicians <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in the related discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience;</p> <ul style="list-style-type: none"> - Minimum of five (5) years of relevant experience is required

Classification: Technician, Sub-Classification - Industrial Instrument	
The Industrial Instrument Technologist repairs, maintains, calibrates, adjusts and installs industrial measuring and controlling instrumentation by consulting manufacturer's manuals, circuit diagrams and blueprints.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Inspecting and testing the operation of basic instruments and systems to diagnose faults ♦ Repairing and adjusting basic system components ♦ Removing and replacing defective parts ♦ Performing the calibration of basic components and instruments according to manufacturers specifications <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in the related discipline from a post secondary institution accredited by the Canadian Council of Technicians and Technologists (CCTT) or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Inspecting and testing the operation of more complex instruments and systems to diagnose faults ♦ Repairing and adjusting more complex system components ♦ Removing and replacing defective parts ♦ Performing the calibration of more complex components and instruments according to manufacturers specifications <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Inspecting and testing the operation of complex instruments and systems to diagnose faults ♦ Repairing and adjusting complex system components ♦ Removing and replacing defective parts ♦ Performing the calibration of complex components and instruments according to manufacturers specifications ♦ Coordinating the activities of more junior technicians <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in the related discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of five (5) years of relevant experience is required

Classification: Technician, Sub-Classification - Mechanical Engineering	
The Mechanical Engineering Technologist supports the efforts of scientists, engineers and other professionals in the design, development, maintenance and testing of machines, components, tools, heating and ventilation systems, power generation and power conversion plants, manufacturing plants and equipment.	
Junior	<ul style="list-style-type: none"> ♦ Typical duties may include: ♦ Assisting in the preparation of conventional and computer-assisted design (CAD) engineering designs, drawings and specifications for machines and components, power transmission systems, process piping, heating, ventilating and air-conditioning systems ♦ Assisting in the testing of machines, components and materials to determine performance, strength, response to stress, etc. ♦ Assisting in the design of moulds, tools dies, jigs and fixtures <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Preparing conventional and computer-assisted design (CAD) engineering designs, drawings and specifications for machines and components, power transmission systems, process piping, heating, ventilating and air-conditioning systems ♦ Conducting tests of machines, components and materials to determine performance, strength, response to stress, etc. ♦ Designing basic moulds, tools dies, jigs and fixtures ♦ Preparing schedules for mechanical maintenance programs <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Preparing conventional and computer-assisted design (CAD) engineering designs, drawings and specifications for more complex machines and components, power transmission systems, process piping, heating, ventilating and air-conditioning systems ♦ Conducting more complex tests of machines, components and materials to determine performance, strength, response to stress, etc. ♦ Designing more complex moulds, tools dies, jigs and fixtures ♦ Preparing standards for mechanical maintenance programs and the operations of mechanical plants ♦ Coordinating schedules for mechanical maintenance programs ♦ Coordinating activities of more junior technicians <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in the related discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of five (5) years of relevant experience is required

Classification: Technician, Sub-Classification - Military Vehicle	
The Military Vehicle Technician works as a member of a team responsible for a comprehensive range of servicing, maintenance, repair and overhaul of all land vehicle and related equipment used by the Canadian Forces.	
Junior	<p>Typical duties include:</p> <ul style="list-style-type: none"> ♦ Performing routine repairs and maintenance ♦ Performing routine installation of equipment, components, etc. ♦ Conducting routine testing of basic parts or components ♦ Processing work orders <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties include:</p> <ul style="list-style-type: none"> ♦ Performing more complex repairs and maintenance ♦ Performing installation of more complex equipment, components, etc. ♦ Conducting more complex testing of basic parts or components ♦ Processing work orders <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties include:</p> <ul style="list-style-type: none"> ♦ Performing inspections of land equipment and related equipment ♦ Coordinating the performance of repairs and maintenance ♦ Coordinating the installation of equipment, components, etc. ♦ Coordinating the testing of parts, components, equipment or systems ♦ Preparing work orders, part request forms, etc. ♦ Preparing reports ♦ Preparing estimates of maintenance, and repair and overhaul requirements ♦ Coordinating activities of more junior technicians <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in the related discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of five (5) years of relevant experience is required

Classification: Technologist
Technologists are professionals who, through academic training and experience in the application of mathematics and engineering or scientific principles, are capable of assuming responsibility and exercising independent judgement in the specialized portion in the field of engineering or applied science technology in which training has been received.

Classification: Technologist, Sub-Classification - Architectural	
The Architectural Technologist supports the efforts of professional architects and civil design engineers by conducting research, preparing drawings, architectural models, and specifications.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the development of basic architectural designs ♦ Assisting in the analysis of building codes, by-laws, space requirements, site requirements and other technical documents and reports ♦ Assisting in the preparation of manual and CAD (computer-assisted design) drawings and specifications ♦ Assisting in the construction of basic architectural and display models, and three dimensional virtual models of architectural designs <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required <p>Asset Qualifications:</p> <ul style="list-style-type: none"> ♦ Certificate, diploma, or degree in the related discipline from a post secondary institution accredited by the Canadian Council of Technicians and Technologists (CCTT) or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the development of more complex architectural designs ♦ Analyzing building codes, by-laws, space requirements, site requirements and other technical documents and reports ♦ Preparing manual and CAD (computer-assisted design) drawings and specifications ♦ Assisting in the preparation of cost estimates and listings from conceptual drawings and instructions ♦ Constructing more complex architectural and display models, and three dimensional virtual models of architectural designs ♦ Overseeing specific phases of construction projects <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> ♦ Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Assisting in the development of architectural designs - Reviewing the analysis of building codes, by-laws, space requirements, site requirements and other technical documents and reports - Preparing cost estimates and listings from conceptual drawings and instructions - Constructing architectural and display models, and three dimensional virtual models of architectural designs - Coordinating and inspecting the activities of drafters, technicians and more junior technologists - Overseeing construction projects <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of five (5) years relevant experience is required

