This solicitation amendment number one (01) is issued to extend the closing date of the solicitation, and answer questions received during the solicitation process.;

Questions and Answers

Q1. What if there is weather delays and how will that impact the completion date? To wet or to dry and you have to shut down due to fire hazards? Please confirm?

A1. Should extraordinary weather events occur, we would consider an extension. However, the contract will allow a month and a half to do the work which should be sufficient under normal circumstances that may include a few delays because of short-term weather events.

Q2. On the snow drift mitigation fence – please confirm it is only 8' instead of the 12' in the past?

A2. Only 8' with top crossbar to avoid the fence bagging down - no 12' fence required.)

Q3. Do you remove the fence first? Or do we have to put up the new fence first then do the removal after? Is there room to work?

A3. The contractor will be able to move off the existing fence line to within 1/2 to 1 metre to allow the posts to be placed while the fence remains intact to hold the bison. The bison will be in the paddock where they are working, so they will have to be certain that they don't drop fence too far ahead of putting up the new wire, or they may get caught with bison wanting to walk on through the gap.

Q4. On the east west section of the fence, the drawing is showing a gate but in the statement of work I don't see any gates required? Please confirm?

A4. The gate is already in place along with the brace posts. It was built in the last phase of the fencing. So they will simply be building fence on either side of it and tying wires to it - there are no gates or gate bracing required in this section of fence.
