Under Attachment 1 to Part 4 - Technical Criteria; 1.2 - Point-Rated Technical Criteria: RT5 - Transportation:

DELETE:

For RT4.1 and RT4.3, the following service phases will be used to assess the responses provided.

INSERT:

For RT5.1 and RT5.3, the following service phases will be used to assess the responses provided.

Question 1:

1) Please clarify if PMV's are authorized for every move.

Answer 1:

All relocating members are entitled to move a vehicle from origin to destination; approximately 90% of PMV moves are taking one vehicle each way. There are few NOS locations where vehicles are prohibited.

Question 2:

2) RFP Section: Attachment 1 to Part 3 – Pricing Schedule (1A-C, 2A-C, 3A-B, 4)

As unit costs vary significantly by volumetric weight, is Canada able to provide weight breaks for each of these tables and zones? This will likely result in substantial savings to Canada as lower rates will apply to higher weight shipments. In addition, the absence of this information could provide an unfair advantage to the incumbent contractor as they will be able to base their pricing on their experience and inside knowledge of typical weights for DND Shippers.

Answer 2:

The majority of shipments are between Zone 3 (Germany) to Zone 6 (UK). The majority of moves to LNOS originate from Zone 3, as most of the members have to take language training.

Please see the attached spreadsheet for detailed information.

Question 3:

3) RFP Section: Annex B – Basis of Payment (3.4, 4.4)

Rates for Vehicle Shipments are normally priced at a flat rate, not per cwt. Please clarify this requirement.

Answer 3:

That is correct, vehicles shipments are priced at flat rates in the three classes, class 1 is the most popular.

DELETE:

Rate per cwt on a total net weight basis

Question 4:

4) RFP Section: Annex B – Basis of Payment ; 8.0 Europe – Intra / Local Moves (8.2.2)

Please clarify the zones / locations since this is for moves within Europe.

Answer 4:

Intra/local moves are based on distance and weight, zones were used to identify the distance brackets.

Under Annex B – Basis of Payment ; 8.0 Europe – Intra/Local Moves (8.2.2) :

DELETE:

Zone	Distance	Combined Origin and Destination Services
Zone 1	up to 999 KM	$ x.xx per cwt
Zone 2	1,000 to 1,999 KM	$ x.xx per cwt
Zone 3	2,000 to 2,999 KM	$ x.xx per cwt
Zone 4	3,000 to 3,999 KM	$ x.xx per cwt
Zone 5	4,000 to 4,999 KM	$ x.xx per cwt

INSERT:

Distance	Combined Origin and Destination Services
up to 999 KM	$ x.xx per cwt
1,000 to 1,999 KM	$ x.xx per cwt
2,000 to 2,999 KM	$ x.xx per cwt
3,000 to 3,999 KM	$ x.xx per cwt
4,000 to 4,999 KM	$ x.xx per cwt

Questions 5:

5) What are the city locations in Canada and in Europe where the majority of moves take place? Can you identify the number of moves in and out of these cities?

Answer 5:

Most of the moves from Canada originate primarily in Ontario/Quebec, followed by New Brunswick, and then Alberta. The moves to locations in Europe do not follow a consistent pattern and vary from year to year; approximately 7 moves a year are intrazone (from one overseas location to another). The attached document contains a list of city pairs for all moves, as a sample (one year only).

Please see the attached spreadsheet for detailed information.

Question 6:

6) What is the frequency of storage in transit/SIV moves under 30 days? Can we expect this frequency to be higher in Canada, then in Europe? If frequency figures are not available, please provide the percentage of storage in transit/SIV cost in comparison to total cost, excluding taxes.

Answer 6:

Approximately 10 moves per year require SIT originating in Canada due to a member waiting for accreditation. These tend to be for embassy moves to NOS locations. SIT under 30 days does not tend to occur in Europe.

Question 7:

7) What is the frequency of Article/Appliance Servicing? Can we expect this frequency to be higher in Canada, then in Europe? If frequency figures are not available, please provide the percentage of Article/Appliance servicing in comparison to total cost; excluding taxes.

Answer 7:

The expected servicing rate for appliances that go into storage or are moved is 100%, as all appliances must be certified as being in working order. The majority of voltage overseas is 220 while voltage in Canada is 110; since appliances requiring 110 are incompatible, most of the appliances go into storage.

Question 8:

8) It states 3.3 on page 51 of 138 states that services shall cease no later than 2030 hours. Throughout Annex D "Service failures", maximum hours continue to state 1900 hours. We believe that Annex D should have been changed to 2030 hours as well. Please confirm.

Answer 8:

That is correct, Annex D will be changed to reflect 2030 as the maximum hour of service.