Classification: Technologist, Sub-Classification - Biological	
The Biological Technologist supports the efforts of scientists, engineers and other professionals by conducting biological, microbiological and biochemical tests and laboratory analyses, performing field research, conducting experimental procedures and preparing reports to detail findings.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Performing biological, microbiological and biochemical tests in support of quality control in various fields - Assisting in field research and surveys - Assisting in the conducting of operational programs (e.g. fish hatchery, greenhouse and livestock production programs) <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required ♦ Certificate, diploma or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Performing biological, microbiological and biochemical laboratory testing and analyses in support of quality control in various fields - Assisting in the performance of experimental procedures required as part of research projects in areas such as agriculture, plant breeding, animal husbandry, biology, etc. - Performing field research and surveys - Assisting in the environmental monitoring and compliance activities for the protection of natural resources - Conducting operational programs (e.g. fish hatchery, greenhouse and livestock production programs) <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Conducting more complex biological, microbiological and biochemical laboratory tests and analyses in support of quality control in various fields - Performing experimental procedures required as part of research projects in areas such as agriculture, plant breeding, animal husbandry, biology, etc. - Coordinating field research and surveys required to collect data and samples - Conducting environmental monitoring and compliance activities for the protection of natural resources - Coordinating operational programs (e.g. fish hatchery, greenhouse and livestock production programs) - Analyzing data and preparing reports - Coordinating the activities of technicians and more junior technologists <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of five (5) years relevant experience is required

Classification: Technologist, Sub-Classification - Chemical	
The Chemical Technologist supports the efforts of scientists, engineers and other professionals by conducting chemical testing and analysis, conducting experiments, assist in studies, perform environmental monitoring, etc.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Assisting in the analysis of results from chemical tests - Compiling records of experimental or analytical results - Assisting in the conducting programs of sampling of raw materials, chemical intermediates and products - Assisting in the analysis of samplings of raw materials, chemical intermediates and products <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Performing the analysis of results from chemical experiments and tests - Interpreting compiled records of experimental or analytical results - Conducting programs of sampling of raw materials, chemical intermediates and products - Performing the analysis of samplings of raw materials, chemical intermediates and products - Assisting in the operation of experimental chemical or petrochemical pilot plants - Assisting in air and water quality assessments - Assisting in environmental monitoring and protection activities <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Performing the analysis of results from more complex chemical experiments and tests - Interpreting compiled records of experimental or analytical results - Developing and coordinating programs of sampling and analysis to maintain quality standards of raw materials, chemical intermediates and products - Assisting in the development of chemical engineering processes - Assisting in studies of chemical engineering construction, inspection, and maintenance - Operating experimental chemical or petrochemical pilot plants - Coordinating air and water quality testing and assessments, environmental monitoring and protection activities - Assisting in the development of standards - Assisting in the design and fabrication of experimental apparatus - Coordinating the activities of technicians and more junior technologists <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of five (5) years relevant experience is required

Classification: Technologist, Sub-Classification - Civil Engineering	
The Civil Engineering Technologist supports the efforts of scientists, engineers and other professionals by conducting testing, preparing drawings, conducting field surveys, inspections or technical investigations.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Assisting in the development of engineering designs and drawings from preliminary concepts and sketches - Assisting in inspections that provide data for engineering projects <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Developing engineering designs and drawings from preliminary concepts and sketches - Assisting in the preparation of construction specifications, cost and material estimates, project schedules and reports - Performing inspections or technical investigations that provide data for engineering projects - Performing analysis of results from the inspection and testing of construction materials - Assisting in the monitoring and inspection of construction projects <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Developing engineering designs and drawings from preliminary concepts and sketches - Preparing construction specifications, cost and material estimates, project schedules and reports - Coordinating field surveys, inspections or technical investigations that provide data for engineering projects - Coordinating the inspection and testing of construction materials and performing the required analysis - Coordinating, monitoring and inspecting construction projects - Coordinating the activities of technicians and more junior technologists <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of five (5) years relevant experience is required

Classification: Technologist, Sub-Classification - Drafting	
Drafting technologists prepare engineering designs, drawings and related technical information, while working in multidisciplinary engineering teams or in support of engineers, architects or industrial designers, or independently.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Preparing engineering designs and drawings from data supplied by various sources - Operating computer-assisted design (CAD) and drafting workstations - Producing drawing sets <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Developing, preparing and editing engineering designs and drawings from data supplied by various sources - Operating computer-assisted design (CAD) and drafting workstations - Producing drawing sets - <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of three (3) years of relevant experience is required -
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Developing, preparing and editing engineering designs and drawings from data supplied by various sources - Operating computer-assisted design (CAD) and drafting workstations - Producing design sketches, drawing sets and document packages - Verifying design drawings to ensure conformance to specifications and drawing sets - Writing technical reports - Assisting in the preparation of construction specifications, costs and material estimates - Producing 3D solid models - Coordinating the work of technicians and junior technologists <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of five (5) years relevant experience is required

Classification: Technologist, Sub-Classification - Electrical and Electronics Engineering	
The Electrical and Electronics Engineering Technologist supports the efforts of scientists, engineers and other professionals in support of the design, development, testing, production and operation of electrical and electronic equipment and systems.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Assisting in the design and development of power equipment and systems, industrial process-control systems, micro-electronic systems, etc. - Assisting in the commissioning and operation of electrical and electronic equipment and systems (other than aircraft electronics or instruments) <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Assisting in the design and development of power equipment and systems, industrial process-control systems, micro-electronic systems, etc. - Assisting in the commissioning and operation of electrical and electronic equipment and systems (other than aircraft electronics or instruments) - Assisting in applied research in fields of electrical and electronic engineering and physics - Assisting in the writing of specifications, schedules and technical reports <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of three (3) years of relevant experience is required
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Coordinating the design, development and testing of power equipment and systems, industrial process-control systems, micro-electronic systems, etc. - Coordinating the building and testing of prototypes according to general instructions and established standards - Coordinating the installation, commissioning and operation of electrical and electronic equipment and systems (other than aircraft electronics or instruments) - Conducting applied research in fields of electrical and electronic engineering and physics - Coordinating the set-up and operation of specialized test equipment to diagnose, test and analyze the performance of electrical and electronic components, assemblies and systems - Writing specifications, schedules and technical reports - Coordinating the work of technicians and junior technologists <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of five (5) years relevant experience is required

