Amendment #2 - F1700-130425/A

The above referenced solicitation is amended as follows:

PART 1 - GENERAL INFORMATION**1.2 Requirement**

Delete:

13.5m

Insert:

15m

PART 1 - GENERAL INFORMATION**1.2 Requirement**

Delete:

These new pumps must be placed in the same location as the current 77Hp river pumps as per reference drawing sheets number 22-35-267 and 22-35-401 and 22-35-402.

Insert:

These new pumps must be placed in the same location as the current 77Hp river pumps as per reference drawing sheets number 22-35-267 and 22-35-401 and 22-35-402 and 22-35-430

PART 6 - RESULTING CONTRACT CLAUSES**6.4. Term of Contract**

Insert:

6.4.2 Delivery and Unloading

Delivery trucks must be equipped with an unloading device which will permit unloading at sites with no hydraulic, stationary or other type of unloading facility.

When making deliveries, sufficient personnel must be provided to permit unloading of any type of vehicle without the assistance of federal government personnel.

At some sites, the delivery truck must be unloaded while parked at the curb. When material is placed on the sidewalk, it must be placed in proximity to the designated entrance so as to be readily accessible to transport by mechanical handling equipment utilized by site personnel.

Insert:

5.5m

ANNEX A: Statement of Work for Services

Instert:

4.0 Removal and Relocation of Old Pumps

The existing pumps must be removed from the intake by the Contractor and placed in the warehouse building at Kitimat Hatchery, located approximately 250m away from the intake.

The amendment is raised to also provide clarification for the the following questions:

Questions and Reponses:

- Q1: Will alternative ABS pumps require adapters to the Flygt Guide Rail system or would a change to ABS Guide Rails be considered?
- R1: The new pumps, installation, and commissioning is part of this contract. Either adapters to the Flygt Guide Rail system or a change to a new rail system to fit the new pumps would be acceptable.
- Q2: What is the static head the pumps will be subject to?
- R2: The minimum and maximum Kitimat River water levels are in drawing 22-35-430, section A. Please contact jodi.nelson@pwgsc.gc.ca to request this drawing.
- Q3: Please confirm existing pumps guide rail size (diameter).
- R3: 3"
- Q4: Please confirm existing Flygt pump discharge size (diameter).
- R4: Dwg 22-35-267 shows pump discharge piping as 300 mm (12") and we will default to this pending confirmation. It is a 12" Flygt pump mounted on a 12" discharge connection. Please contact jodi.nelson@pwgsc.gc.ca for drawings.
- Q5: What hoisting capability exists at site to remove existing pumps and place new pumps?
- R5: There is no available machinery on site.
- Q6: What machinery, if any, is available on site to offload pumps from delivery trucks? To place pumps from truck unloading zone to final placement zone?
- R6: There is no available machinery on site. The contractor must supply any equipment needed for offloading trucks and pump placement. See added 6.4.2 Delivery and Unloading clause.
- Q7: What does Canada expect the successful bidder to do with existing pumps removed to make way for new pumps?
- R7: The existing pumps must be removed from the intake by the Contractor and placed in the warehouse building at the Kitimat Hatchery, located approximately 250m away from the intake. See added scope 4.0 Removal and Relocation of Old Pumps requirement.