Classification: Technologist, Sub-Classification - Geomatics	
Geomatics technologist gather, analyze, interpret and use geospatial information for applications in natural resources, geology, environment, and land use planning.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> ♦ Assisting in the examination and interpretation of topographic maps, aerial-photograph mosaics and related charts ♦ Assisting in the inspection of recorded images ♦ Assisting in the verification of the integrity and accuracy of data contained in remote sensing image analysis systems <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education</p> <ul style="list-style-type: none"> ♦ Secondary school diploma is required ♦ Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience may be required
Intermediate	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Assisting in the planning of map content, format and design - Examining and interpreting of topographic maps, aerial-photograph mosaics and related charts - Inspecting the quality of recorded images - Assisting in the development of specialized analog and computer software specific routines to customize and integrate image analysis - Assisting in the verification of the integrity and accuracy of data contained in remote sensing image analysis systems - Assisting in the development of specialized computer software routines, Internet based GIS, database, and business applications to customize geographic information <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in a specific relevant discipline from a post secondary Canadian institution or an acceptable combination of education, training and experience is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of three (3) years relevant experience is required

Classification: Telecommunications Analyst (TCA)

The Telecommunications Analyst is responsible for the design, support and maintenance of telecommunications systems (computer, video systems or telephone). These responsibilities include maintaining and enhancing hardware, software and other components of a telecommunications system and analysis of user requirements including the identification of administrative, operational, economic and technical merits of information technology alternative solutions. In addition, the incumbent is also responsible for the development of formal recommendations and the preparation of specifications.

Junior**Typical duties may include:**

- Monitoring the design, implementation and operations start-up of proposed telecommunication systems in accordance with instructions
- Assisting in the maintenance and monitoring of existing telecommunication, audiovisual and information control systems to ensure ongoing connectivity and functionality
- Assisting in the evaluation of the robustness of telecommunication systems at the server level or higher
- Assisting in the evaluation system compatibility of technical requirements for content streaming, audio and video conferencing, Web conferencing, etc
- Assisting in the analysis of user requirements
- Participating in researching of alternative solutions
- Assisting in the preparation of specifications related to the functional requirements
- Assisting in the development of recommendations
- Assisting in the writing of technical specifications, schedules and technical reports

Minimum Mandatory Qualifications:**Education:**

- Secondary school diploma is required
- Successful completion of additional courses in telecommunications, information technology or computer science from a recognized post secondary institution is required
- Certificate, diploma, or degree in telecommunications, information technology or computer science or other relevant field from a recognized post secondary institution or an acceptable combination of education, training and experience may be required

Classification: Telecommunications Analyst (TCA)

The Telecommunications Analyst is responsible for the design, support and maintenance of telecommunications systems (computer, video systems or telephone). These responsibilities include maintaining and enhancing hardware, software and other components of a telecommunications system and analysis of user requirements including the identification of administrative, operational, economic and technical merits of information technology alternative solutions. In addition, the incumbent is also responsible for the development of formal recommendations and the preparation of specifications.

Intermediate**Typical duties may include:**

- Maintaining and monitoring existing telecommunication systems to ensure ongoing connectivity and functionality
- Evaluating and ensuring robustness of systems at the server level or higher
- Analyzing system compatibility for technical requirements such as WAN or wireless systems compatibility for content streaming, audio and video conferencing, Web conferencing, etc.
- Analyzing user requirements
- Reviewing general specifications for telecommunication systems
- Developing broad system alternatives
- Identifying the administrative, operational, economic and technical feasibility of alternative solutions
- Assisting in the preparation of technical specifications, schedules and technical reports related to the functional requirements of the client department's application
- Assisting in the development and presentation of recommendations
- Assisting in the development of current, long range and strategic information technology and information management plans
- Setting up and operation of standard test equipment to diagnose, test and analyze the performance of basic electrical components, assemblies and systems
- Analyzing electrical specifications, network architecture and engineering changes
- Assisting in maintaining audio visual, information technology control systems and network inter connectivity

Minimum Mandatory Qualifications:**Education:**

- Secondary school diploma is required
- Certificate, diploma, or degree in telecommunications, information technology or computer science or other relevant field from a recognized post secondary institution may be required

Experience:

- Minimum of three (3) years of telecommunications, informatics experience, computer science or other relevant experience is required

Classification: Telecommunications Analyst (TCA)	
<p>The Telecommunications Analyst is responsible for the design, support and maintenance of telecommunications systems (computer, video systems or telephone). These responsibilities include maintaining and enhancing hardware, software and other components of a telecommunications system and analysis of user requirements including the identification of administrative, operational, economic and technical merits of information technology alternative solutions. In addition, the incumbent is also responsible for the development of formal recommendations and the preparation of specifications.</p>	
Senior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Analyzing user requirements - Reviewing general specifications for telecommunication systems - Developing comprehensive telecommunication system alternatives - Coordinating the development of alternative solutions and determining associated policy and organizational change requirements - Analyzing, evaluating and determining implementation costs of telecommunication alternatives based on impact and cost/benefit considerations - Developing and presenting formal recommendations - Coordinating the preparation of specifications related to the functional requirements of the client department's application - Monitoring the design, implementation and operation start-up of the proposed system to ensure compliance with established goals, objectives and milestones - Assisting in the development of current, long range and strategic information technology and information management plans - Setting up and operating standard test equipment to diagnose, test and analyze the performance of more complex electrical components, assemblies and systems <p><u>Minimum Mandatory Qualifications:</u></p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in telecommunications, information technology or computer science or other relevant field from a recognized post secondary institution is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of five (5) years of telecommunications, informatics experience, computer science or other relevant experience is required

Classification: Special Advisor

The Special Advisor's main task is to provide subject-matter expertise in a designated area, including providing advice and guidance on initiatives of both strategic and operational importance to senior officials. Broadly speaking, the Special Advisor will support the senior official's ability to promote the effective delivery of the department's mandate and responsibilities.

Advanced

The duties to be performed will require superior communication skills, especially the ability to effectively communicate with people at all levels of education, experience and skill. The THS Resource may assume the responsibility of a coordinator or facilitator for consultations.

Typical duties may include:

- Identifying, researching, developing and suggesting implementation of policies and procedures that will serve to strengthen the department's operations
- Monitoring, evaluating and providing hands-on assistance in long-term strategic areas as well as the daily operations of the department
- Reviewing and proposing amendments to legislation, guidelines concerning governance, performance reporting and risk management
- Reviewing and providing advice regarding public agency direction, planning, and performance
- Reviewing documents on current and emerging issues, including briefing materials, position papers, speaking points, policy research, corporate reporting, protocols, media information and presentations for consistency with departmental and other government department positions
- Providing guidance to managers and information on the development and preparation of the Results-based Management and Accountability Framework (RMAF), Risk-Based Audit Framework (RBAF), Departmental Performance Reports (DPP) and Reports on Plans and Priorities (RPP)

Minimum Mandatory Qualifications:**Education:**

- Secondary school diploma is required
- Certificate, diploma, or degree in the relevant undergraduate field from a recognized post secondary institution is required
- Graduate or doctoral degree in the relevant field, from a recognized post secondary institution, may be required

Experience:

- Minimum of ten (10) years of relevant experience, in the applicable program area, is required
- Minimum of five (5) years experience with the federal government is required

Asset Qualifications:

- Significant and demonstrated knowledge of the governance structures and Treasury Board (TB) policies and issues concerning the program area is required

Classification: Statistics	
Statisticians research statistical theories and develop and apply statistical techniques to solve problems.	
Junior	<p>Typical duties may include:</p> <ul style="list-style-type: none"> - Performing basic research - Applying basic statistical theories to data - Preparing summaries - Assisting in the development of statistical models <p>Minimum Mandatory Qualifications:</p> <p>Education:</p> <ul style="list-style-type: none"> - Secondary school diploma is required - Certificate, diploma, or degree in statistics or other relevant field, from a recognized post secondary institution, is required <p>Experience:</p> <ul style="list-style-type: none"> - Minimum of six (6) months of relevant experience is required

ANNEXES

ANNEX A: Requirement

ANNEX B: Basis of Payment

ANNEX C: Description of Temporary Help Services Categories

ANNEX D: Standards and Duties with Respect to Tests

ANNEX E: Call-up Procedure

ANNEX F: Instructions for designated users

ANNEX A

REQUIREMENT

1. Terminology

THS: Temporary Help Services

RMSO: Regional master standing offer

RSO: Request for standing offer. Document posted on MERX, prior to issuing the regional master standing offer.

The term call-up refers to the subsequent call-up.

Geographic areas: the service must be provided in one or more of the eight geographical areas designated below (Appendix A, section 3.3). The region is the province of Quebec, with the exception of the Gatineau area, Témiscamingue and northern Quebec.

Service categories: The description of the various service categories that may be offered by the contractor is provided in Appendix C.

Catalogue: Document containing information about the RMSO, particularly the contact information for qualified contractors and the requested hourly rates. The catalogue will be accessible to all designated users.

2. Background

In its role as the central purchasing agency, Public Works and Government Services Canada (PWGSC), at the request of identified users in federal government departments and agencies in the Quebec Region, requests offers for the provision of temporary help services.

To meet the needs of identified users, PWGSC ensures that suppliers submit a standing offer for the provision of services for a specified period. PWGSC then delegates purchasing authority to the identified users, who can then access the supply source directly by issuing “call-ups” (which are detailed acceptances of the offer).

The details of the services the identified users wish to obtain from a supplier are set out in the call-up. The call-up may be issued at any time during the standing offer’s period of validity.

The Master Regional Standing Offer (MRSO) for temporary help services (THS) will be used for ad hoc requirements that are difficult to anticipate and fairly urgent.

3. Nature of the services offered

3.1 Description

The supplier will provide THS in the manner and at the time requested by identified users in accordance with the categories of services offered and accepted for the Quebec Region and geographical areas specified in this standing offer.

Temporary assistance services must be used on a temporary basis to meet requirements in units in one or more of the categories indicated in Appendix C. These services may be required to meet a temporary, ad hoc increase in work volume, for example.

3.2 Limitations

Limitations must be observed in the use of standing offers.

- The standing offer user is aware of the fact that the RMSO cannot be used as an alternative to a staffing process, which would result in the identified user hiring an individual providing a service on the supplier's behalf, without conducting an official staffing process. For example, the identified user may not indicate in its call-up the identity of a specific person by whom it would like the mandate to be carried out. Nor can the identified user select a company on the basis of the identity of the people who work for it.
- The holder of a standing offer (the supplier) must inform its employees that the RMSO must not be used to establish an employer-employee relationship.

3.3 Geographical areas

The supplier may offer services in one or more of the following geographical areas:

1. Greater Québec, including Lévis, Valcartier and Donnacona
2. Rimouski, Bas-Saint-Laurent and Gaspé
3. Saguenay, Lac-Saint-Jean and Côte-Nord
4. Greater Montréal (including the North Shore and South Shore, in a radius of up to 50 km)
5. Greater Trois-Rivières, Nicolet, Shawinigan, including Grand-Mère
6. Sherbrooke, including Granby and Cowansville
7. Laurentians (north of Montréal from St-Jérôme, including La Macaza)
8. Abitibi

3.4 Quality control procedure

The supplier must have a quality control process in place that focuses on the following four areas, at a minimum:

- recruitment;
- testing and screening;
- client satisfaction with the services provided by the supplier;
- monitoring of the employee's performance during and after the assignment.

3.5 Availability of specific individuals

If the call-up is made within less than 48 hours, the supplier may not be able to guarantee the availability of a specific individual and will therefore recommend another person who meets the minimum requirements set out in the call-up.

3.6 Closing of government offices

In the event that a government office in which the work pertaining to a call-up is to be performed should have to close unexpectedly, the supplier may be compensated for up to a week's work, at the rates set out in the call-up, and depending on the amount of work specified in the call-up. This does not apply to statutory holidays and other foreseeable events.

In such situations, the supplier must attest that:

- no payment – for any client – was received for the services of the supplier's staff normally assigned to the call-up, for the period for which an invoice is submitted;
 - the supplier's staff usually assigned to the call-up will receive the payment due for the hours invoiced.
- The supplier makes no commitment to making the same resources available once the offices reopen.

4. General service standards

4.1 Place of business and office staff

For the full duration of the THS standing offer, the offeror must:

- provide, occupy and keep a fully operational business office in the region in which the service is being provided;
- remain open during regular business hours (7.5 hours per day, Monday to Friday, between 8:00 am and 6:00 pm);
- have at least two full-time employees able to offer THS to identified users in each of the geographical areas listed for which the standing offer is being issued. These employees must also include at least one bilingual person.

4.2 Service quality

For the relevant service categories, the identified user may request that the offeror provide the results of a specific individual's tests (listed in Appendix D). Instructions pertaining to testing for administrative support categories are included in Appendix D.

4.3 Response time

For the full duration of the standing offer, the offeror has four business hours to respond to calls, faxes or e-mails from identified users.

4.4 Expression – oral and written communication

When services are required in only one of the two official languages, the requirements indicated below apply to the language in question (reading, writing and oral communication).

Some call-ups may require bilingual services. When this is the case, the person carrying out the mandate is expected to possess the following knowledge and abilities, in both languages.

Reading

Ability to understand texts on a variety of work-related topics; ability to understand most of the complex details, inferences and nuances of meaning; ability to read and clearly understand specialized and less familiar subject matter.

Writing

Ability to draft descriptions and explanations of various formal and informal situations in respect of the work; ability to draft texts that develop and present ideas coherently; ability to draft texts using vocabulary, grammar and spelling that are generally appropriate to a work setting and require few corrections.

Oral communication

Ability to provide explanations and formulate detailed descriptions; ability to deal with hypothetical questions; ability to state an opinion, defend a point of view or justify an action; ability to give advice; ability to solve complex work-related problems.

4.5 Bilingualism evaluation

In case of doubt in the skills or abilities of the supplier's staff in terms of bilingual comprehension, the identified user may call upon the services of the Canada School of Public Service to conduct independent testing. Test costs – which are communicated before testing is performed – will be the responsibility of whichever party is found to be mistaken in light of the test results.

4.6 Bonus

When the identified user requires bilingual services, the normal hourly rate indicated in Appendix B – Basis of Payment is used, to which is added the amount indicated at the top of the Basis of Payment section (namely, \$0.55 per hour).

5. Workplace Hazardous Materials Information System (WHMIS)

Some service categories may require specific training.

When required, the supplier shall be responsible for WHMIS training and basic protective equipment, such as steel-toed shoes and hard hats, as specified in the applicable classifications (namely, Component 3).

Requirements in terms of training and protective gear specific to the workplace that are not mentioned in the category are the responsibility of the identified user.

The supplier providing Component 3 services must consult each classification description to obtain a complete list of requirements (see Appendix C).

ANNEX B**BASIS OF PAYMENT****1. Overtime**

No overtime shall be paid unless a specific request to the company is made by the identified user. Overtime shall be paid using the factor indicated by the offeror in its offer and reproduced in the basis of payment.

2. Bilingualism

When the identified user requires bilingual services, the basic hourly rate for the required service is increased by \$0.55.

3. Interview

The interview is not a customary selection tool for a supplier's proposal.

If an identified user requires that a supplier's employee pass an interview, the identified user shall pay the supplier for four hours, for Components 1 to 3. The applicable rate will be that for the requested service.

For Components 4 and 5 of the service categories, the identified user may request an interview for a maximum of three candidates, at no charge.

4. Overqualification

The identified user pays for the service category level it requires. If the supplier chooses to provide the services of an overqualified employee, it does so at its own expense.

5. Hourly rate

See attached "Pricing".

ANNEX C

DESCRIPTION OF TEMPORARY HELP SERVICES CATEGORIES

Service categories

This is the list of service categories covered in this standing offer, as well as the description of each of the levels. For each level, the expected training and experience is indicated.

In case of any disagreement between the supplier and identified user as regards the interpretation of these descriptions, the standing offer authority must be contacted before the RSO closing date.

Preliminary and general notes applicable to this Annex detailing the category of services as a whole. The following notes supersede the text and indications contained in the current Annex. Their function is to clarify terms and wordings of the current Annex.

1. Terminology

The term « essential qualification » must be read « mandatory criteria ».

The term « asset qualification » must be read « possible additional criteria ».

The term « classification » must be read « category of service » or « service category ».

When the topic is at hand, the work performance is reviewed (not supervised).

The resources are the ones of the contractor (not of the temporary help service).

When reading « aptitude » one must read « knowledge and experience » when the knowledge and learning can be structured and transferred.

2. Context of this standing offer

This annex cannot be read without taking into account the information included in the other sections of the document, for example the Appendix related to exams.

The objective of this Standing Offer is to allow the set up of a contract with a supplier to provide temporary help services.

The contractual relationship being with the supplier, indications related to the productivity, efficiency or work to be performed are transmitted by the client to the supplier.

Should some sentences and phraseologies let think that to gain time there is a link between the client and the resource provided by the contractor, the contractual relationship remains the one mentioned.

3. Office suites

Any reference to a « standard software » must be read « known office suites » (word processing, spreadsheet, etc.).

Any reference to a specific software in this document must be understood under its generic definition (for example « office suite » instead of « Microsoft Office »). Each client having its own software tools,

the definition must be generic. Should a precise requirement exist, it will be mentioned before the call-up by the client.

4. Diploma

Notwithstanding the mention made in the other sections of this document, a secondary school diploma is mandatory. A higher degree may be required, but a secondary school diploma obtained is a minimum, and no inferior level of study will be accepted.

By default, the equivalency is evaluated as follows :

The diploma must be delivered by a recognized Canadian teaching institution, or an equivalent established by a recognized evaluation of titles and competencies in Canada, should the diploma be obtained outside of the country. The list of the recognised organizations is available on the CICIC website (cicic.ca), which will be the only tool acceptable.

5. Federal government experience

By no mean can the federal government experience be used as an eliminatory criteria for an Offeror. When one Offeror is selected, the client may, between two otherwise equally qualified resources, select in priority the one with federal government experience, in agreement with the supplier.

See attached document called "Classification Description"

ANNEX D

Standards and Duties with Respect to Tests

Basic standards with respect to tests for administrative support categories

For the administrative support classifications, the supplier must ensure that its employees meet the expectations listed here. Minimum standards are indicated farther on.

Nature of tests

Standardized tests must be used to establish the qualifications of employees in the service categories in question and the supplier must, at a minimum, use the four types of tests below to select and classify its employees:

1. Keyboarding tests

1.1 Separate tests in English and French that are used to evaluate:

- a) the skills needed for keyboarding in English or French or in French and English, at a minimum speed of 40 words per minute with an error rate not exceeding 5% evaluated based on the number of characters; or
- b) the necessary skills for typing in English or French, or in English and French, at a minimum speed of 25 words per minute with an error rate not exceeding 3%.

1.2 Tests for proficiency in the use of common software programs (particularly for administrative categories)

The supplier must ensure its employees have a functional familiarity with commonly used software programs in the field of work of the service category in question. Such programs include Office suites (including word processing, spreadsheet, presentation and e-mail software). They may require an understanding of vector graphic software, spell checkers, Web browsers, and database software, depending on the service categories.

1.3 Grammar, spelling and punctuation tests

Sound knowledge of the basic rules of spelling, grammar and punctuation is normally required of people who type at the minimum speed of 40 words per minute.

1.4 Skills tests – office work

These tests, which are generally taken in the person's first official language (English or French), must be used to evaluate the basic skills needed to properly perform office work. Although the number and designation of the skills measured may vary from one test to another, a series of sub-tests should be included that are designed to evaluate:

- a) filing skills,
- b) coding skills,
- c) ability to conduct verifications,
- d) ability to do arithmetic.

2 Standards pertaining to tests – General aspects

2.1 Test development

Offerors may develop their own tests by calling on members of their own staff with the required training or experience or by using the services of consultants.

There are also commercial tests that meet the minimum requirements listed below.

2.2 Test administration

The person in charge of administering the various tests must have sufficient relevant training and experience. Administering a test to one or more people is a task that cannot be accomplished without adequate preparation; the person in charge must be familiar with the test itself and the conditions under which it will be administered.

The person in charge of administering the tests must have detailed knowledge of the oral and written instructions to give the candidates. He or she must periodically ensure that the required equipment (computers, tape recorders, etc) is in good condition and ensure that the general test conditions allow individuals to perform as best they can (adequate lighting, sufficient work space and a quiet environment).

2.3 Time limits

The duration of tests or portions of tests must be strictly adhered to.

The use of a timer is strongly recommended, particularly for monitoring the maximum amount of time allocated for each of the portions of the test.

2.4 Test scoring

Skill tests (typing tests, for example) must be scored in accordance with the guidelines and procedures clearly set out in a scoring guide or manual.

Those scoring the tests must have sufficient training and experience in scoring skill tests and have a sound understanding of the scoring guidelines provided for each test.

Language proficiency and office work skills tests (grammar, spelling and punctuation tests, for example) are often accompanied by a correction grid that can be superimposed on the candidates' answer sheets. The number of correct answers in each section and the test as a whole can then be calculated.

2.5 Security measures – test documents

All test documents, including answer sheets, test booklets, correction sheets and handbooks, must be

kept under lock and key. Only those responsible for administering and correcting the tests must have access to them.

It is important to ensure that all test documents are collected and accounted for after each test.

At least once a month, a full inventory of documents must be taken to ensure that test booklets and correction sheets are in good condition. Damaged documents must be destroyed and replaced.

3. Test standards – Specific aspects

3.1 Keyboarding tests

- a) There must be two equivalent versions in both official languages to assess the skills listed in item 1, i.e., two parallel tests for keyboarding tests in French and English.
- b) To determine the equivalence of the two parallel tests, the following factors will be used:
 - average typing intensity (see 3.1.d),
 - average syllabic intensity (see 3.1.e).
- c) Each equivalent test must include:
 - one page of general instructions, separated from the text to be typed,
 - a text of about 150 words used for the warm-up exercise (three to five minutes),
 - an initial text of approximately 1,400 to 1,600 keystrokes, entirely narrative in nature (containing neither numbers nor symbols), to be typed out within no more than five minutes,
 - a second text of approximately 1,400 to 1,600 keystrokes, exclusively narrative in nature, also to be typed out in no more than five minutes.
- d) The average number of keystrokes per word in each text should vary from 5.9 to 6.10. The average keystroke intensity indicator is the result of dividing the total number of keystrokes needed to type up the full text by the total number of words.
- e) The average syllabic intensity of each text must vary from 1.45 to 1.55. The average syllabic intensity indicator can be calculated by dividing the total number of syllables by the total number of words in the text.
- f) At the end of the typing test, candidates will be asked to indicate which of the two typing texts they wish to have scored. Only the designated text will be corrected.
- g) Correction must take into account the following two criteria:
 - the speed in words per minute, obtained by dividing the total number of keystrokes by 25,
 - accuracy, expressed as a percentage of errors, obtained by dividing the total number of errors by the total number of words typed.
- h) The passing score required on the typing test is:
 - 40 words per minute, with no more than 5% errors, or
 - 25 words per minute, with no more than 3% errors.
- i) To be considered as having all the required qualities, each candidate must meet both the speed and accuracy criteria; failure to meet either of the two criteria will lead to failure of the test.
- j) In case of failure, the person may be allowed to retake the test as soon as possible. However, in such cases, a different test under the same conditions as the previous evaluation will have to be used.

3.2 Spelling, grammar and punctuation tests

- a) A spelling, grammar and punctuation test is required in each official language to assess the knowledge listed in item 1.3, i.e., two separate spelling, grammar and punctuation tests, one in English and the other in French.
- b) The test must provide a reliable measurement of the candidate's mastery of the fundamental rules of grammar and punctuation, corresponding to the level required of a tenth-grade student.
- c) The test and related materials (i.e., the answer booklet, administration guide and technical manual) must be accompanied by appropriate normative data based on one or more clearly identified reference populations, such as 10th-grade students, applicants or office employees.
- d) The passing score for this test must be established using appropriate normative data. When this normative data is expressed as a percentile, it is recommended that a passing score corresponding to the 40th percentile be adopted.
- e) A minimum period of three weeks must elapse before candidates who fail the exam can be allowed to retake it.
- f) The overall results (i.e., number of correct answers obtained in each of the sections and the entire test) as well as basic personal information (test date, educational history, professional experience, etc) must be systematically filed and kept on record for one year. Regional standards based on the characteristics of local office job seekers can thus be established on short notice.

3.4 Skills tests – Office work

- a) There must be a test for office work skills in each official language to assess the qualifications set out in item 1.4.
- b) This test must provide an accurate and valid measurement of the basic skills deemed necessary for the proper performance of office work:
 - the speed and accuracy of filing and coding activities and the checking of numbers and/or words,
 - arithmetic skills.
- c) The test and related materials (i.e., the answer booklet, administration guide and technical manual) must be accompanied by appropriate normative data based on one or more clearly identified reference populations, such as 10th-grade students, applicants or office employees.
- d) The passing score for this test must be established using appropriate normative data. When this normative data is expressed as separate percentiles for men and women, it is recommended that a passing score corresponding to the 40th percentile be adopted in each case.
- e) A minimum period of three weeks must elapse before candidates who fail the exam can be allowed to retake it. A second failure will result in the candidate's elimination.
- f) The overall results (i.e., number of correct answers obtained in each of the sections and the entire test) as well as basic personal information (test date, educational history, professional experience, etc) must be systematically filed and kept on record for one year. Regional standards based on the characteristics of local office job seekers can thus be established on short notice.

ANNEX E

CALL-UP PROCEDURE

1. Principle

The right of first refusal applies. The identified user must first contact the supplier offering the lowest price for a given service.

2. Call-up procedure

2.1 Identification of the offeror

For a given requirement, the user must consider the following crucial factors in selecting an offeror:

- geographical area;
- service category and level;
- specific aspects (bilingualism, security rating).

Once this determination is made, the offeror with the lowest rate (hourly or daily rate) will be given the highest ranking.

2.2 Communication as needed

When placing the availability request, the identified user must indicate which tasks will have to be carried out.

The designated user may request a résumé and samples of work.

The user will contact the identified offeror and up to a total of five offerors with the lowest rates, in increasing order, and will confirm the contact by fax or e-mail. The user will specify its requirements by providing details about the desired level of education and experience (see below).

2.3 Time limit

The offerors contacted will have the time indicated by the user to confirm whether they can respond to the call-up. The time limit is at the user's discretion but must be indicated on the request.

The supplier has four hours to acknowledge receipt, in accordance with the response time frame set out in Appendix A (Requirement).

It is suggested that the user set a time limit for providing a candidate that is not less than 48 hours, and that takes into account the complexity of the service to be delivered: the deadline may therefore be longer. However, under some circumstances, the deadline may be shorter.

2.4 Handling the response

If the offeror is unable to respond, or if no response is received by the identified user, the identified user will move on to evaluating the offeror ranked second highest (second most cost-effective), and so

forth.

The identified user, having proceeded with the evaluation in the indicated order (beginning with the lowest rate), will take the offer of the first offeror who meets the requirements. Offerors who fail to meet one (or more) requirements, as well as offerors who fail to respond within the specified time frame, will be eliminated from consideration.

When the offeror who is in first place cannot meet the requirement, the identified user must take particular care to document the file.

3. Catalogue – Information grouping and distribution

The standing offer is for use by identified users.

The regional master standing offer will be distributed widely to identified users.

Distribution will be done through a Catalogue, accessible electronically and in hard copy, for identified users and all selected suppliers. The catalogue may also be consulted by the representatives, employees or clerks of all designated suppliers.

Representatives of the Government of Canada may obtain the catalogue at the following intranet address:

(will be indicated in the Standing offer)

The supplier agrees that the following information has been and may be included in the Catalogue, for each SO holder:

- Company number – procurement;
- Contact information (address(es), telephone number(s), e-mail address(es), fax number(s), etc);
- Contact information for the contact person;
- The hourly rates submitted and selected, for each service category.

The catalogue is made up of the rates accepted pursuant to the terms set out in the RSO.

The standing offer authority will send a copy of the electronic version of the catalogue to all offerors.

This information may also be obtained by anyone submitting a request under the *Access to Information Act* and the *Privacy Act*.

4. Changes to service categories or service category level

When answering a call-up, the supplier must exactly meet the service category and service category level requested.

If the supplier decides to enhance the service it provides, it will do so at its own expense.

In no case may the supplier invoice at a higher rate than that indicated in the catalogue for the service category and service level requested by the user.

For example, if a call-up is for the services of a mid-level clerk, the supplier must provide and bill for the services of a mid-level clerk. Under no circumstances may the supplier bill for the services of a

higher-level clerk.

If the supplier cannot meet the requirement, the call-up procedure will continue.

5 Candidate introduction

When the identified user obtains an acceptable proposal from the offeror with the right of first refusal, the identified user may request another individual than the one whose file was approved. This request may only be made under exceptional circumstances and once the call-up has been issued.

This request may not involve or result in a service category modification.

In cases where the supplier cannot meet this request to substitute an individual, the identified user may not deal with another supplier.

The identified user should instead go back to the approved file and select from the individuals who meet the documented requirements.

ANNEX F

INSTRUCTIONS FOR IDENTIFIED USERS

1. Principle

For any call-up, the identified user's file must be well documented.

2. Service evaluation – usage report by the identified user

The identified user may send a report to the standing offer authority on the use made of the standing offer and the evaluation of the services rendered. In the report, identified users must provide information on satisfactory RMSO holders, who provide high-quality services and on unsatisfactory RMSO holders who can never provide resources or whose resources are not acceptable, including cases where resources were rejected owing to poor performance.

Moreover, the identified user must report the following situations to PWGSC:

- An active SO holder that is repeatedly unable to provide the services of a resource who meets the service category requirements set by the identified user;
- Poor-quality services provided by a supplier or temporary help services that do not meet the service category requirements;
- Any situation where active SO holders violate the terms of the SO.

The identified user must immediately report any cases of inefficiency, absenteeism or inability to perform THS-related tasks to the supplier's representative.

If the issue cannot be addressed by the supplier's representative, the identified user must seek the help of the person in charge of the SO. This will give the SO officer an opportunity to undertake whatever other corrective measures are required, given the circumstances.

3. Reminder about call-ups

For a given requirement, the identified user must:

- Document: Document the requirement, draft the requirement and the mandatory requirements. All processes must be documented, from the requirement formulation to responses, acceptances or rejections, as well as specified deadlines.
- Contact: The requirement should be sent to one or more offerors, to a maximum of five offerors simultaneously.
- Consistent handling: In cases where one or more offerors are contacted, contact must be synchronized (all five at once, for example). All offerors must receive the same information and be evaluated using the same rules, which must be clearly specified (mandatory criteria, deadline for responding, etc). If the requirement is for a single person, only one résumé per offeror is required; the solution used if more than one résumé is received must be indicated (rejection of the proposal or study of only the first résumé received). Inconsistent handling means the process must be started over.

- Information to include: Your correspondence must clearly state that a call-up will not necessarily be made, even if the offeror meets the mandatory criteria for the requirement. It is also important to indicate that failure to respond will be deemed a withdrawal.
- Offer a deadline for responding: Allow a reasonable time frame, i.e., not less than 48 hours. In determining a reasonable deadline, it should be kept in mind that it is easier to find a clerk than an architect.
- Evaluate: Always operate on the principle of right of first refusal, which consists in giving priority to studying the proposals of offerors with the lowest rates. Once the deadline passes, begin with the proposal of the offeror with the lowest rate. If the proposal does not meet the mandatory requirements indicated in the document, the offeror with the next lowest rate should be considered next, and so on until an offer is found that meets the requirement. All proposal rejections must be documented. It is not possible to negotiate at this stage (with respect to rates, competencies, service categories or persons); the proposal is either acceptable or it must be rejected. The call-up is awarded to the first offeror who meets ALL the mandatory criteria set out in your THS requirement and offers the lowest hourly rate as indicated in the catalogue.

4. Interviews

Except in specific, documented situations, the interview is not recommended as a selection tool. An evaluation grid must be used at all times.

If an interview is conducted and costs must be paid, the identified user must submit separate call-up documents for the interviews.

If you have answered YES to any of the above, please explain below. – Si vous avez répondu OUI à une des questions ci-dessus, veuillez fournir une explication ci-après.

E. SIGNATURE (When sections A to E are filled out completely, please return the completed form to the institution for approval.)

(Une fois que les sections A à E ont été remplies, veuillez retourner le formulaire dûment rempli à l'établissement aux fins d'approbation.)

In making this application, I hereby give the Correctional Service of Canada my consent to use the information provided on this form to conduct such inquiries with police authorities as may be necessary to ascertain my suitability. Finally, I acknowledge that the Correctional Service of Canada has no responsibility for any harm that may come to me in the course of my activities, except where such harm is a direct result of negligence on the part of an employee(s) of the Service.

NOTE: Access may be denied for submitting false information. Passes may be issued for those receiving clearance and approval.

En soumettant la présente demande, j'autorise le Service correctionnel du Canada à se servir des renseignements fournis dans le formulaire afin de mener, auprès des services de police, toute enquête jugée nécessaire pour vérifier mon admissibilité. Par ailleurs, je conviens que le Service correctionnel du Canada ne peut être tenu responsable d'un préjudice subi dans le cadre de mes activités sauf si ce préjudice est directement attribuable à la négligence d'un ou de plusieurs employés du Service.

NOTA: Tout demandeur qui fournit de faux renseignements peut se voir refuser l'accès à l'établissement. Un laissez-passez peut être émis aux demandeurs dont la demande d'accès est approuvée.

This form must be completed and signed by each individual who is currently on the Board of Directors of the Bidder/Offeror/Supplier and provided with the Bid/Offer/Arrangement.

Le présent formulaire doit être rempli et signé par chaque membre du conseil d'administration du soumissionnaire/de l'offrant/du fournisseur et fourni avec la soumission/l'offre/l'arrangement.

A

PRIVACY ACT STATEMENT

ÉNONCÉ CONCERNANT LA LOI SUR LA PROTECTION DES RENSEIGNEMENTS PERSONNELS

The personal information requested on this form is collected under the authority of subsection 750(3) of the *Criminal Code*, paragraph 42(1(c)) of the *Financial Administration Act*, and sections 7 and 21 of the *Department of Public Works and Government Services Act*. The information will be used for validating the criminal conviction certifications necessary for obtaining or maintaining a procurement instrument. It may be shared with other government departments, agencies, as well as provincial, territorial, and federal courts, within the limits of what is required to conduct the criminal conviction verification.

A refusal to provide information will result in the bid/offer/arrangement being rejected or the contract terminated, the standing offer being set-aside or the supply arrangement being cancelled, as applicable.

The personal information is described in personal information bank PWGSC PPU 184 - Integrity Assessment Program. Individuals have a right of access to, correction of and protection of their information in accordance with the *Privacy Act*.

Les renseignements personnels demandés dans le présent formulaire sont recueillis en vertu du paragraphe 750(3) du *Code criminel*, du paragraphe 42(1(c)) de la *Loi sur la gestion des finances publiques* et des articles 7 et 21 de la *Loi sur le ministère des Travaux publics et des Services gouvernementaux*. Ces renseignements seront utilisés pour valider les attestations de condamnation au criminel nécessaires pour obtenir ou conserver un instrument d'approvisionnement. Les renseignements peuvent être diffusés à d'autres ministères et organismes fédéraux, ainsi qu'à des tribunaux provinciaux, territoriaux et fédéraux, dans les limites de ce qui est requis pour la vérification des condamnations au criminel.

À défaut de fournir les renseignements demandés, la soumission/l'offre/l'arrangement sera rejeté ou le contrat résilié, l'offre à commandes sera mise de côté ou l'arrangement en matière d'approvisionnement sera annulé, selon le cas.

Les renseignements personnels sont décrits dans les fichiers de renseignement personnels n° TPSGC PPU 184 - Programme de l'évaluation de l'intégrité. Les personnes ont le droit d'accéder aux renseignements personnels qui les concernent, ainsi que de les faire corriger ou protéger, conformément à la *Loi sur la protection des renseignements personnels*.

ANNEX K

Evaluation Criteria

Offerors must meet all of the following mandatory technical evaluation criteria to be declared responsive.

1. Mandates and clients

Offerors must submit with their offer, at least five (5) different temporary help services mandates they have been provided for at least three (3) different clients in one or more categories of temporary help services, described in the document "Description of classifications ".

The mandates must have been provided within four (04) years of the closing date of this request for standing offer.

The mandates must have been for full-time - more than 35hrs/week, for a given person.

To meet this requirement, offerors must have three (3) of their different clients duly complete, sign and date letters using the format indicated in Annex L – Offeror's letter of reference and submit with their offer .

2. Existence and professional requirements of the company

Offerors must submit with their offer, a certificate of incorporation or other document attesting to the company's founding.

Offerors must have provided temporary help services for at least two (02) years starting from the closing date of this request for standing offer. For this, they must provide proof.

Note: Canada reserves the right to take references.
